

LV1000 / LV1000H

**Lifetime
Guarantee**

LVC Dry Vac

The new LV1000 has been born from taking the tried and tested design to a new level to meet the changing demands of the market place, creating a smaller, lighter, quieter machine with an abundance of features that add real value. The introduction of a powerful single-stage taper fan motor has provided the platform for the new compact design. Overall height and weight are reduced, noise emission decreased and filtration efficiency enhanced. An extensive range of accessories equips the Mini for all specialist dry vacuuming tasks.

LV1000H is equipped with a HEPA filter and is specifically designed for use in environments requiring a very high standard of filtration efficiency such as computer rooms, hospitals and nursing homes.

A **Lifetime Guarantee** against manufacturing defects confirms our confidence in the quality and reliability of this outstanding vacuum cleaner.
