Metro Top Track system

- Top track system using aluminium extruded track positioned at high level.
- Track positioned @ 2185mm FFL and connected to stationary end units.
- Mobile units traverse along track to create an access aisle where required.
- System condenses and maximises space in cramped situations.
- Promotes stock rotation and stock identification / segregation.
- Floor surfaces are easily cleaned.
- All shelving systems (except aluminium/polymer) can be incorporated into this system.
- Minimum height required = 2250mm.
- Maximum loading per mobile unit = 400kg.
- Stationary intermediate units requird when track exceeds 6400mm length.
- Fully bespoke design - **Price on application**.

Metro Quik Track system

- Quiktrak system using aluminium extruded or stainless floor laid track.
- Track surface mounted, front and back and connected to stationary end units..
- Mobile units traverse along track to create an access aisle where required.
- Ideal in situations where ceilings are low and Top track cannot be used.
- All shelving systems (except aluminium/polymer) can be incorporated into this system.
- Maximum load for mobile units = 900kg.
- Mobile unit height must not exceed 1880mm.
- Fully bespoke design - **Price on application**.

Chassis mounted high density system

- Stainless steel chassis driven by movement of a hand wheel situated at the front of each unit.
- Chassis traverse along a stainless track positioned at far rear of unit.
- Track floor mounted and positioned so that it is not a trip hazard or dirt trap.
- All gears / bearings and chains enclosed with no finger traps.
- Any shelving system can be mounted on the chassis.
- Also suitable for HTM 71 cabinets to be mounted (see HTM -71 section).
- Chassis load capacity 400kg.
- Maximum chassis length 3000mm.
- Double or single bank units available. **All prices on application**.

High density suspended system

- Anodised aluminium extruded main frame and track.
- Unit can either be freestanding or wall fixed design.
- Aluminium / polymer shelving units suspended from the track. Suitable for all depths.
- Promotes easy to clean / unobstructed floor surfaces.
- Eliminates trip hazards.
- Custom build design to suit available space.
- Intermediate main frame down posts required when unit exceeds 3000mm expanse.
  All prices on application.

Security cages

- Nylon coated wire or stainless steel options.
- Open grid wire enclosure panels - promotes air circulation and light penetration.
- Lockable hinged doors that can swing through 270 degrees. (lock not incl)
- Fixed top and bottom shelves - top shelf fitted with anti-tamper locking bolts.
- All units fitted with further 2x intermediate wire shelves. Further shelves optional.
- Optional solid base shelf and mobile option.

Bucket / Bowl Holders

- Stainless steel construction.
- One piece ring fully welded to "Hook-on" bracket.
- Rings fitted with anti-static buffers - eliminates vibration.
- "Hook-on" design - to be used with "Accessory rails"
- Units removable for autoclaving.

Buckets / bowls sold separately - see page 10 of price list.

Code	Model	Dimensions	£
HT-AC-BUC-01	Bucket holder - to suit bucket TA-BUC-01	440x375mm	£104
HT-AC-BOWL-01	Bowl holder - to suit bowl TA-BOWL-02	440x375mm	£104

HTM FITTED CABINETS - Wall Units / Base Units / Full Height Units

Full Height units

- Melamine faced MDF carcase - choice of colours.
- Standard height 2100mm high.
- Injected moulded ABS "tray runner" liners fitted as standard.
- 400 or 600mm entry profile for accepting HTM-71 trays.
- Rigid scope basket option.
- Either freestanding units or incorporated into a scheme.
- Choice of doors / handles / closures / plinths.
- **All prices on application**.

Base Units

- Melamine faced MDF carcase - choice of colours.
- Standard height 875mm high.
- Injected moulded ABS "tray runner" liners fitted as standard.
- 400 or 600mm entry profile for accepting HTM-71 trays.
- Rigid scope basket option.
- Worktop options.
- Choice of doors / handles / closures / plinths.   • **All prices on application**.

Wall units

- Melamine faced MDF carcase - choice of colours.
- Standard height 650mm high.
- Injected moulded ABS "tray runner" liners fitted as standard.
- 400 or 600mm entry profile for accepting HTM-71 trays.
- Rigid scope basket option.
- Sloping tops optional.
- Choice of doors / handles / closures.
- **All prices on application**.

HTM- HIGH DENSITY SYSTEM
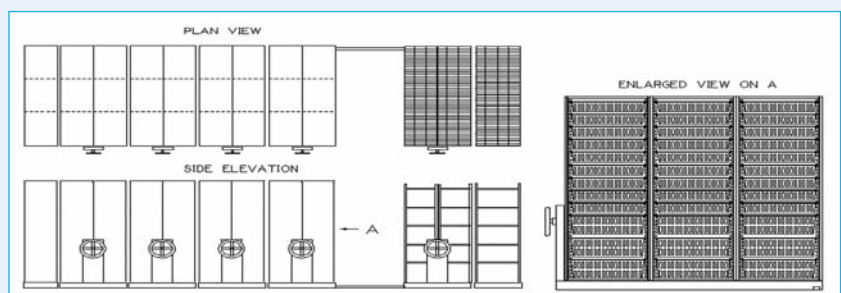

- HTM full height units mounted on a chassis system.
- Chassis traverse along a st/st floor mounted track.
- Units mechanically driven by movement of the hand wheel positioned at the front of each chassis.
- System condenses and maximises available storage space.
- **Price on application**.
