Mrs M - Somerset

"Many Thanks"
Mr M - Somerset

"Thank you for your quick response, it was very much appreciated"
**UK Ltd Co
Shropshire**

"Very many thanks as always"
Mrs P Somerset

For total peace of mind

Each year thousands of sewage treatment systems create public health and pollution problems. This avoidable form of pollution is often the result of poor effluent quality caused by maintenance neglect. When you take out a Wastewater Treatment System Service Plan with Butler-Hall, you can afford to sit back, relaxed in the knowledge that your plant is professionally maintained..

Environment Agency (EA) legislation is in place to ensure standards are upheld. Where pollution is severe, heavy fines can be levied, and in extreme cases a custodial sentence imposed. However, with a Service Plan from Butler-Hall it's a different story.

We care for systems of any age in reasonable working order. When you chose our maintenance cover, you will have the reassurance of our priority customer helpline when you need assistance. We will send out a fully qualified and experienced engineer to carry out the repairs quickly and efficiently.

Why do I need Service Cover?

Mechanical and electrical machinery is liable to failure in one form or another. Sewage treatment plants/pump stations are no exception and, indeed, require careful attention to prevent environmental pollution incidents. If a 'Consent to Discharge' is in place it is a requirement of your consent that the plant is maintained in accordance with the manufacturer's recommendations; normally, a minimum of once per year.

If you are a business owner the last thing you need is an unnecessary distraction. With our Total Care Plan we can manage all of your routine and non-routine plant maintenance. To provide additional reassurance we can provide remote alarm systems using audible and visual signals, wireless links to your house/office or SMS text messages to your mobile phone or directly to our engineers.

For assistance simply call **01373 832289** where you can get immediate advice. If we cannot help to rectify the fault over the telephone we will arrange to visit and repair the unit as quickly and professionally as possible. Or you can e-mail us at: service@butler-hall.co.uk
