## Universal's starter motors go live! On Autocat+

Universal Rotating Electrics Ltd are pleased to announce that in addition to their alternator and dynamo range, their starter motor range is now available on MAM software's Autocat+.

Autocat+ is widely used by Universal Rotating Electric's customers due to its quick, easy and accurate way of identifying parts. Autocat+ enables us to update our information quickly and accurately allowing our customers to take full advantage of our rotating electrics range.

This is backed up by high quality photos of the product, making identification quick and easy.

With daily deliveries of both new (no surcharge) and exchange units from our new 10,000 sq ft premises in Basildon, Essex. We can also offer a full reconditioning service within 24 hours from our new fully equipped workshop.

With over 3500 part numbers in stock including high output, chromed and specialist applications, Universal Rotating Electrics have been supplying the trade for over 30 years,

If you require any further information please don't hesitate to call us on 01268 662210 where we will be pleased to help.
