

The JCE range of FPT Flameproof (EExd) Transformers are intended for use in areas made potentially hazardous by the presence of flammable liquids, gases, vapours and dusts (Zone 1, 2, 21 and Zone 22). Certified for Group IIB locations. Our standard transformer range is from 100VA up to 3000VA, all with fused primary and secondary windings.

Variations can be supplied to customer specification, please advise requirements when ordering.

All enclosures are chromate primed and polyester powder coated for increased protection against corrosion in hostile environments.

Materials and Finish

Body & Cover	Aluminium alloy EN AC-42000 (LM25) to BS EN 1706:1998 with less than 0.2% copper content.
Cover Bolts	Stainless steel (18/8)
Finish	Polyester powder coated. Textured black as standard. Other finishes available on request.

Earthing

All enclosures are supplied with a 6mm stainless steel (18/8) internal and external earth stud as standard.

Entries and Thread Standards

Standard thread forms are ISO Metric M20-M90 and are dependent upon the rating of the transformer. NPT can be supplied on request.

Protection Grade

EJB10/15 and Style 'A' flat lid enclosures incorporate a gasket providing Ingress Protection to IP66. All other enclosures are IP54, but can be increased to IP66 with the application of Hylomar PL32/M. Application of a non hardening grease to flamepaths and entries is recommended.

Certification

ISSeP03ATEX029
EExd IIB T5
