£10,000

Datex-Ohmeda Aestiva/5 Anaesthesia machine fitted with 7900 'Smartvent' Ventilator, interfaced with S/5 15" flat screen monitoring.

The system has been completely re-conditioned by an ex-Datex Ohmeda Engineer and comes with 4.5 software.

The Aestiva/5-7900 with advanced ventilation provided by the 7900 'Smartvent' with its sophisticated ventilation capabilities that support the needs of a broad patient range.

It benefits from an integrated breathing system, which helps protect the components from damage and disconnection. Smart Sensors and Switches link communication between circuit and the 'Smartvent' Ventilator.

The 'Smartvent' Ventilator is fitted with 4.5 software providing both volume and pressure mode ventilation. The machine is fitted with both O₂, N₂O, and Air medical pipeline hoses and cylinder back-up and twin vaporizer manifold.

The system is interfaced with S/5 Patient Monitoring incorporating a 15" Flat Screen display with remote key pad.

It comes with F-CU8 Module frame housing M-CAIO Module and M-N12ESTPR Module providing the following parameters:- CO₂, N₂O and O₂ measurement, 5 Agent Monitoring, Agent Identification, (12 Lead, 5 Lead, 3 Lead) ECG, NIBP, Invasive Pressures, Temperature, SPO₂, Respiration.

The system also comes with a complete set of new Patient Leads. Also in with the package would be a further 2 Aestiva Systems that could be used for Spare Parts only. The spare parts could be left on the Aestiva Systems or removed to suit the buyer
