GAS ANALYSERS

PA 7.0 for O_2, CO_2 or O_2/CO_2

NEW

PA 7.0 S

Compact analyser for the monitoring of protective atmospheres in food packaging (MAP) and welding. For continuous analysis (in-line) and also intermittent sampling via a needle e.g. from food packs. A flexible analyser to guarantee quality and productivity of production processes.

Whenever you need a record of your measurement this instrument together with the exclusive OBCC-Software is the solution.

Provide your customer with the results proving that your product has the best possible quality.

Benefits

- new operation by touch panel
- large illuminated graphic display
- Interfaces on front: mini SD and mini USB port
  - update possibility
  - data transfer via mini USB
- minimum sample gas required for analysing of smallest volumes (e.g. food packing)
- fast measuring results of sampling
- integrated data logger for the last 500 measurements
- assignment of measurements to different product names, users and product lines

- multilingual menu guide: German, English, French, Italian, Spanish, Dutch, Swedish, Finish, Polish, Hungarian, Romanian and Turkish (more to come)
- system errors or exceeding of set limits trigger an alarm and switch a potential free contact (e.g. to shut down machinery to avoid quality problems)
- splash-proof and robust housing
- interface for transfer of logged data

Options

- software OBCC for recording of results incl. data cable (see separate data sheet)
- separate table printer for instant documentation

Other models, options and accessories available on request.

Please identify the individual gases at the time of enquiring!
