

Pneumatic double diaphragm pump

Innovative and versatile in use

Cobra 40-10

The new unique diaphragm technology from WAGNER makes the Cobra 40-10 the ideal unit for materials sensitive to shearing and moisture.

● Compact

Stable, integral pressure regulator unit shut-off / air relief valve, pressure regulator, pressure gauge. You always have the power completely under control.

● Unique

The pneumatically operated high pressure pump works with extremely low pulsation and thanks to the diaphragm technology need no packings or wiper rings.

● Reliable

No lubrication or adjustment of packings. Because it is built without packings the Cobra 40-10 is particularly easy to maintain.

Cobra 40-10

Due to its vertical operation with **material feed directly from the container** it is ideally suited to large projects.

The 5 litre top reservoir is ideally suited for the application of small quantities
Thanks to the ease of **cleaning, fast colour changes** are possible at any time.

Precisely adjustable air flow thanks to the integral AirCoat regulator. The pressures at any time can easily be read off from the pressure gauge.

The tungsten carbide inlet valve depressors provide easy handling and high **operating reliability**. One press of the thumb and the valve is free.

Due to its low weight of 23 kg and the stable metal frame the Cobra 40-10 is **compact and manageable**. It can be used anywhere, quickly and flexibly.

Ex This equipment is suitable for use in potentially explosive areas in accordance with the guideline 94/9/CE (ATEX 95).
