Since  
1976

# CATALYTIC CONVERTERS FOR STATIONARY ENGINES

## Oxidation and Three-Way Catalysts for Lowering the Levels of Carbon Monoxide, Hydrocarbons, Nitrogen Oxides (NOx), Formaldehyde and Ethylene in Exhaust Gas.

Agriemach Offer a selection of different Catalytic solutions for both Lean Burn and Stoichiometric Engines. We are able to offer solutions with many different fuel types such as, Diesel, Biodiesel, Natural Gas, Biogas from Waste Water Treatment and Landfill, and offer a wealth of experience in highlighting the challenges with some of these fuels.

Our range of Catalysts Lower the Levels of Carbon Monoxide, Hydrocarbons, Formaldehydes and Ethylene, along with the ability to Reduce Nitrogen Oxides in Stoichiometric applications when specified as a Three-way catalyst.

We are able to offer a solution to meet the toughest limits, along with offering a full bespoke design service in order to make Catalyst integration fit perfectly into your design.

### Applications Include:

- > Power Generation
- > Co-generation
- > Gas Compression
- > Greenhouse (Crop Production) CO<sub>2</sub> Production

### Catalyst Types:

- > Three-way Catalysts
- > Oxidation Catalysts
- > Diesel Oxidation Catalysts
- > Formaldehyde and Ethylene Catalysts

### Features:

- > High Efficiency Catalyst Coatings (Performance Guarantee)
- > Brazed Stainless Steel Metal Sub-Straight
- > Low Backpressure
- > Monitoring Ports as Standard (Check Emissions, Temperature, BP)
- > Full Design Service (Custom Made)

## DESIGN OPTIONS

Dual Quick-Lid

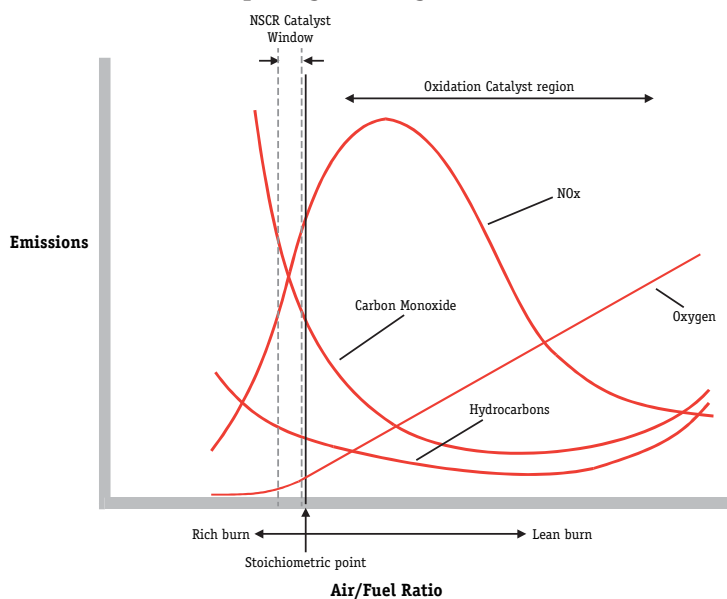

Integrated Catalytic Silencer Design

Rectangular RC™ Housings

### Emission trends for spark ignited engines

Standard Welded Design

Quick Lid™ Design
