UVG SINGLE KIT

UVG DOUBLE KIT

- The Labino<sup>®</sup> Torch Light<sup>UVG3</sup> is a small-sized, lightweight, UV-A LED flashlight designed for quick inspections in “hard-to-reach” spots and where the amount of visible light from the LED is critical. A high quality white light filter<sup>1</sup> reduces the transmission of white light from the LED and also minimizes the reflection from the surface which is illuminated with UV.
- The lamp measures 15.9 cm long (6.3 inches) and weighs 211 gram (7.4 oz), battery included.
- The Labino<sup>®</sup> Torch Light<sup>UVG3</sup> produces a variety of ultraviolet beams ranging from 20 000  $\mu\text{W}/\text{cm}^2$  to 2 000  $\mu\text{W}/\text{cm}^2$  at a distance of 38 cm (15 inches), depending on your choice of Spotlight, Midlight or Floodlight beam.
- The Labino<sup>®</sup> Torch Light<sup>UVG3</sup> contains one (1) ultraviolet light emitting diode (LED). The LED creates UV light that peaks at 365 nm making it suitable for industrial, leakage and security applications.
- Full power is reached instantly. The on/off button is positioned in the back of the lamp to prevent accidental activation.
- At full charge the battery provides up to 3 hours of use. Recharge from a normal outlet or vehicle with included chargers. Each kit also includes an extra battery.

- **DESIGN YOUR OWN DOUBLE KIT:** You can design your own double kit with two UVG torches by including your choice of two UVG3 torches or 1 UVG3 and 1 UVG2 or 1 UVG3 and one white light.
