

# Why buy Contact forklift booms ?

## **No Quibble Guarantee:**

If you are dissatisfied in any way with your Contact forklift booms performance, return it to us, and we will refund you in full.

## **Tested & Certificated:**

All Contact's forklift poles are 'CE' marked, fully tested and come supplied with Certificates of Conformity for compliance with Health & Safety regulations.

## **High Quality:**

All Contact's forklift boom attachments are manufactured using high grade EN19T steel, offering strong, durable and long service life properties.

## **Easy Fitment:**

With a 'Drive In' design, Contact's carpet and roll handling booms only require the truck operator to fit the boom. This reduces staff downtime whilst helping to speed up productivity.

## **Reduce Product Damage:**

To reduce product damage when the pole is driven into the core of the roll being handled, Contact's forklift carpet booms all incorporate a leading edge nose cone design. This makes inserting the pole into the product easier with less risk of damage and handling costs.

## **Safe Fastening:**

To secure the forklift boom to the lift truck forks, Contact's carpet booms all come with twin heel retention, locking the carpet pole to the rear of the truck fork.

We hope the above helps demonstrate the quality and safety aspects of a Contact forklift boom attachment, and we welcome the opportunity to supply you with a high quality carpet pole that will assist in your roll handling requirements
