#### **Characteristics**

- proportional behaviour(flow depends on position of float lever)
- servo-controlled
- operation largely independent from inlet pressure
- easy to assemble and service
- compact design
- suitable for heated water up to 90 °C
- floater adjustable
- different lever dimensions available (on request)
- high operating safety by the use of high quality materials and 100% final testing of the products

#### Series 21.017.126

#### Description

Servo-controlled valve nominal diameter DN 17, which closes by means of buoyancy of a floater to control level in tanks.

If liquid is drained from the tank, the float valve refills automatically and closes when the maximum level has been reached.

While water level and floater rises, the flow into the tank is throttled proportional to the levers position.

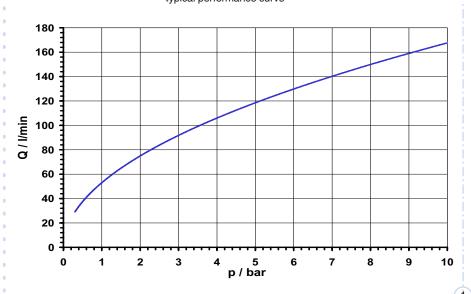

An overflow of small tanks will be prevented during the initial filling.

Valves of this design are single chamber straight valves with a glass fibre reinforced polyamid elbow nozzle as outlet.

# **Applications**

- tank filling
- high pressure cleaning devices (system separation according to EN 1717)
- washing systems
- irrigation systems
- industrial appliances

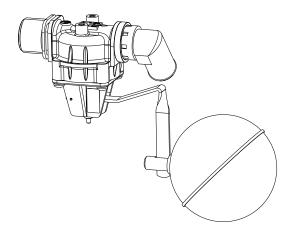

### typical performance curve

#### Series 21.017.126

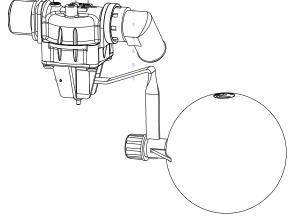

Float ball: stainless steel Tm: 90°C

# Technical Data

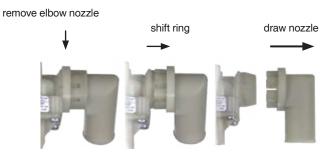

Туре	float valve		
Construction	2/2-way single chamber straight valve, elbow nozzle as outlet, servo-controlled		
Function	closed by buoyancy of floater		
Fitting position	floater pointing downwards		
Media	cold and heated potable water and physically and chemically similar media		
T-Medium	90	°C max. stainless steel	
	60	°C max. PPH	
T-Ambient	as per T-Medium		
DN	17	mm	
p-Operating	0,3 - 10,0	bar	
Cv-value	53	l/min	
Flow regulator	on request		
Float ball	position adjustable		

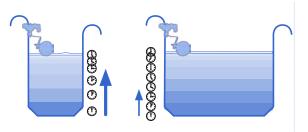

Float ball: PPH Tm: 60°C

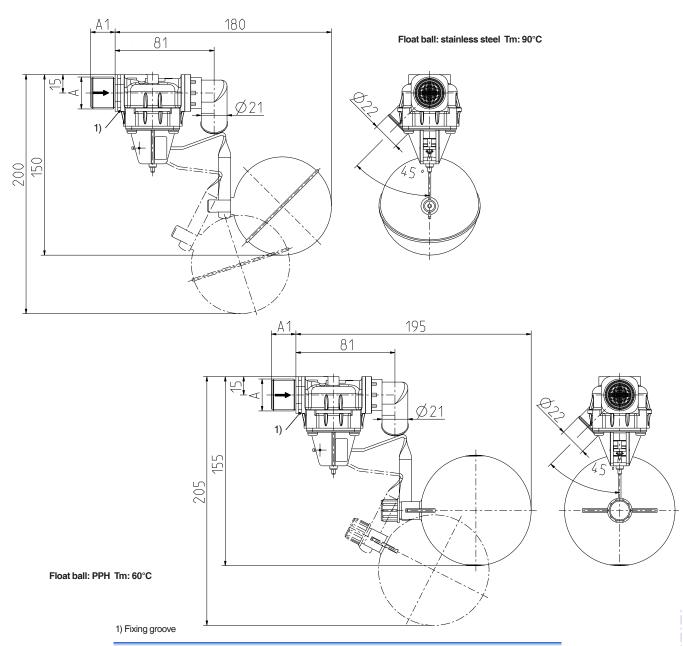

rise speed of water level
