PL-221

TOP & BOTTOM LABELING MACHINE

Specification

- Supply Voltage: 220/110 VAC-50/60 HZ 1 phase
- Power Consumption: 825 VA
- Dispensing Speed: 40 m/min max.
- Conveyor Speed: 40m/min max.
- Applicator Height: 150mm / 200mm
- Label Size: 150mm x 300mm max.
- Conveyor Width: 160mm
- Spool Diameter: 76mm
- Dimension: 1620mm (L) x 900mm(W) x 1500mm(H)

PL-221

TOP & BOTTOM LABELING MACHINE

As part of Pack Leader's impressive portfolio of high-quality, versatile labeling machines, the PL-221 labeling system eliminates any unnecessary complexities from top and bottom labeling applications—making your labeling jobs simpler and more efficient.

Distinctive Design

The PL-221's dual-head design is what makes this machine an exceptional choice for simplifying top and bottom labeling jobs. With both labeling heads working simultaneously, this machine enables you to label your product in a single pass.

Simple to Use

The built-in operating instructions and trouble-shooting guide offered on the operator interface, as well as hand wheels that provide for simple adjustments, enable quick set-up and easy changeover.

Made to Last

In strict compliance with Good Manufacturing Practices (GMP) standards, the PL-221 is made of 304 stainless steel and anodized aluminum, and carefully treated to guard against the effects of harsher environments. This durability translates into a solid choice for labeling machine longevity.

Flexible

- For diverse product sizes and shapes, the PL-221 product sensor can be adjusted for various applications. With the manual position setting, your labels are placed accurately on the product, each and every time.
- The hot-foil printer controls allow for future upgrades if the need for a hot-foil printer arises. This integrated feature allows the hot-foil printer to work in sync with the labeler to ensure accurate code placement. The result is simplified label customization, which can easily be turned off or on.
- Depending on your needs, this machine can be used either for in-line automatic or semi-automatic applications.

Productive

- The Production Preset function enables the machine to automatically stop once the pre-set quantity of products has been labeled.
- The Label Countdown feature allows you to see precisely how far along the project is as the production run progresses.
- The Container / Production Run Counter provides the total production number for the day.
- With the Touch-Screen Control System with Job Memory, you benefit from a battery-free microprocessor control system that can maintain default settings and memory even after the machine sits idle for a long period of time.

Practical

- The PL-221 can easily and conveniently be moved to other production areas to allow for changes in production or products.
- The durability inherent with the PL-221 is due to its being made from 304 stainless steel and anodized aluminum, specially treated to guard against rusting and other effects from the harsher environments.
- The machine's height adjustable conveyor affords you exceptional convenience and flexibility.

Compliant

The PL-221 is manufactured in compliance with Good Manufacturing Practices (GMP) standards, and according to strict ISO 9001 quality control procedures. Pack Leader's compliant labeling machine gives you a high comfort level as you undergo the required quarterly inspections from industry compliance auditors.
