

Labino UV Light

"I HAVE NEVER SEEN ANYTHING LIKE IT"

"The crime scene was illuminated with high intensity UV light and three fluorescent spots were found. The spots were in the form of ice blocks (frozen liquid) in the snow. We secured the lumps of ice by breaking them loose from the snow and store them in the freezer in the police car. After melting the frozen liquid and securing it on tops, it was sent off to the laboratory. Actually I was amazed that it worked. I never thought that you could distinguish sperm from the snow with the help of high intensity UV light. And there was no doubt – the fluorescence was incredibly strong and clear. I have never seen anything like it. The rapist was convicted and sentenced."

Birgitta Jansson, Crime Scene Investigator, Karlstad, Sweden

TrAc Light Spotlight

UVG4-Head Spotlight

A small-sized, lightweight, UV-A LED Head Lamp designed to release the user's hands during inspection. The lamp is available as Spotlight and Midlight.

BigBeam DUO Midlight

Known to be the best UV LED Lamp on the market, due to the fact that the light emitting diodes emit a beam of light that is extremely evenly distributed and very smooth. The lamp is available as Midlight and Floodlight.

"OUR FORENSIC SCIENTISTS CONDUCTED A SERIES OF TESTS AND PREFERRED LABINO"

"The Swedish police have introduced a new working tool called MärkDNA. The most important part here is that police officers in external services have access to a durable UV lamp that works both in daylight and in darkness. One requirement is also that it can scan large areas at a distance. Our forensic scientists conducted a series of tests of different models and preferred a field lamp from Labino."

Anders Burén, Detective Superintendent, Stockholm, Sweden

UVG2 Spotlight

Labino Search Light

UVG White

A small, lightweight and powerful white light torch light for general search – used by police all over the world.

"SUPERIOR SEARCHLIGHT FOR TRACES, TRACKS AND PRINTS"

"The lamp outlines shoeprints at oblique angles better and at a significantly longer distance than normal white-light lamps. It was easy to take along, and its superior light quality makes it an excellent choice as a search light and when searching the ground for prints and evidence. It is also unbeatable in providing general lighting at fire scenes. The lamp was used during an extended search outdoors in harsh weather conditions, which included cold temperatures, wind and rain. The lamp provided phenomenal lighting in the dense forest and was also easy to carry during the search." *Crime Scene Investigator, Peter Andberg, Technical division of Stockholm's western police district, Sweden*

TrAc Light White Spot

LABINO AB is one of the leading manufacturer of UV and White Light products as well as Alternative Light Sources, and distributes globally. Our forensic science products are widely used within all security applications by the police, crime scene investigators, forensic experts and laboratory technicians.

Deciding what Light Source to use to achieve the best result in finding traces at the crime scene is an art. It takes years of experience to learn what light to use depending on the occasion – it's not an exact science. Therefore Labino makes it possible for each user to put together his own unique ALS Kit. No crime scene looks the same. No crime scene investigator uses the same method, but we can all share experiences and learn from each other. Therefore Labino offers professional training in using light at the crime scene. All our training is held by Crime Scene investigators. Please contact your Distributor for more information about the Labino product range and our training sessions.

Crime Scene Investigation

WITH LABINO

UV Lights | Search Lights | Alternative Light Sources

Labino Nova Torch Kit

SMALL AND LIGHT

The Labino Nova Torch is a cordless battery operated torch light based on the LED technology. The kit consists of eight high intensity alternate forensic light sources for crime scene investigation and laboratory use. The LEDs emit a beam of light that is “evenly” distributed and the torch can be operated for 3 hours. Its compact size and low weight makes it easy to work with. The kit is supplied with tripod for hands-free operation and camera filters for photographing. Nova Torch Lights are available individually or as cased sets.

HIGH PERFORMANCE AND EXCELLENT FEATURES

There are Nova Kits in use by police forces ranging from small City Police Departments to counties, state and special crime scene forces all over the world. From South Africa to France, from China to Germany, from Russia to northern Sweden. The high performance and its excellent features, in combination with a compatible price, makes it very attractive. We get feedback from the users confirming its positive performance i.e. that they are impressed by the range of the different light sources and spectrum as well as the intensity and the homogeneous light, and also that it's equal or better than other crime lights on the market and that the cost benefit ratio is perfect.

INCLUDED IN THE LABINO NOVA TORCH KIT

8 LED Torches, 4 goggles, 1 tripod, 1 car charger, 2 battery chargers, 10 lithium batteries, carrying case, 3 camera filters with 8 adaptors (49-77 mm) to fit all camera lenses.

Labino Astra Torch Kit

MOST POWERFUL LED ALS & D CELL COMPATIBLE

The LED based Astra Torch offers 6 different coloured heads and 1 UV head. You are free to combine your own unique ALS kit and add as many different heads as you like. The torch can be operated with 3 normal alkaline batteries, in case you run out of battery using the included lithium battery. Its compact size makes it easy to work with and with an instant start function you get full power immediately. The Astra Torch is one of the most powerful LED lights available on the market.

“I WAS IMPRESSED BY THE ASTRA TORCH IN EVERY ASPECT”

“The Labino Crown Jewel is the Astra Torch. Wow, is all I can say. I was impressed in every aspect. Size, illumination, power, beam, weight. I thought given the power its putting out, the battery would go quickly but that wasn't the case. This powerful piece of equipment belongs in every Crime Scene Investigators vehicle.”

Ross M. Gardner worked for the United States Army Criminal Investigation Command for nearly twenty years. He retired as a Command Sergeant Major and Special Agent in 1999. He subsequently served four years as the Chief of Police for the City of Lake City Georgia. Today he is active in independent consulting.

“IT WAS AWESOME”

“I had two homicide scenes last week and used the Astra Torch on both calls. There was a gang shooting in the middle of the street. Patrol, approximately 5 officers, located 3 fired cartridge casings. Two detectives located 5 additional fired cartridges. With the white head attached I was able to locate 2 additional fired cartridges that 7 police officers with standard flashlights missed! It was awesome.”

Celestina Rossi, Senior Crime Scene Investigator, Montgomery Sheriff's Department, Conroe Texas, USA

INCLUDED IN THE LABINO ASTRA TORCH KIT

1 lamp body and 7 LED heads, 4 goggles, 1 tripod, 1 battery charger, 1 lithium battery, 1 carrying case, 3 camera filters with 8 adaptors (49-77 mm) to fit all camera lenses.

Labino TrAc Finder

MOST POWERFUL ALS AND LARGE LIGHT BEAM

The TrAc Finder is the most powerful ALS lamp with the widest light beam available on the market. The TrAc Finder meets the needs of criminal investigators who need an intense ALS that has a wide light beam and easy-to-change filters. The TrAc Finder is composed of both a crime kit and a lamp. Both are purchased separately which allows maximum flexibility and choice for the user.

“NOTHING IS OVERLOOKED WITH TRAC FINDER”

“Finding evidence in the identification process is fast, thanks to the work of TrAc Finder, a crime kit from Labino. Nothing is overlooked. Not a single detail – a spot of blood traces on clothing, hair or a drop of saliva or semen from a rapist, even a grain of sand or a micro trace. TrAc Finder has allowed several law enforcement agencies and crime labs across the country to act with greater efficiency and speed.”

National Laboratory of Forensic Science in Casablanca, Marocco

INCLUDED IN THE LABINO TRAC FINDER KIT

1 MPXL Lamp, 4 forensic filters, 4 goggles, 1 battery charger, 1 carrying case, 3 camera filters with 8 adaptors (49-77 mm) to fit all camera lenses.
