

LineCoat 800

Thanks to the adjustable height of the telescopic handle the unit can be adjusted to the **comfortable working height** in every case.

The large pneumatic tyres provide optimal floor grip and directional stability.

For **maximum precision** and precise adjustment the gun arm can be locked in the desired position. The setting is also retained for template work and other Airless jobs.

For this the gun can be removed from the carrier **without tools**.

The new trolley geometry makes the unit particularly compact and manoeuvrable. The unit can be stowed away in a car for transport.

With the flexible suction system the material is drawn in directly from the packaging. No decanting necessary.

The **powerful 4.5 HP** Subaru engine is easy to start and is ready for use at any time.

The locking and unlocking of the bogie wheel allows **precise setting** for curves, radii, circles and straight lines.

LineCoat 800 Spraypack

- Basic unit on trolley inc. flexible suction system
- + HP hose DN6-ND230, 1/4", 15 m
- + AG 08 Airless gun, special
- + TradeTip 2 nozzle holder
- + TradeTip 2 nozzle – LineFinish 1708

Order Ref. No. 0528 138

Technical Data	LineCoat 800

AIRLESS PISTON PUMP

The entry level class of hand guided marking units

LineCoat 800

The petrol powered LineCoat 800 marking unit is ideally suited for the economical marking of smaller to medium sized areas indoors and out.

**Quality
Offensive!**

- **Simple**
Extremely simple operation and handling make the LC 800 the perfect entry level model.
- **Profitable**
The marking unit allows the economical treatment of smaller to medium sized areas.
- **Compact**
Thanks to its compact build and the new frame geometry the LC 800 is extremely manoeuvrable and flexible compared to other marking units.
