

Why buy Contact's magnetic sweepers ?

No Quibble Guarantee:

If you are dissatisfied in any way with your Contact magnetic sweeper's performance, return it to us, and we will refund you in full.

Tested & Certificated:

All Contact's forklift magnets are 'CE' marked, fully tested and and come supplied with Certificates of Conformity for compliance with Health & Safety regulations.

Strong Magnetism:

Whether you require a forklift magnet for picking up small ferrous metal such as nuts, bolt and nails, or a larger forklift magnet for picking up heavier pieces of ferrous metal, Contact's magnetic sweepers are designed for the task in hand. Utilising high quality magnets, dependant upon the model chosen, Contact's forklift magnets come in widths of either 100mm or much larger 300mm.

Robust Design:

All of Contact's magnetic sweepers are designed with a heavy duty specification to provide a long service life for many years to come.

Easy Clean:

Whichever model of forklift magnet you choose, Contact's magnetic sweepers are designed so metal debris can easily be removed from the magnetic surface. On Contact's standard forklift magnet, a non magnetised section of the bar allows metal to be easily removed, whilst Contact's heavy duty forklift magnet comes with a unique quick release handle that allows metal to be quickly and safely removed.

Safe Fitment:

All of Contact's magnetic sweepers come supplied with 'T' screw retention, that allows the magnet to be securely fitted to the forklift truck

We hope the above helps demonstrate the quality and features of Contact's magnetic sweepers, and welcome the opportunity to supply you with a high quality forklift magnet to suit your forklift sweeping operations.
