Screed Sledge

The SPE Screed Sledge offers the flooring contractor a simple solution for laying a consistent bed of screed material. Mixed material is fed into the hopper box and the sledge is pulled across the floor. The thickness of material being layed is varied by setting the adjustable depth gauge.

Part No.	Description
SS-24	Screed Sledge 24"/600mm
SS-30	Screed Sledge 30"/750mm

Polyethylene Mixer Drum

Part No. 6050

Standard concrete mixers fitted with steel drums invariably end up covered in concrete and badly misshapen due to the contractor trying to clean the mixer after the concrete has set. The SPE heavy duty replacement drum instantly solves this problem providing the following benefits.

Features:

- Easy to clean
- Long life
- Lightweight dent free construction
- Can be recycled
- Available in company colours
- Facility to insert customer logo
- Permanent colour
