

PRO-225

TOP & BOTTOM LABELING MACHINE

Specification

- Supply Voltage: 220/110 VAC 50/60 HZ 1 phase
- Power Consumption: 880 VA
- Dispensing Speed: 40 m/min max.
- Conveyor Speed: 40m/min max.
- Applicator Height: 170mm / 230mm
- Label Size: 170mm x 300mm max.
- Conveyor Width: 160mm
- Spool Diameter: 76mm
- Dimension: 1835mm (L) x 800mm(W) x 1360mm(H)

PRO-225

TOP & BOTTOM LABELING MACHINE

Pack Leader's PRO-225 Series labeling machines are ideal for those who desire a modular labeling machine that can be customized according to evolving business needs. As part of the PRO Series, the inline PRO-225 is a top and bottom labeling machine that includes a broad selection of upgradeable options, while affording you both speed and simplicity.

Adaptable

Applying labels to the top and bottom of products is built into the inline PRO-225's two-side apply design. True to Pack Leader's commitment to flexibility and choice, this machine can also be configured for just top or just bottom apply.

Simple to Use

With the ability to easily make adjustments to the machine's settings, the PRO-225 enables you to change production runs quickly and simply—which means greater efficiency and quality control for you.

Easy to Upgrade

The PRO-225's modular design allows you to upgrade its capabilities as your needs evolve. Whether you have a custom product application or changes to your existing product, you simply upgrade the machine to accommodate your new requirements.

Made to Last

In strict compliance with Good Manufacturing Practices (GMP) standards, the PRO-225 is made of 304 stainless steel and anodized aluminum, and carefully treated to guard against the effects of harsher environments. This durability translates into a solid choice for labeling machine longevity.

Flexible

- Regardless of bottle size or shape, the PRO-225's product sensor is easily adjusted for various applications. With the manual position setting, your labels are placed accurately on the product, every time.
- The machine's flexible label heads tilt on x-y axis for tapered or shaped products.
- If needed, the synchronized hot-foil printer controls allow the hot-foil printer to work in sync with the labeler to ensure accurate code placement. This integrated feature simplifies label customization and can easily be turned off or on.
- Depending on your needs, this machine can be used either for in-line automatic or semi-automatic applications.

Efficient

- The Auto Label-Set feature confirms label sensitivity by detecting the separation between each label. With one push of a button, the bottle labeling is automatically set up correctly.
- The Missing Label-Detect feature detects missing labels on the roll stock, and instantly shuts the machine down if one is found. This preventative feature ensures each product is labeled appropriately.

Accurate

- By essentially counting the "steps" necessary to reach the next label, the PRO-225 stepper motors provide fast, accurate label delivery.
- The Auto-Length Set feature ensures accuracy.
- With the machine's fully synchronized controls, all components run at the same speed.
- 360-degree touch-screen controls allow the PRO-225 to be controlled from any position.

Productive

- The Production Preset function enables the PRO-225 to automatically stop once the pre-set quantity of products has been labeled.
- The Label Countdown feature allows you to see precisely how far along the project is as the production run progresses.
- The Container / Production Run Counter provides the total production number for the day.
- With the machine's Touch Screen Control System with Job Memory, you benefit from a battery-free microprocessor control system that can maintain default settings and memory even after the machine sits idle for a long period of time.

Practical

- The PRO-225 can easily be moved to other production areas to allow for changes in production of products.
- Slide-out controls and electronics stored in its cabinets enable quick, easy servicing of equipment.
- The machine's height-adjustable conveyor affords you exceptional convenience and flexibility.
- With a stainless steel and anodized aluminum design, the machine is exceptionally durable and can withstand a wide variety of environments.

Compliant

The PRO-225 is manufactured in compliance with Good Manufacturing Practices (GMP) standards, and according to strict ISO 9001 quality control procedures. With Pack Leader's compliant labeling machine, you gain a high comfort level as you undergo the required quarterly inspections from industry compliance auditors.
