

Feed troughs- Tibbers & Standard

Two types of feed troughs manufactured, Tibbers and a Standard double trough, lengths up to 3000mm long. Tibbers trough has a high and low side, this is ideal for feed wagons. Our standard trough is for feeding from both sides.

Design Features

- Free standing or can be fixed down
- Easy to move with a forklift
- Available with end unit
- Both types are suitable for use with feeder wagons.
- Designed to current BS EN standard
- Mastic sealant material supplied for joints

Uses for Feed troughs

- Tibbers troughs ideally suited to feed passages or outside of shed.
- Standard trough where cattle feed from both sides
- Outside feeding areas.
- Both troughs are suitable for use with forage wagons.

Design & Quality Assurance provisions

- Design certificates available for your building warrants
- Concrete design certificates supplied
- Concrete strength cube reports available upon request
