

Project name – Admiral’s Quay Ocean Village

Market sector - Commercial

Geographic Sector – Southampton

Project details

In January 2012 planning permission was granted for the Admiral ‘s Quay Development. The site had remained redundant for quite some time until this mixed use development was given authorisation to proceed.

Based on Southampton’s prestigious waterfront the development when complete will consist of residential high rise luxury flats and eight new restaurants.

The development is being built by Warings Contractors Ltd – a Bouygues Construction Group Company.

Admiral’s Quay, Southampton Waterfront

Project overview

GDL supplied 177 of our 30mm Weather Louvres to client Warings Contractors Ltd in a variety of colour specifications and sizes to suit their specific aesthetic requirements for the residential development.

Our range of aluminium Louvres offer excellent functionality allowing the necessary ventilation requirements, rain defence and aerodynamic performance yet remain architecturally pleasing.

As with this project we offer our Louvre systems in a variety of shapes, configurations, paint finishes and coatings to meet the requirements of almost any project types.

Benefits of using GDL Products to the project

- GDL’S manufacturing capabilities means that we can meet the clients specific aesthetic requirements for the project whilst maintaining excellent functionality, the necessary ventilation requirements and rain defence.
