**Invitation for a Fischer Seminar
 Coating-thickness measurement and materials analysis
 1st May in Sherwood Business Park, Annesley, Nottinghamshire, NG15 0DT**

Invest in the future with education of your qualified employees!!
 Would you like to learn the state-of-the-art of measuring methods for coating-thickness measurement and materials analysis? Are you or your employees interested in both practical applications as well as the necessary theory? Then you are very welcome to our one-day special seminar.

Seminar contents:

- Principles of using X Ray Fluorescence for Coating Thickness Measurement and Material Analysis including calibration and normalization.
- Coating Thickness Measurement using XRF
- Material Analysis using XRF
- Explanation of the operation of the XRF instruments and workshops with practical exercises in small groups.

Certificate of training:

Every participant receives a certificate at the end of the seminar that can be used as proof of training in the context of ISO9001:2008, 6.2.2.

If you are interested in these topics we recommend that you register quickly because the number of participants per seminar is restricted. You will find registration details on the next page.

Best regards
 Fischer instrumentation (GB) Ltd
