ACE Group “Helping You make Informed Decisions”

Who are ACE

ACE opened for business in November 1993 to provide inspection services to Mechanical Breakdown Insurance Companies in the UK and since then has spread to include Leasing Companies, Finance Houses and Legal Advisors. We have completed approximately 100'000 inspections in the last 6 years.

We are one of the leading Independent Consulting Motor Engineers in the UK dealing with most, if not all, vehicle examination needs and requirements. We have engineering consultancy resources across the UK and our services include general and specific types of examinations on cars and commercial vehicles. We provide a “one-stop” facility for our Clients for information and guidance. We have available resources and work closely with forensic science labs; oil and fuel labs and metallurgist were necessary.

*We can confirm that the Engineering Consultants that we utilise are fully qualified by both experience and carry appropriate qualifications and, due to the wide diversity of Engineers at our disposal, an appropriate Engineer can be assigned with suitable accreditation. Our overall aim will be to provide an effective tool for our clients of a highly professional nature and to provide advice and assistance as required. **You have our Word***

[Made with Xara](#)

Our total aim and commitment of our service is to provide a “second-to-none” inspection service throughout the UK and to work with the highest levels of integrity and honesty.

- ***Comprehensive Support Team.***

ACE Solutions Training is an industrial training provider and was set up in order to give a training provision to the Industry and to specialise in LGV driver training. We have in-house or on customer site examinations and direct certification for Fork Lift Truck handling, manual handling and on going programmes for Warehousing and Certificate Of Professional Competence. Over the years we have been very successful thanks to our valued client companies. We have developed our training skills and now include Airport Security, NVQ Assessment, Manual Handling and preparation of reports and action plans for clients in matters concerning Area Traffic Commissioner Inquiries into operator's license investigations.

The company is fully approved by Oxford and Cambridge (RSA), and hold accreditation with ITSSAR; our systems are regularly monitored in order to maintain standards and consistency. All employed staff not only have many years of occupational competence in the field but also hold appropriate qualifications. Those involved in assessments all hold TDLB D32 D33 and D34 as a minimum. We are members of the Road Haulage Association (RHA). The day-to-day management of training programmes is the responsibility of Mr George Farndale.

Why not try us for high standards and realistic pricing?
