171250	5000 Litre Static Tank	3038 x 1595 x 1550

Water is essential for farming and many other uses, yet is often taken for granted. Rainwater harvesting is a way of reducing your reliance on mains water; making use of the rain that falls on your buildings can save you money, plus rainwater is:

- Best for irrigation as it doesn't contain treatment additives such as chlorine.
- Better than mains water for spraying some crop protection products

Enduramaxx horizontal static rainwater tanks are designed for low profile water storage and are manufactured for uses throughout the agricultural, commercial, domestic, horticultural, industrial and irrigation markets.

- Manufactured from UV stabilised polyethylene
- Guaranteed one-piece moulded construction makes them tough and durable.
- Ribbed design provides added strength and an attractive appearance
- Enduramaxx rain water tanks do not rust or corrode and are impact resistant
- All tanks are backed with a solid warranty
- WRAS Approved Polymer

# VERTICAL RAINWATER TANKS

**SPECIAL  
OFFERS  
ON 5,000,  
10,000 &  
20,000 L  
TANKS**

Enduramaxx manufacture a range of Vertical Rainwater tanks from 500 to 30,000 litres, including slim line versions which can be interlinked for even greater storage capacity. These vertical tanks are for collecting rainwater from your roof. By using rainwater filters and a rainwater tank for water catchment and storage, roof rainwater is not only a free resource but can be used for a multitude of purposes including private domestic usage such as washing machines, toilet flushing, and garden watering. All our tanks come with a full 10 year warranty!

Capacity Litre	Capacity Gallons	Diameter (mm)	Height (mm)	Standard Outlet
500	110	700	1500	1.5"
720	158	700	2150	1.5"
