NEW PRODUCT**NEW MASS-LABELLED FOSA REFERENCE STANDARD**

The availability of relevant mass-labelled perfluorinated reference standards has allowed laboratories to expand the number of compounds for which they can analyze and also increases the confidence in their reported data. The demand for a carbon-13 labelled perfluoro-1-octanesulfonamide went unanswered for many years due to the difficulty associated with the synthesis of this compound. However, **Wellington** has now prepared a fully mass-labelled FOSA standard, **M8FOSA**, to add to our line of perfluorooctanesulfonamide standards.
