

Cattle slats Diagonal

Diagonal slat are ideal for tanks and slurry channels. Commonly used where slurry is scraped across the slat to speed the drop action through the slat. Slats designed to your required load bearing requirements.

Design Features

- Allows slurry to fall through the slots better if being scraped in either direction
- Mechanical installation required
- 178 mm thick
- Designed to current BS EN standard
- Manufactured to 3 or 3.3 m length

Uses for Diagonal slats

- On slurry channels or tanks
- Heavier tractor loadings

Slat Type	Loading	Length	Width	Height
Diagonal	4/6 tonne	3000mm	1200mm	178mm
Diagonal	4/6 tonne	3300mm	1200mm	178mm

Design & Quality Assurance provisions

- Design certificates available for your building warrants
- Concrete design certificates supplied
- Concrete strength cube reports available upon request
