### Series 04.040.916

Valve body: PPE

Valve body: PVDF

Valve body: Stainless steel

### Characteristics

- Direct acting
- Protection type IP 68 using cable, respectively IP 65 using connector
- Normally open (NO)
- Potted coil
- Coil system protected against corrosion by separation to medium by membrane
- Optional valve body made of PVDF or stainless steel and FKM membrane for higher resistance to chemicals
- Optional flush spout on valve body
- Long term performance capability
- Maximum medium temperature 98 °C (208 °F)
- No minimal pressure required
- Suitable for spray- and jet water
- UL approved versions available
- High operating safety by the use of high quality materials and 100% final testing of the products

### Description

2/2-way direct acting dump valve of nominal diameter DN 40 for controlling low aggressive media, such as cleaning or disinfection agents, direct acting with normally open operation mode NO (normally open).

Valves of this type are medium separated having a single chamber valve body with the inlet at ninety degrees to the outlet. They can be manufactured in various materials and equipped with threaded or hose connections. Electrical operating safety is achieved by insulation class F and supported by an integrated protective circuit.

Protection type IP 68 is achieved in conjunction with cable connection, IP 65 by using a mounted connector.

Valve housing made of PPE or stainless steel are suitable for hot water. Valve housing made of PVDF have a higher resistance to chemicals where stainless steel has both features.

The smooth internal shape improves liquid flow and avoids dirt traps. The valve bodies can be equipped with an additional flush spout.

### Applications

- Industrial washing machines and dishwashers
- Cleaning devices for medical equipment
- Cleaning and disinfection systems in the dairy industry and process engineering

Typical performance curve

**Series 04.040.916**

**Optional flush spout**

Valve body: PPE

Valve body: PVDF

Valve body: Stainless steel

Thickness of the mounting flange for all valve bodies: 5 mm (0.197 in)

**Technical Data**

<b>Type</b>	Drain valve	
<b>Construction</b>	2/2-way-solenoid valve, direct acting	
<b>Function</b>	NO (normally open)	
<b>Fitting position</b>	Solenoid pointing upwards	
<b>Media</b>	low aggressive media, such as cleaning or disinfection agents within potable water	
<b>T-Medium</b>		
<b>PPE</b>	98 (208)	°C (°F) max.
<b>Stainless steel</b>	98 (208)	°C (°F) max.
<b>PVDF</b>	50 (122)	°C (°F) max.
<b>T-Ambient</b>	60 (140)	°C (°F) max.
<b>DN</b>	40 (1.575) mm (in)	
<b>p-Operating</b>	0 - 120	mbar (psi)
<b>Coil type</b>	MS.010 integrated protection circuit (high voltage peak limitation) and rectifier	
<b>Nominal voltage</b>	12	V DC
	24	V DC
	24	V AC/DC *)
	110	V AC/DC
	200-240	V AC/DC
	400	V AC/DC
<b>Voltage tolerance</b>	±10%	
<b>Duty cycle</b>	100 % 50 % of 10 min. at 400 V AC/DC	
<b>Nominal power</b>	24	W
<b>Protection Type</b>	IP 68	With cable according to EN 60529
	IP 65	With plug socket according to EN 175301-803
<b>Insulation class</b>	F	According to EN 60730
<b>Protection class</b>	I	According to EN 60730 (for incorporation in class I)

**Materials**

<b>Valve body</b>	PPE, PVDF, stainless steel
<b>Plunger guide</b>	Stainless steel
<b>Plunger and spring</b>	Stainless steel
<b>Flush spout</b>	Stainless steel
<b>Membrane and sealings</b>	EPDM FKM
<b>Coil coating</b>	PBT PU potting

The combination of stainless steel valve body and FKM membrane is particularly recommended for use in sterilization and disinfection equipment.

\*) Exception:

Depending on the required connection type, the rectifier for version 24 V AC/DC is located within a grey plug or within a sealed housing in line with the cable.

	<b>KL</b>
<b>Standard cable length (IP 68 only)</b>	1000 mm (39.370 in)
Other cable length on request
