“Ordering lost keys was easy. The replacement key number was on the front of each lock.

We just made a list of the missing locker keys, emailed the list to sales@lockdoctor.biz and we recieved them all the following day.”

ABOUT OUR SERVICES

Most people think of their high-street key cutters when they need a new key. But what do you do if you don't have a key to copy from? What do you do if you cannot get out to the high-street?

Nearly 50 years ago our grandfather set out to develop a service that could provide customers with replacement keys by mail order. He pioneered a way of replacing keys for lockers and office furniture whereby the customer did not need to be present and all that was needed was the number on the lock-face.

This resulted in a system that has become renowned throughout the UK for its speed and efficiency. Latest production techniques and new technology means that we can produce high volumes very quickly.

Today our computers cut most of the keys, but we are still very committed to working carefully and accurately according to traditional values. It can get really intense some days when there are hundreds of keys to cut or locks to assemble but we have a dedicated team who are proud to serve you.

We are proud of our reputation for excellent customer service.
