

The Endoline 200 Series has become one of the most successful case erector designs in over 30 years of production. Key to the success of the type 227 (self-adhesive tape) and type 228 (hot melt glue) case erectors is the ability to run at speeds of up to 22 cases per minute. There are a number of unique features that combine to make the 227/228 Case Erector extremely efficient, reliable and versatile while handling a wide variety of case sizes and styles.

Features of the 227/228 include:

Dual Opposing Vacuum Case Opening

This unique design feature ensures that each case is opened positively from both sides. It ensures the efficient and reliable opening of cases, and overcomes problems that can be associated with stiff board and glue migration from the manufacturer's joint.

Robust Construction

High quality components, housed in a robust, computer designed chassis allow for minimal servicing. Designed for the rigours of typical end-of-line packaging environments.

Low Cost of Ownership

The Endoline 220 Series of Case Erectors is designed to give you the best possible value for your investment through maximum productivity with minimal stoppage time for problem-solving or case size changes.

Easy to Use

The 220 series is designed with clear access, simple controls and quick to adjust to size changes. The machines are operator friendly and allow for quick and easy size change, cleaning and maintenance to ensure minimal machine down time.

227 & 228

Fully Automatic Case Erectors

OPTIONS INCLUDE:

- Low tape and no tape sensing
- Visual/audible failure alarm
- Low glue sensing (228)

Case Dimensions (mm).

	Length	Width	Height (open)
227/228 Minimum	160	100	150
Maximum	400	300	400

Speed

Up to 22 cases per minute

Pneumatics

5.5 bar 610l/min free air at 22 cases per min (12mm connection)

Electrical Supply

400V 3Ø 50Hz E+N 3A/Phase

Machine Finish

Mild steel, powder coated white (RAL 9010) or stainless steel

Tape Size (Type 247)

Standard: up to 50mm wide
