

## Why buy Contact's drum lifter band ?

### **No Quibble Guarantee:**

If you are dissatisfied in any way with your Contact drum lifter's performance, return it to us, and we will refund you in full.

### **Tested & Certificated:**

All Contact's drum lifting bands are 'CE' marked, fully tested and come supplied with Certificates of Conformity for compliance with Health & Safety regulations.

### **Low Maintenance Costs:**

Utilising a simple yet effective design, Contact's vertical drum lifter band has few moving parts, therefore offering low maintenance and servicing costs.

### **No Drum Damage:**

As opposed to chains which can cause damage and marking to drums, Contact's barrel lifting band uses 50mm wide duplex webbing straps for drum lifting. The soft nature of these straps eliminates any possible drum lip damage and marking which chains can cause.

### **Holds Drums Firmly:**

With a steel girdle and centre clamp, drums are held tightly in place with no risk of falling or dropping.

We hope the above helps demonstrate the quality and safety features of a Contact drum lifting band, and in doing so, welcome the opportunity to supply you with a high quality barrel lifter that will assist in your drum handling operations.
