PROJECTOR
LIFTING SERVICE LTD

Registered No: 1873033

*When You Need a Professional,
Dependable, Heavy Lifting Service
and You Don't Want to Take Any Chances*

You will always receive the most appropriate lifting and moving solution.

When you need to move something heavy, just plain awkward or perhaps both, getting a professional company to give you advice, and to complete your move in the most effective way possible, will make your life so much easier.

As a professional lifting, moving and installation company since 1988, you'll appreciate that we've come across all manner of difficult and tricky situations. It's when these circumstances arise that our specialist knowledge, our understanding of how the equipment can be used safely and our ability to solve industrial moving challenges really comes to the fore.

Of course the majority of work that we do is planned and executed without any issues, which is one of the reasons our clients rely on our heavy lifting capabilities, organisations such as British Airways, Guinness, Rolls Royce, Nissan and Toshiba to name a few.

You Can Have Total Peace of Mind Because We Take No Risks

It would be great to think that because of the planning, the equipment used, and the training and experience of our engineers, that Public Liability and Employers Liability insurances aren't necessary, but our policy is 'take no risks' and that includes insurance cover.

So, for those unforeseen situations that nobody can control, we invest heavily to make sure you, your clients, our technicians and our solicitors are all happy that everybody is fully covered for all eventualities. In the highly unlikely event of something going wrong the best of provision has been made.

When you work with us copies of our Employers' Liability Insurance certificate and a Statement from our Insurance Company are available, just ask if you'd like to see them.

Heavy lifting specialist supporting all your needs

Contract Lifting and CPA Hire

For your Contract Lift we will work with you to understand any limitations or challenges then we'll plan your lift for you, the most appropriate equipment for the project will be selected including the specification of the slinging and signalling and rigging arrangements. On the appointed day our engineer will supervise your project and take responsibility for your entire lifting operation. Once your job is complete and you're happy you can sign it off.

If you would like to hire the lift equipment and operator under CPA model conditions to allow your team do the planning, take control and supervise the operation yourselves, we'll be happy to help you on that basis too.

It is important to note that, as the customer, whether using a Contract Lift or CPA arrangement, the legal responsibility for Health and Safety is yours as, legally, you cannot abdicate that duty. However, if you would rather we take on more of the legal liabilities a Contract Lift would be advisable as we can offer greater protection under our own insurance cover.

For further information regarding our insurance cover please call us on 01234 240177 or visit our website and go to the Contract Lift page.

**Don't take any chances,
call us now on
01234 240177
and we'll be happy to help.**

Plant and Equipment Handling

Whatever you need to complete your project on time and on budget, we will plan for and provide.

You may want a comprehensive electrical and mechanical service including the complete dismantling of your equipment for reassembly or modification, or you may just need a new configuration. Whatever is required we can complete as much or as little as you need.

Having discussed with you, in detail, what your project requires we can produce a flexible project plan which meets your requirements exactly.

By following the plan we will help you to achieve a safe and efficient project on time and on budget. So contact us now to find out how we can remove your headaches with Plant and Equipment Handling.

Machine Removals and Factory Relocation

From a simple machine removal or internal relocation to a major factory relocation in another country it will be planned and executed to minimise disruption and maximise efficiency.

Projector Lifting Service Ltd have the necessary equipment, skilled permanent workforce, knowledge and experience to carry out your projects to the highest of standards.

Each aspect of your project will be fully documented including specific risk and/or method statements, certification, licences and insurance cover, all designed to protect and give you peace of mind whilst the project is completed.

Industrial Dismantling

You may find that you want to dismantle an industrial site rather than demolish it, equipment and machinery can often be recycled if it's deconstructed properly simply by using the correct equipment in the most appropriate way.

An issue we see quite regularly is the use of a crane when a hydraulic lift system would be more appropriate, as it can be used to lift at multiple points and keep a structure level, often a real advantage. A lift system can also be used where larger cranes often can't.

As we have our own hydraulic lift systems ranging from 200 to 453 tonnes we're able to specify and utilise the right equipment every time. With that said, where a crane is the best equipment for the job we'll use one.

Whatever your industrial dismantling needs, Projector Lifting Service Ltd can help you with planning, lifting and moving equipment the labour and the expertise to ensure your objectives are met so contact us now to find out how.

Project Cargo Services

If you need to lift and transport over dimensional and heavy equipment our specialist global partners have the knowledge, understanding and experience you will need to make sure your heavy lift and oversized shipments, or any other logistically challenging projects, are completed with the minimum of disruption.

You'll be pleased to know that we have delivered a fully integrated project logistics management service for a variety of different industry sectors including chemical, petrochemical, construction, engineering, energy, pipeline, infrastructure, pharmaceutical, mining and other sectors.

So feel free to call and discuss your logistical nightmare.

The Commitment You Will Get From Projector Lifting Service Ltd

When you choose Projector Lifting Service Ltd to partner with you, you have the right to expect, and can anticipate, the following...

- You will be treated in a friendly and courteous manner and you can feel at ease and relaxed when we are working on your project.
- The team you will deal with has 102 years, plus, of combined experience in the heavy lifting industry... so you can have complete confidence that we have the expertise, specialised knowledge, equipment and ability to help you get what you want from where it is to where you want it to be.
- You will not be made promises we can't keep.
- All your records and your dealings with us are confidential so you can be sure that you are dealing with an organisation you can trust commercially.
- All aspects of your project can be dealt with centrally providing you with a one-stop solution, which means we can manage all of your needs and make things run smoothly for you. Where needed we will carry out needs analysis reviews to establish your exact requirements. This means you can be confident that the work we are completing for you is exactly what you want and need.
- Your fees will be agreed in advance so you can be certain that there will be no hidden charges. This means you can calculate your expenditure and have complete confidence that you'll never be overcharged and will remain on budget.

If this is the kind of commitment you need for your lifting project please contact us now and we'll be happy to help.

Specialist Lifting and Moving Equipment

Below is a list of equipment we could utilise for any of your projects. Operated by time served, trained engineers, this equipment is used to move and install equipment all over the world.

- 453 tonne hydraulic gantry lift systems (to 9.5 metres)
- 272 tonne hydraulic gantry lift systems (to 9.5 metres)
- 230 tonne hydraulic gantry lift systems (to 12 metres)
- 181 tonne hydraulic gantry lift systems (to 7 metres)
- Nylon rolling systems with 104 tonnes capacity
- Air skates with a 24 tonne capacity
- Hydraulic gantry system.
- Linked hydraulic ram jacking systems, long and short stroke rams up to 800 tonnes capacity
- Specialist forklifts and Versalifts
- Mobile cranes

Your projects will include detailed planning and engineering and, if necessary, CAD design. All your International as well as National installation contracting can be facilitated using combined and co-ordinated installation and transport with the equipment above.

Testimonials

"I would like to just say how pleased I have been with the transfer of the Engel machine from Redditch to Hartlip over the last couple of weeks. All the team from Engel and Projector have worked really hard, helped each other out and got the job done very well.

The level of skill, cooperation and flexibility has been second to none and that is much appreciated. Please pass my personal thanks on to everybody who has been involved in your company."

Roger Larcombe
Magna Interiors

"Just a note to say that having worked with you now for many years, we know we can expect a high standard of professionalism when you install our injection moulding machines across Europe. We'll look forward to many more successful installations"

Andy Dickson,
Engel, Warwickshire
