New Coupling Pulleys.

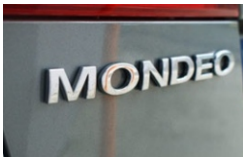

UNCP89

Unlike a standard clutch pulley, a coupling pulley mounts on a rubber coupling. The idea being it absorbs any shock or vibration being transmitted to the alternator. Originally these were only available from the dealer at a cost approaching £200!

New to range!

We are now able to offer these at a significantly reduced price compared to the main dealer. This will enable you to sell onto the garage or end user and still retain a healthy margin!

It's so easy. Just type in your O.E or aftermarket number and if it's in our list of over 80,000 references you can see our part number, availability, and pictures. Whether it's an alternator, starter motor, dynamo or clutch pulley you'll find them all on our site, with a list of O.E references to aid the identification. It really is that easy!

Part numbers and pictures are for references only. No 331 08/11
