Can offer a range of Accelerometer, Vibration and Inclinometers for applications in General Industrial and Military areas.

We have over 40 years experience in making transducers.

We manufacture using a variety of materials dependent upon application that include stainless steel, EN24T, Inconel and Titanium.

We can manufacture Accelerometers for temperature ranges up to 300 deg C with a degree of environmental protection compatible with the environment.

Accelerometer

This can vary from a single coating for OEM units being fitted inside the customers equipment to a hermetically sealed unit.

We will support the customer in designing his specific system.

Acam has a commitment to quality, innovation, service and customer satisfaction.
