

Project name – Chetham’s School of Music, Manchester

Market sector - Education

Geographic sector - Manchester

Project details

GDL have recently completed the contract to manufacture and install the external weather Louvres at the prestigious Chetham’s School of Music based in Manchester alongside Main Contractor, Sir Robert McAlpine Ltd.

This newly constructed six-storey building is the largest music school in the UK and the only music facility of its kind based in the North of England.

Project overview

This state of the art, iconic music facility designed by Manchester based Roger Stephenson Architects was designed to compliment its surrounding environment whilst providing a unique learning platform for the students.

Cutting edge construction techniques such as high level acoustic protection are in operation throughout the music and academic facilities.

Our external weather louvers, manufactured to meet the bespoke design criteria, are positioned on the façade of the building allowing excellent air flow performance and rain defence.

Benefits of using GDL Products to the project

- Bespoke weather louvers were manufactured specifically to meet the design requirements of the client.
- Our louvers provide excellent functionality and high level weather defence.
