I72250	22000 Litre Tank	3450 x 2600
I72255	25000 Litre Tank	3450 x 3000
I72260	30000 Litre Tank	3450 x 3650

Water is essential for farming and many other uses, yet is often taken for granted. Rainwater harvesting is a way of reducing your reliance on mains water, making use of the rain that falls on your buildings can save you money, plus rainwater is:

- Best for irrigation as it doesn't contain treatment additives such as chlorine.
- Better than mains water for spraying some crop protection products

Enduramaxx vertical rainwater tanks are designed for low profile water storage and are manufactured for uses throughout the agricultural, commercial, domestic, horticultural, industrial and irrigation markets.

- Manufactured from UV stabilised polyethylene
- Guaranteed one-piece moulded construction makes them tough and durable.
- Ribbed design provides added strength and an attractive appearance
- Enduramaxx rain water tanks do not rust or corrode and are impact resistant
- All tanks are backed with a solid warranty
- WRAS Approved Polymer
