What is Infinity fire alarm roll call?

The Infinity Premium system incorporates a fire alarm module that is tied in with your company's fire alarm system. It uses a signal from your fire alarm system that once triggered is capable of unlocking specified doors, printing roll call reports or emailing them.

The roll call is gathered from all your attendance and access data and will be able to tell you who is in the building or not. It can also report on which zones they are currently in.

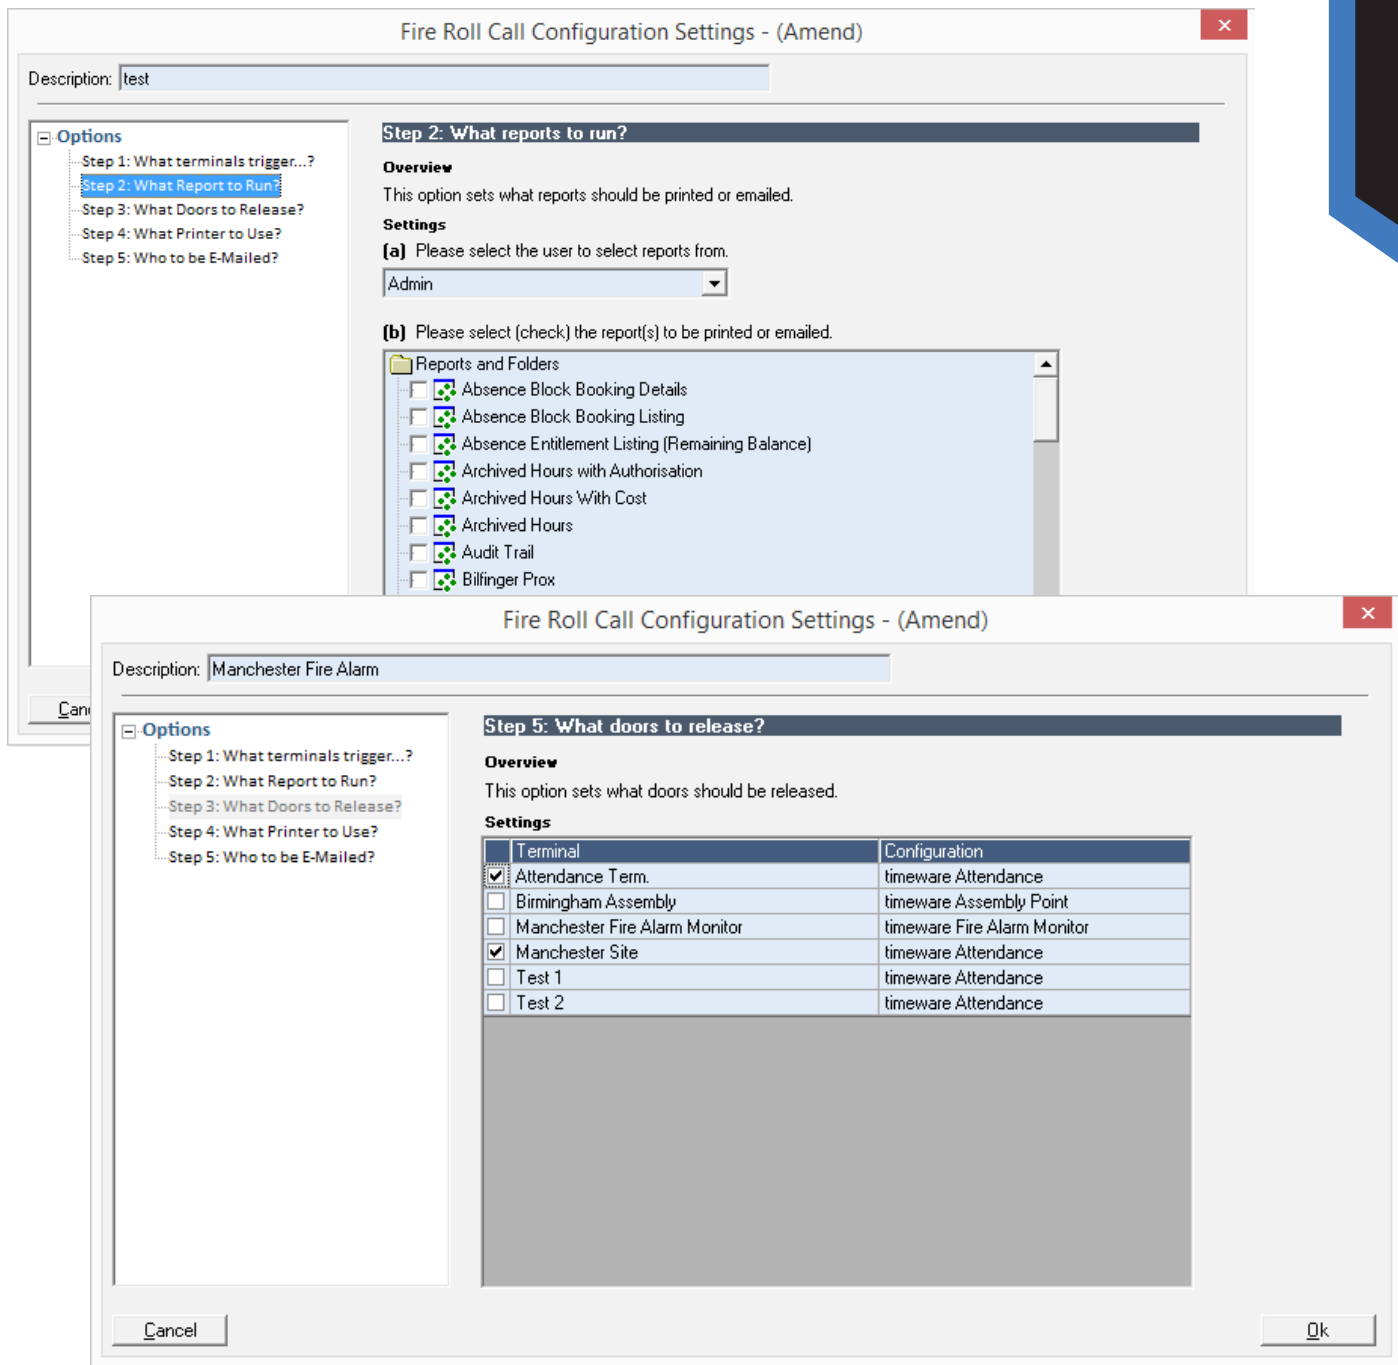

A quick summary of the features

Job Costing

Fire roll call configuration – The menu which all the fire roll call processes are stored and configured. Used for specifying which doors/reports/emails to trigger.

Roll call – The reports which can tell you who is in the building

Service – The fire roll call is ran via a windows service

Fire alarm notifications

Notifications and the 'To-Do' list...

Infinity is able to notify users when a fire alarm has been triggered.
