

## Dewsbury Market

Market sector - Retail

Geographic sector – Dewsbury, West Yorkshire

### Project details

We have recently installed our Intelivent Natural Ventilation package within this prevalent and established Market place in the heart of West Yorkshire. The marketplace has undergone a £2.5 Million refurbishment overhaul.

### Project overview

GDL supplied a Natural Ventilation solution incorporating our roof mounted penthouse louvers and wireless controls systems to ventilate the various market stall areas.

At the request of the Architect each of the market stall areas incorporated Weathervanes on the penthouse turrets that each represent the produce sold with each stall area, i.e. Poultry, Game and Fish. This feature was only possible on aluminum turrets.

### Benefits of using GDL Products to the project

- Our 'Intelivent' units offer 'Free' Natural Ventilation within each market hall eliminating a mechanical arrangement.
- Each stall has individual sensors meaning each stall holder has an automatic control as well as an independent override.

GDL products used on this project  
Penthouse Louvres, Motorized Volume Control Dampers and Eggcrate Grilles and Weathervanes
