

Case Study

Project: Burscough Science College
Product/System: Euro Polymers Warm Roof, Built up felt system
Size/Value: 4,000m²

The works to Burscough Science College involved the application of 120mm insulation & a two layer, bituminous membrane, offering a 25 year guarantee.

The works were carried out, partly in the school holidays & partly during term time. During the works, close co-ordination with the school was required to enable the works to continue even during the exam period.
