

## Secured Cycle Rack is a Winner

Jtech Services are very pleased to be working along with Spanish manufacturer Semab to supply and install their exclusive range of cycle storage systems.

The problem is straightforward, where to put your bike whilst you go to your appointment. There are many solutions on the market, all of them perfectly fine, but when offered the choice such as on the street shown below there is a natural inclination to use the Semab system.

It could be the evident built in security, meaning that your bike will be safer, it could be the fact that you don't need to bring all that safety paraphernalia like chains and locks etc or maybe that it just looks like it can do the job securely.

Why not take a closer look at the Semab range for your next cycle storage project?
