Grey Mailing Bags

MADE FROM 100% RECYCLED MATERIAL

These mailing bags are unbelievably great value for money!

Our recycled grey mailing bags incorporate a permanent self-seal closure and are made from an opaque 55 micron grey low-density polythene, so they are high in strength, whilst still offering a low posting weight.

The grey mailing bags are weather-proof, burst and puncture resistant, and although they're made of recycled polythene they're still 100% recyclable.
