
Dantex holds Digital Open Day in the UK - PR 12009

New Improved 1290 Digital Label Printer, Rewinder and Coating System Open Day 14th November 2012

Dantex is to hold an Open Day to showcase the 1290 Digital Label Printing System, Rewinder and Coating Unit and would like to extend an invitation to anyone interested in finding out more to visit their Bradford offices on **Wednesday the 14th November**.

The Dantex 1290 is a compact, roll or sheet-fed digital label printer, designed for short to mid-run production and is the ideal solution for fast label printing. You will also have the chance to see its imposition, job monitoring and media optimisation software.

The EZ Koat Web 15 is a small footprint UV & Aqueous Coating System; the unit could be stand-alone or as a compliment to the 1290 printer.

Dantex will also demonstrate StarPlate, a new digital flexo film production solution for use with flexo and letterpress printing plates, as well as the StarProof contract proofing solution.

Demonstrations of these systems will take place throughout the day.

Light refreshments will be available from 9.30am onwards and lunch will be provided.

If you would like to attend you can contact info@dantex.com for more details.
