North East Time Recorders Limited

ProTime

The smarter plug and play Time and Attendance system for small to medium size organizations.

A true ready to fit straight from the box Time Recording solution.

The smart product for the smarter business

Introduction

Protime is a complete hardware and software clocking on system that fits easily into your business structure and gives you greater control over your staff. Whether it is for a single or multiple clocking terminal operations, ProTime is the ideal solution for your company and its affordable price makes it suitable for any pocket.

Based on the award winning concept that made ProTime undoubtedly the most popular entry level plug and play clocking on system in the market, ProTime was developed to cater for small to medium size companies giving you exactly what you expect from a clocking on system without all the fuss and complexity.

ProTime caters for organizations with up to 100 employees and is available in 2 versions.

- 50 Employees
- 100 Employees

Depending on your preferred method of employee identification, a choice of clocking terminals can be selected within the pack.

- Proximity Card
- Fingerprint
- Ingersoll Rand Handscan
- Face Scan
