EVO GREEN Spill Control

Recycled natural fibres

Low carbon footprint

Sustainable

EVO absorbent material is manufactured from recycled natural textile remnants, in a unique process.

Sustainable natural fibres are used in place of non-renewable synthetics.

This reduces CO₂

The production cycle of **natural fibres** requires **less energy** than fossil fuel based polypropylene absorbents.

This reduces CO₂

EVO is manufactured in the UK by FENTEX, eliminating shipping from other countries.

This reduces CO₂
