

ENERPAC®

POWERFUL SOLUTIONS. GLOBAL FORCE.

BOLTING TOOLS

US

E 4 1 3

ENERPAC'S Bolting Solutions caters to the complete bolting work-flow, ensuring joint integrity in a variety of applications throughout industry:

Joint Assembly

From simple pipe alignment to complex joint positioning of large structural assemblies, our comprehensive line of joint assembly products range from hydraulic and mechanical alignment tools to PLC-controlled multi-point positioning systems.

Controlled Tightening

Enerpac offers a variety of controlled tightening options to best meet the requirements of your application, ranging from manual torque multipliers, to pneumatic multipliers, as well as a comprehensive range of hydraulic torque wrenches and inter-connectable bolt tensioning tools.

Joint Separation

Enerpac also provides hydraulic nut splitters and a variety of mechanical and hydraulic spreading tools for joint separation during inspection, maintenance and decommissioning operations.

High quality bolting solutions from the brand you can trust. See how Enerpac can make your bolting work-flow more accurate, safer and efficient.

Bolting Integrity Software

Visit www.enerpac.com to access our free on-line bolting software application and obtain information on tool selection, bolt load calculations and tool pressure settings. A combined application data sheet and joint completion report is also available.

All information in this catalog can be changed due to product improvements without prior notice.

ATM – Flange Alignment Tools

Misaligned joints

Joints must be pulled together and correctly aligned prior to tightening. Current methods of manipulation tend to be dangerous and involve a high degree of manual lifting using slings, hooks and lifting gear. These methods can damage joint components, are time consuming in setup and disassembly, operational time and the amount of manpower required.

Solution: Flange Alignment Tools

The Enerpac ATM series Flange Alignment Tools are developed to rectify twist and rotational misalignment without additional stress in pipelines. Hydraulic cylinders, jacks and lifting wedges can also be used to assist in positioning and aligning.

E-Series, Manual Torque Multipliers

Controlled tightening when external power is unavailable

Applications are often located where external power sources to drive air or electric powered tools are unavailable but controlled bolting is required, typically at values higher than an operator can generate using manual wrenches.

Solution: Manual Torque Multipliers

Enerpac E-series manual torque multipliers offer a range of output torques from manual inputs that can easily be achieved by an operator, providing accurate, efficient torque multiplication for make-up or break-out of joint fasteners.

S and W Series Torque Wrenches

Industrial

Controlled tightening of a large range of fasteners including those in hard to reach areas, which require highly accurate torquing solutions.

Solution: Hydraulic Torque Wrenches

Professional tools for industrial applications. Truly versatile tools which utilize standard Impact Sockets, optional direct Allen Drives or Interchangeable cassettes to provide controlled tightening of multiple sized fasteners per tool. Optional accessories further extend the application range of these products.

PTW Series Torque Wrenches

General Applications

Applications that require controlled bolting, feature a high volume of fastenings, and offer access to an air compressor.

Solution: Pneumatic Torque Wrenches

Enerpac Pneumatic Torque Wrenches are fast, easy to use and highly accurate. Their low friction planetary gear box provides continuous rotation for constant torque output and minimizes wear for longer tool life. The PTW tools' quiet air motor and low vibration design make them suitable for both indoor and outdoor applications.

Controlled Bolting

Increasing Health and Safety, Environmental and Productivity requirements demand even and parallel joint closure to ensure a sound assembly, especially on pressure containing vessels. This often requires the simultaneous tightening of multiple fasteners.

Solution: **Bolt Tensioners**

Enerpac GT Series Bolt Tensioners can achieve accurate preload in single or multiple fastener applications simultaneously, without inducing rotational twist or contending with the uncertainties of friction and lubrication.

GT Series – Bolt Tensioners

Frozen or Corroded Nuts

Often nuts are difficult to remove, while loosening using tightening tools is possible it generally requires larger equipment and is time consuming. The use of cutting torches or hammers and chisels can cause damage to the joint components, requires significantly longer setup and operational time and can present a potential safety risk.

Solution: **Hydraulic Nut Cutters**

Nut splitting with the NC Series Nut Cutters or NS Series Nut Splitters is the safest method. It takes less time and avoids costly damage to joint components. The head design fitted with heavy-duty chisels permits the splitting of nuts on a wide variety of applications.

NC or NS – Hydraulic Nut Cutters & Splitters

Joint Separation

Separation of stubborn joints for inspection and maintenance particularly those fitted with ring grooves or those with external forces acting on them are often difficult to separate. The use of hammers and wedges, chain blocks and lever bars can damage joint components and present a potential safety risk.

Flange Spreaders

The FSH, FSM-Series parallel wedge spreaders offer controlled separation without bending or risk of slipping from the joint. The FS series spreaders are ideally suited to flanged joint applications.

FSH & FSM – Parallel Wedge Spreaders

Pumps and Accessories

A wide range of Pumps and Accessories are available including: Manual, Air and Electrically operated pump units, hoses, gauges, manifolds and fittings.

Pumps and Accessories

For Bolting Solutions Think Enerpac

▼ Shown from left to right: E291, E393, E494

Accurate, Efficient Torque Multiplication

When accurate make-up or break-out of stubborn fasteners requires high torque

- High-efficiency planetary gear sets achieve high output torque from low input torque
- Most models operator protected by anti-backlash device
- Multiplier output accuracy $\pm 5\%$ of input torque
- Reversible, tighten or loosen bolts
- Reaction bar or reaction plate type
- Angle-of-turn protractor standard on E300 series models
- Reaction plate models offer increased versatility with reaction point locations
- E300 and E400 series replaceable shear drives provide overload protection of internal power train (one replacement shear drive is included)

Typical Torque Multiplier Applications

- Locomotives
- Power plants
- Pulp and paper mills
- Refineries
- Chemical plants
- Mining and construction
- Off-road equipment
- Shipyards
- Cranes

◀ Enerpac Reaction Bar Torque Multiplier E393 used to manually torque bolts up to 3,200 ft-lbs.

▼ SELECTION CHART

Torque Multiplier Type	Output Torque Capacity		Model Number
	(Ft.lbs)	(Nm)	
Reaction Bar Multiplier	750	1015	E290PLUS
	1000	1355	E291
	1200	1625	E391
	2200	2980	E392
	3200	4340	E393
Reaction Plate Multiplier	2200	2980	E492
	3200	4340	E493
	5000	6780	E494
	8000	10845	E495

Manual Torque Multipliers

Enerpac manual torque multipliers provide efficient torque multiplication in wide clearance applications and when external power sources are not available. Manual torque multipliers are used in most industrial, construction, and equipment maintenance applications. Hydraulic torque wrenches are better suited for tight tolerance, flange and repetitious bolting applications.

Use Reaction Bar Models:

- where space is limited
- where multiple reaction points are available
- when portability is desirable

Use Reaction Plate Models:

- above 3200 Ft.-lbs. output torque
- on flanges and applications where neighboring bolt or nut is available to react against
- when extreme reaction forces are generated

E Series

Maximum Output Torque:
750-8000 Ft.lbs

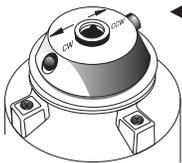

Torque Ratio:
3:1-52:1

Multiplier Output Ratio Accuracy:
± 5 %

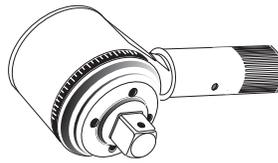

CAUTION!

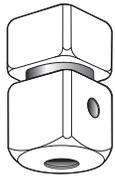

Never use impact type air tools for power driving torque multipliers. Torque multiplier drive train damage will occur.

Selector Pawl
Models with anti-backlash protection have directional selector pawls. Set the pawl for clockwise or counter-clockwise rotation.

Angle-of-Turn Protractor
E391, E392 and E393 models include an angle-of-turn protractor (scale) to tighten fasteners using a "torque turn" method. Allows accurate measuring a specific number of degrees of rotation.

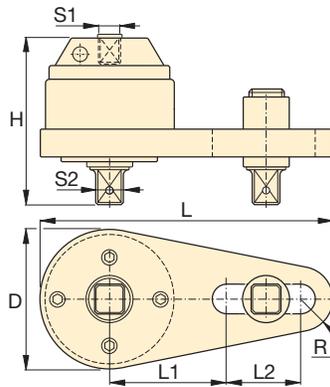

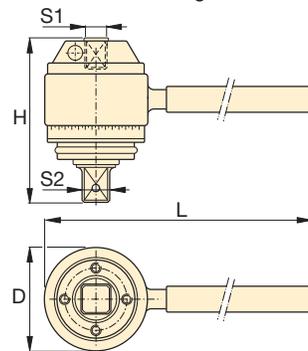

Shearable Square Drive
Designed to provide overload protection on E300- and E400-series multiplier power train by shearing when excess input torque is applied. Internal shear pin prevents tool from falling off bolt.

Hydraulic Torque Wrenches

Enerpac offers a complete range of square drive and hexagon cassette torque wrenches.

Setting New Standards in Safety, Simplicity and Performance

Two Handle Styles

Robust angled positioning handles come standard with every S-Series (X-Edition) tool. Straight positioning handles are available as accessories.

Compatible S-Series (X-Edition) wrenches	Angled positioning handles (standard)	Straight positioning handles (optional)
S1500X, S3000X	SWH6A	SWH6S
S6000X, S11000X	SWH10A	SWH10S
S25000X	Supplied with an eyebolt handle (SWH10EA)	

Safety and Performance

- Compact, high-strength uni-body construction provides a small operating radius without sacrificing endurance
- 35° rotation angle and rapid return stroke for fast operation
- Tough manifold design with added safety feature for enhanced operator safety

Simplicity

- 360° click-on reaction arm with quick release lever provides easier handling, even when wearing gloves
- Includes robust handle which mounts on both sides of tool for extra maneuverability
- Push button square drive release for quickly reversing the square drive for tightening or loosening

Versatility

- Available with optional enhanced tilt and swivel TSP300 manifold for horizontal and vertical maneuverability, with greater durability*

Accuracy

- Constant torque output provides accuracy of +/-3% across full stroke
- Optional Angle-of-Turn Indicator provides measurement of rotation

TSP - Pro Series Swivel

The optional TSP300 tilt and swivel manifold with robust interlocking design provides 360° X-axis rotation and 160° Y-axis rotation.

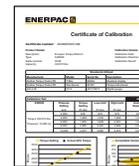

How to Order*

Factory fitted to S-Series (X-Edition) wrenches: Insert a "P" prior to the "X" in the tool designation, e.g.: **S1500PX**.

Order as an accessory using the part number: **TSP300**, which can be fitted to existing S-Series (X-Edition) wrenches.

* Includes male and female couplers.

Page: 9

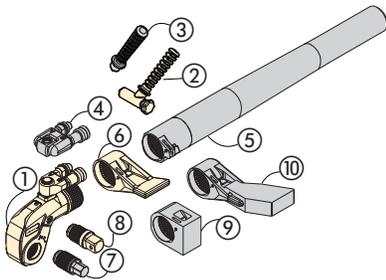

Calibration Certificate

All X-Edition tools are CE-ATEX declared, factory calibrated and are shipped complete with a calibration certificate.

* TSP300 is designed for X-Edition tools only, and is not compatible with standard edition tools. For replacement components for existing tools, refer to repair sheet on www.enerpac.com

S-Series, X-Edition, Square Drive Torque Wrenches

- ① Drive Unit
- ② Angeled Positioning Handle
- ③ Straight Positioning Handle (optional)
- ④ Pro Series Swivel (optional)
- ⑤ Reaction Tube Extension (optional)
- ⑥ Standard Reaction Arm
- ⑦ Allen Drive (optional)
- ⑧ Square Drive
- ⑨ Short Reaction Arm (optional)
- ⑩ Extended Reaction Arm (optional)

Select the Right Torque

Choose your Enerpac Torque Wrench using the untightening rule of thumb: Loosening torque equals about 250% of tightening torque.

S Series (X-Edition)

Maximum Torque at 10,000 psi:

26,150 Ft.lbs

Square Drive Range:

3/4-2 1/2 inch

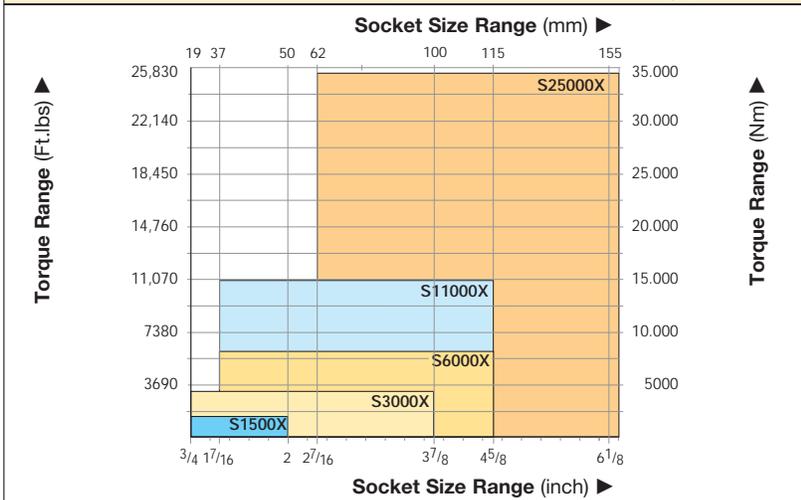

Nose Radius:

.98-2.52 inch

Maximum Operating Pressure:

10,000 psi

*TORQUE WRENCH SELECTION (based on socket size range)

*Additional socket sizes available upon request. See page 10 for BSH-Sockets.

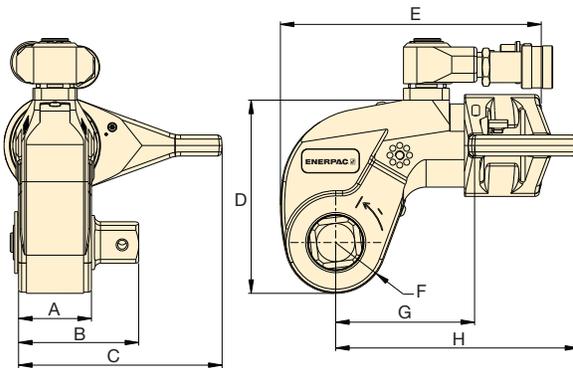

Accessory Options

A full list of optional accessories can be found on page 9.

Pin and Ring

All sockets are supplied with a "Pin and Ring" to hold the socket in place on the square drive of the tool.

Select the Right Torque

Choose your Enerpac Torque Wrench using the untightening rule of thumb: Loosening torque equals about 250% of tightening torque.

ENERPAC professional series steel torque wrenches provide reliable controlled tightening solutions across many industries.

S3000X Square Drive Torque Wrench on Wind Turbine Assembly and Maintenance

S3000X used to connect wind turbine segments during assembly and maintenance. A robust but compact solution is required for bolt tightening on wind tower sections. Large numbers of fasteners require precise application of torque to ensure joint integrity is achieved and maintained.

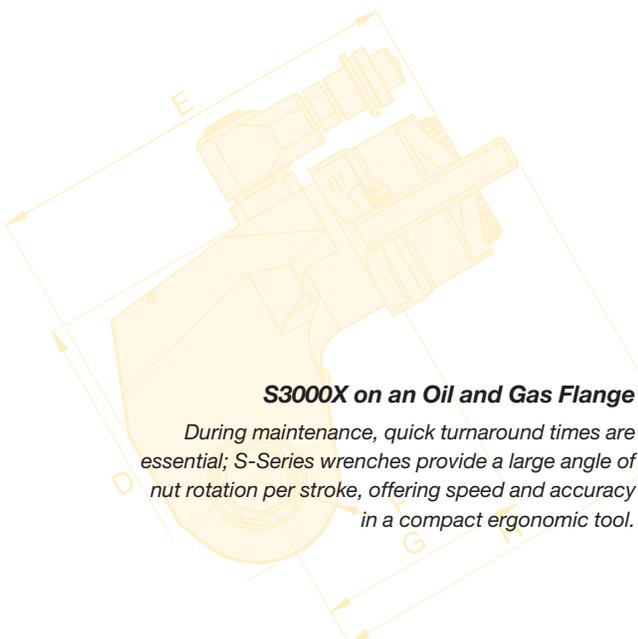

The Enerpac S-Series wrench offers simple and reliable operation while providing accurate and repeatable results.

W4000X Low Profile Torque Wrench on an API Pipe Flange

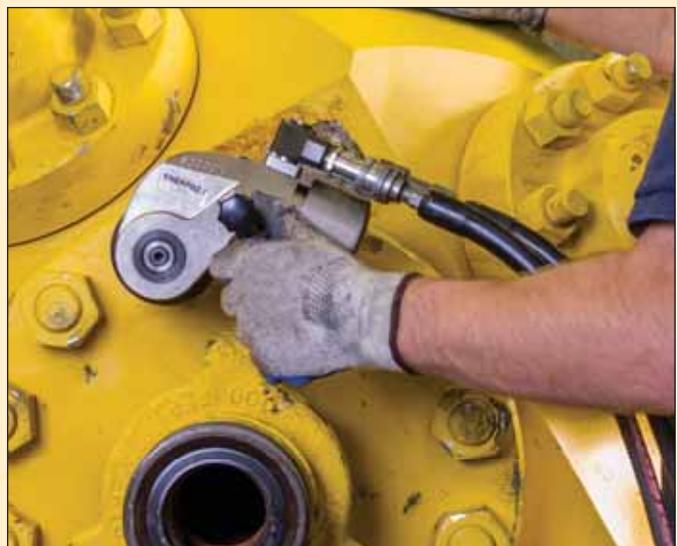

Throughout the Oil and Gas, Petrochemical and Processing Industries, pipeline joints, valves, pumps and machinery present challenges for controlled bolting.

The restricted access on this flange was easily overcome with an Enerpac W-Series Torque Wrench. The W Wrenches offer reliability and control, ensuring even and consistent torque is applied to all bolts.

S3000X on an Oil and Gas Flange

During maintenance, quick turnaround times are essential; S-Series wrenches provide a large angle of nut rotation per stroke, offering speed and accuracy in a compact ergonomic tool.

▼ Shown: W4206X cassette with W4000X drive unit
(Rear model shows optional straight handle)

Setting New Standards in Safety, Simplicity and Performance

Two Handle Styles

Robust angled positioning handles come standard with every W-Series (X-Edition) tool. Straight positioning handles designed for

extreme limited access applications are available as accessories.

Compatible W-Series (X-Edition) wrenches	Angled positioning handles (standard)	Straight positioning handles (optional)
W2000X, W4000X	SWH6A	SWH6S
W8000X, W15000X	SWH10A	SWH10S
W22000X, W35000X	Supplied with an eyebolt handle (SWH10EA)	

TSP - Pro Series Swivel

The optional TSP300 tilt and swivel manifold with robust interlocking design provides 360° X-axis rotation and

160° Y-axis rotation.

How to Order

Factory fitted to new W-Series (X-Edition) wrenches: Insert a "P" prior to the "X" in the tool designation, e.g.: **W2000PX**.

Order as an accessory using the part number: **TSP300**, which can be fitted to existing W-Series (X-Edition) wrenches.

Page: 25

Calibration Certificate

All X-Edition tools are CE-ATEX declared, factory calibrated and are shipped complete with a calibration certificate.

  II 2 GD ck T4
CSA/SIRA 15XT072

Safety and Performance

- Superior strength to size ratio provides easy access to difficult to reach applications without sacrificing endurance
- 30° rotation angle and rapid return stroke provide fast operation
- Tough manifold design with added safety feature for enhanced operator safety

Simplicity

- Fast release drive unit enables rapid exchange of cassettes, no tools required and no pins to lose
- Includes robust handles which mount on both sides, and the tops of cassettes to allow for extra maneuverability
- Quick and easy disassembly for maintenance without special tools

Versatility

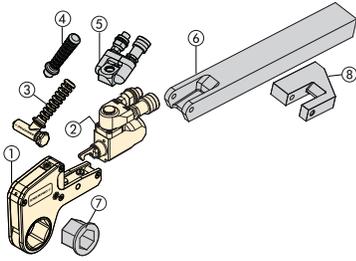

- Available with optional enhanced tilt and swivel TSP300 manifold for horizontal and vertical maneuverability, with greater durability*
- X-Edition drive units, cassettes and most accessories are compatible with standard edition tools*
- Drive unit compatible with UltraSlim and WCR-Series cassettes

Accuracy

- Constant torque output provides accuracy of +/-3% across full stroke

* TSP300 is designed for X-Edition tools only, and is not compatible with standard edition tools. For replacement components for existing tools, refer to repair sheet on www.enerpac.com

W-Series, X-Edition Hexagon Wrenches

- ① Hexagon Cassette
- ② Drive Unit
- ③ Angled Positioning Handle
- ④ Straight Positioning Handle (optional)
- ⑤ Pro Series Swivel (optional)
- ⑥ Extended Reaction Arm (optional)
- ⑦ Reducer Insert (optional)
- ⑧ Reaction Paddle (optional)

Hexagon Cassettes and Reducer Inserts
Full range of interchangeable hexagon cassettes and reducing inserts provides maximum versatility. Details available at www.enerpac.com

W Series (X-Edition)

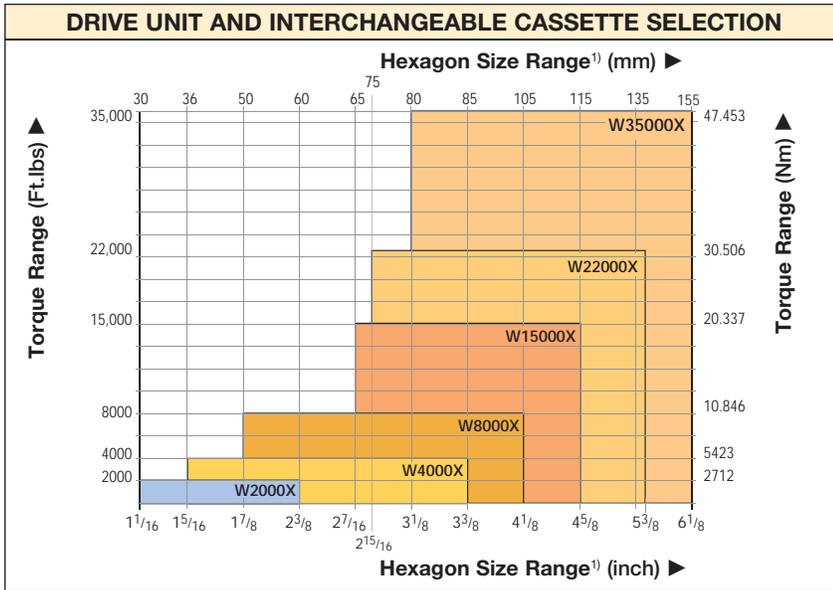

Maximum Torque at 10,000 psi:
35,000 Ft.lbs

Hexagon Range:
1¹/₁₆ - 6¹/₈ inch

Nose Radius:
1.22-4.52 inch

Maximum Operating Pressure:
10,000 psi

¹⁾ See page 80 for table of hexagon sizes of bolts, nuts and related thread diameters.

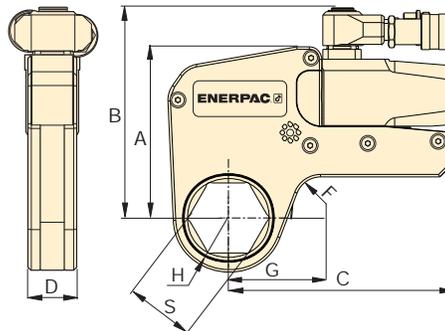

Torque Wrench Pump Selection Matrix

For optimum speed and performance see the torque wrench and pump matrix.

Page: **38**

▼ These rigid steel wrenches with low profile interchangeable hexagon cassettes guarantee durability and maximum versatility in bolting applications.

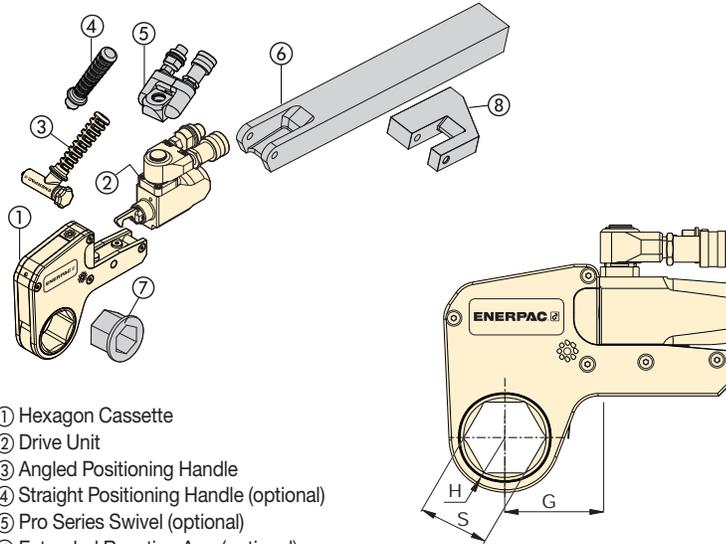

▼ SELECTION CHART

▼ Shown: W4206SL stepped-width cassette with W4000X drive unit

Your easy and long lasting solution to difficult access bolting applications

Designed for Tight Spots

Stepped width design provides easy access in confined areas. UltraSlim cassettes fit where standard solutions won't.

Built to Outperform

High endurance components keep working when others fail.

Top Mounted Handles

Standard top mounted handles provide safety and versatility; optional angled handles are also available.

Replacement handle (straight)	SWH6S
Angled handle (optional)	SWH6A

Versatility

- Lean, stepped width design allows tool to be mounted over bolts where other tools won't fit
- Bi-Hexagonal cassette allows twice as many positioning points on nut or bolt
- Uses same drive unit as standard W-series hexagon cassettes
- Robust top mounted handle stays out of the way, providing safe fastening in hard to reach areas

Performance

- Premium components provide best-in-class endurance

Ease of Use

- Few moving parts are easily accessible for quick field maintenance
- Fast release drive unit enables rapid exchange of cassettes, no tools required and no pins to lose
- Uses same drive unit as standard and X-Edition cassettes

Accuracy

- Constant torque output provides accuracy of +/- 3% across the full stroke

Calibration Certificate

All UltraSlim Series cassettes are CE - ATEX declared, factory calibrated and are shipped complete with a calibration certificate.

CE Ex II 2 GD ck T4
CSA/SIRA 15XT072

Slim enough to fit and tough enough to last. This UltraSlim wrench is the perfect controlled bolting solution for this oil and gas flange.

UltraSlim Stepped-Width Cassettes

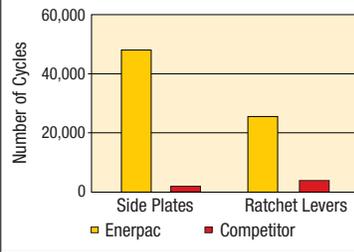

UltraSlim Stepped-Width Cassettes

Accessing narrow spaces normally requires significantly reducing the width of the torque wrench. For the tool operator, this has always meant vastly reduced tool durability, and/or reduced torque output.

By using the highest grade materials, perfecting the geometry, and placing the positioning handle on top of the tool, Enerpac UltraSlim cassettes are able to provide greater torque, get into tighter spaces, and vastly outperform the competition in product durability.*

Durability of Key Components*

*Average test results, whereby three Enerpac 1³/₁₆" UltraSlim cassettes and three competitor 1³/₁₆" cassettes were tested at 4000 ft-lbs for 50,000 cycles. The Enerpac sideplates never broke for the full duration of the test.

W Series Ultra-Slim

Maximum Torque at 10,000 psi:

4360 Ft.lbs.

Hexagon Range:

1¹³/₁₆ - 2¹⁵/₁₆ inches

Maximum Operating Pressure:

10,000 psi

Torque Wrench Pumps

Visit enerpac.com for system matched air and electric torque wrench pumps that are ideal for use with hydraulic torque wrenches.

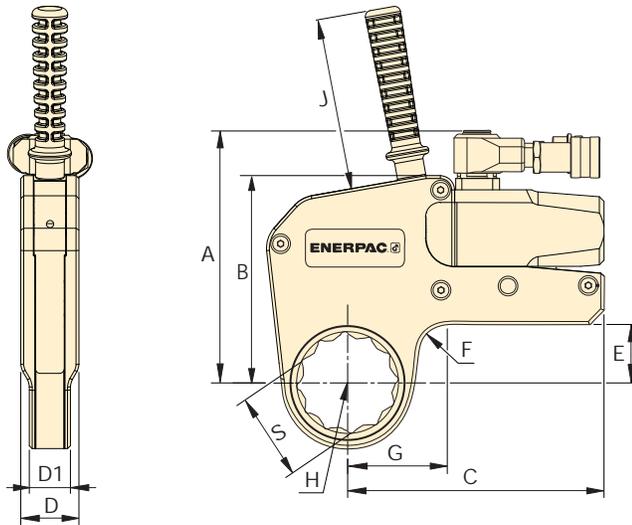

Page: 38

Torque Wrench Hoses

Use Enerpac THQ-700 Series hoses with W-Series torque wrenches to ensure the integrity of your hydraulic system.

19.5 feet long, 2 hoses	THQ-706T
39 feet long, 2 hoses	THQ-712T

* May also be used with **W2000PX** and **W4000PX** drive units, featuring double-swivel manifolds.

▼ WCR4000 Roller Cassette with Spanner and W4000 Drive Unit

Bi-Hexagonal Spanner Size:

1⁷/₁₆-3¹/₈ inch

Spanner Nose Radius:

1.22-2.18 inch

Maximum Torque:

4250 Ft-lbs

Maximum Operating Pressure:

10,000 psi

WCR4000 Torque Wrench

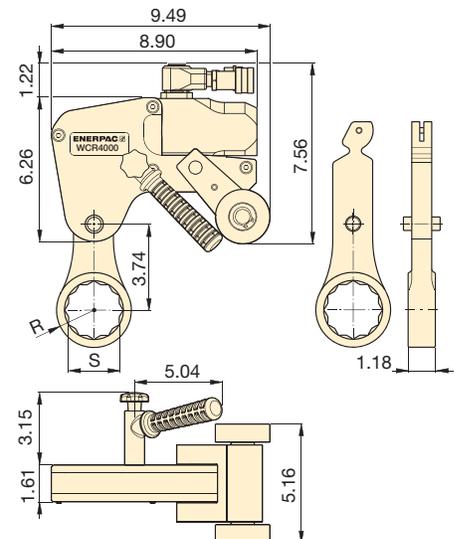

The **WCR4000** combines power and durability with a slim spanner design to provide bolting professionals with one of the most versatile and high performing limited access tools on the market today.

The tool was designed for use in narrow access applications, particularly in the height above the nut, and between the bolt center, and the inside of the joint.

Ideal for bolting API flanges, the **WCR4000** is available with a wide range of ring type spanners, and is powered by the standard W4000X drive unit.

- **Spanners available to fit most commonly used API flanges**
- **Small nose radius – resolves bolt to pipe restrictions**
- **Slim spanner design – reduces bolt height restrictions**
- **Wide range of spanners ranging from 1⁷/₁₆ - 3¹/₈ inches (36 - 80 mm)**
- **Includes handle to improve tool handling and safety**
- **Rigid solid steel body for maximum endurance and minimum downtime**

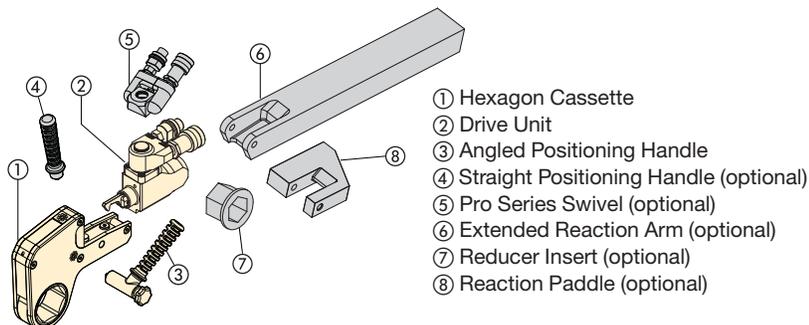

Closed Spanner Hexagon Size	Closed Spanner Model Number		Spanner Radius R (in)	Weight * (lb)	Roller Cassette Assy Model No.**	Drive Unit Model No.
	S (in)	S (mm)

▼ Shown: SQD-50-I

- Very high torque-to-weight ratio
- High speed, double-acting operation
- High degree of rotation angle for increased productivity
- Never-jam mechanism
- High repeatability, with accuracy $\pm 3\%$
- Slim nose radius and 360° swivel hose connection allow easier positioning in confined areas
- Few moving parts means durability and low maintenance
- Push-button drive release; no tools needed to reverse square or Allen drives for tightening or loosening
- Storage case (included) protects from damage, water and dirt
- Lock-ring couplers are standard on all torque wrenches, pumps and hoses

◀ *Easy and reliable service in the field using Enerpac SQD-series torque wrenches.*

Lightweight Aluminum High-Power Wrench for Sockets or Allen Drives

Swivel Hose Connection

All Enerpac torque wrenches feature a 360° swivel connection to allow easy access in all positions.

Twin 3.5:1 Safety Hoses

Use only Enerpac THC-700 series twin 3.5:1 safety hoses with SQD double-acting wrenches to ensure the integrity of your system.

www.enerpac.com

Optional Allen Drives

Expanded versatility with a wide range of metric and imperial Allen drives.

Page: 28

Double-Acting, Square Drive Wrenches

▲ All wrenches come standard with swivel coupler, square drive and reaction arm.

SQD Series

Maximum Torque:
19,875 Ft.lbs

Square Drive Range:
3/4-2 1/2 inches

Maximum Operating Pressure:
11,600 psi

Use only heavy-duty Impact Sockets for power driven torquing equipment, according to ISO 2725 and ISO 1174; DIN 3129 and DIN 3121 or ASME-B107.2/1995.

Torque Wrench Pumps

Enerpac system matched air and electric torque wrench pumps provide control to operate hydraulic torque wrenches.

Page: **38**

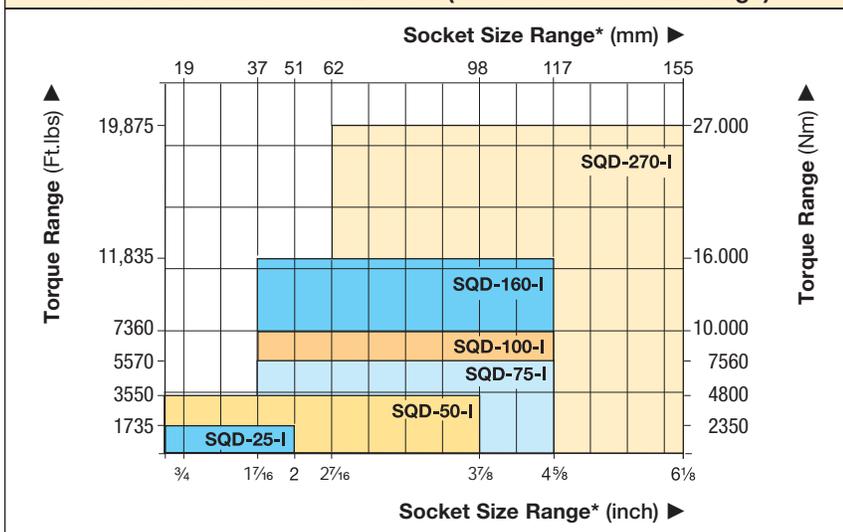

Hexagon Bolt and Nut Sizes

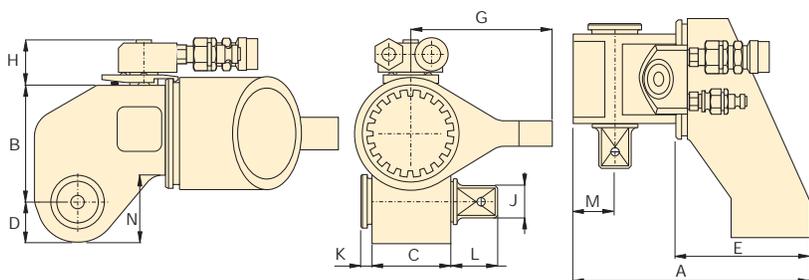

See the table for hexagon sizes of bolts, nuts and related thread diameters.

Page: **76**

TORQUE WRENCH SELECTION (based on socket size range)

For
SQD
Series

Maximum Torque at 11,600 psi:

19,875 Ft.lbs

Allen Drive Range:

14-70 mm

Nose Radius:

0.94-2.32 inches

Optional Allen Drives and Reaction Arm

The **RAH**-Reaction Arm for Allen drives must be used instead of reaction arm for square drives.

Flange Spreaders

Separates pipe flanges with ease, enabling efficient maintenance tasks.

Page: 68

Select the Right Torque

Choose your Enerpac Torque Wrench using the loosening torque rule of thumb:

Loosening torque may require 250% of tightening torque depending on the condition of the fastener.

▼ SQD-50-I with 50A-22 Allen drive with RAH-50 Reaction Arm for Allen drives.

▼ Shown from left to right: HXD-60 with CC-680, HXD-30 with CC-360

- High torque-to-weight ratio, slim nose radius and flat design
- High speed, high degree of rotation angle
- Snap in, interchangeable cassettes, no tools required
- 360° swivel hose connection allows easier positioning in confined areas
- High repeatability, with accuracy $\pm 3\%$
- Strong unibody design, integrated reaction arm and few moving parts make wrenches durable and reliable
- Extensive range of metric and imperial hexagon cassettes and reducers
- Drive unit and cassette come in storage case to protect from damage, water and dirt
- Lock-ring couplers are standard

▼ The HXD-30 drive unit combined with cassette CC-3238 is the best solution for this mining application. The slim nose radius and swivel couplers allow easy access in all positions.

Aluminum, Low Profile

Twin 3.5:1 Safety Hoses

Use only Enerpac **THC-700** series twin 3.5:1 safety hoses with HXD double-acting wrenches to ensure the

integrity of your system.

www.enerpac.com

Nut Splitters / Nut Cutters

Remove rusted or corroded nuts easily with Enerpac Nut Cutters. Hexagon nut capacities up to 5.38" AF.

Page: 66

Select the Right Torque

Choose your Enerpac Torque Wrench using the loosening torque rule of thumb:

Loosening torque may require 250% of tightening torque depending on the condition of the fastener.

Double-Acting Hydraulic Torque Wrenches

▼ Shown from left to right: CC-3238, HXD-30

Torque Wrench Selection in 2 steps:

- 1. Drive Unit**
Select the HXD-drive Unit using the quick selection chart below.
- 2. Cassette**
Select the appropriate CC-cassette from pages 32 and 33.

HXD Series

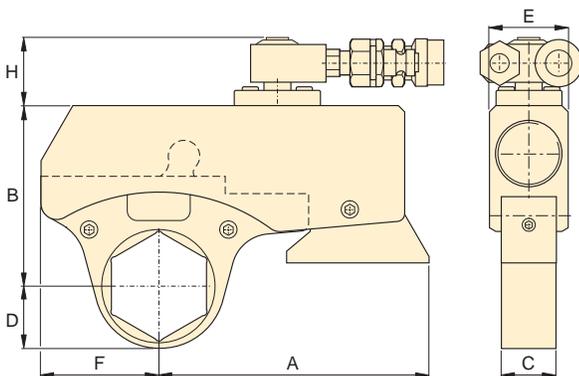

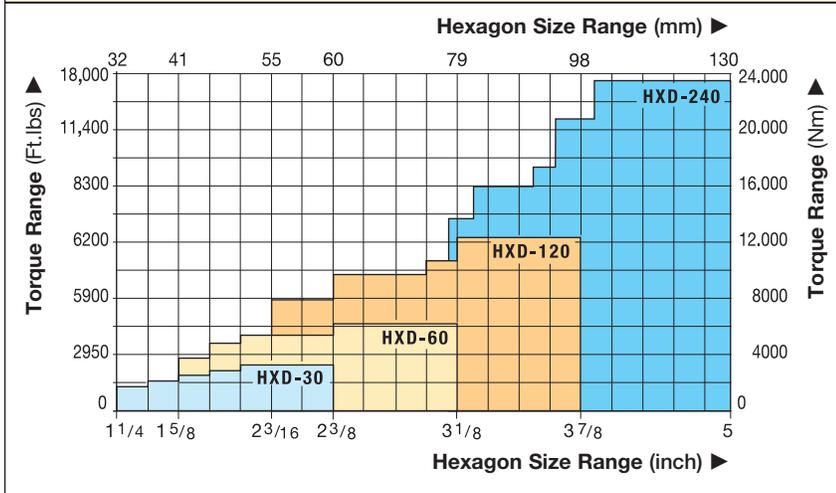

Maximum Torque:
17,860 Ft.lbs

Hexagon Range:
1¼-5 inches

Nose Radius:
1.12-3.78 inches

Maximum Operating Pressure:
11,600 psi

Continuous Rotation Controlled Torque

Typical Pneumatic Torque Wrench Applications

Mining

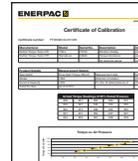

- Track maintenance
- Undercarriage maintenance
- Wheel maintenance
- Shovel maintenance

Power Generation

- Turbine bolts
- Tower segments
- Turbine casings

Oil and Gas

- Pipe flanges
- Valves
- Manway covers
- Pressure vessels

Calibration Certificate

All PTW tools are CE declared and are shipped complete with a calibration certificate.

Productivity

- High speed continuous rotation for constant torque output
- Low friction planetary gearbox design minimizes wear and extends uptime

Safety

- Ergonomic, low vibration design reduces fatigue and the risk of vibration related injuries for the operator
- Low noise air motor provides quiet, consistent performance for indoor and outdoor applications

Convenience

- Provided with standard reaction arm; wide assortment of custom arms and accessories are available
- Available with or without Filter-Regulator-Lubricator (FRL)
- Unique calibration certificate provided with each tool

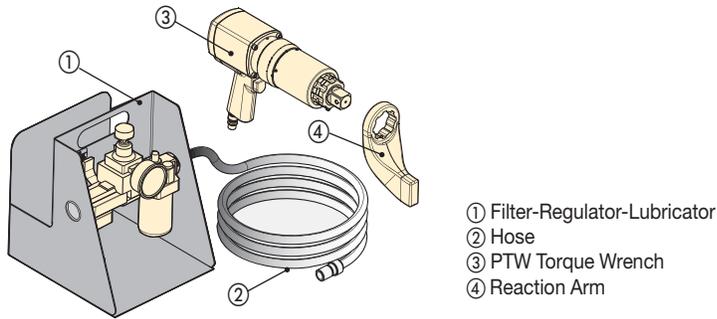

◀ The PTW1000 makes quick work of this flange maintenance job.

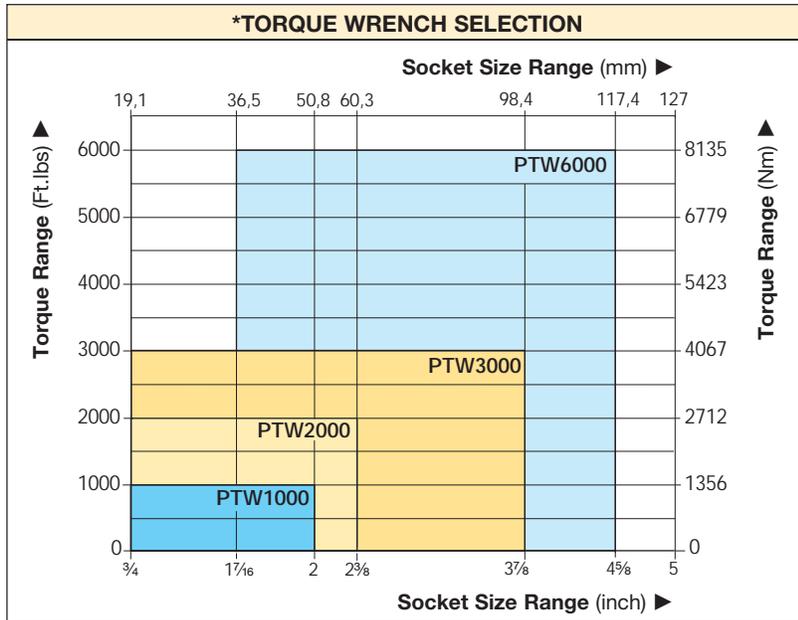

▼ PTW-Series Pneumatic Torque Wrenches are ideal for applications where speed and precision are critical, such as track maintenance.

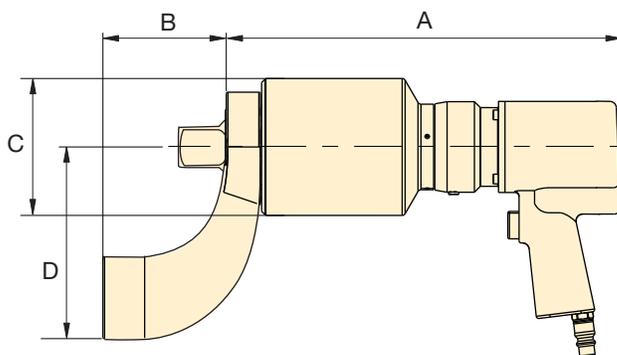

Pneumatic Torque Wrenches

- ① Filter-Regulator-Lubricator
- ② Hose
- ③ PTW Torque Wrench
- ④ Reaction Arm

*Socket size recommendations are based on torque output of tool and socket size range. Additional socket sizes available on request.

All tools are shipped complete with standard reaction arm and FRL*.

▼ SELECTION CHART

Minimum Torque		Maximum Torque		Square Drive (in)	Model Number*	RPM	Dimensions (in)				Weight** (lbs)
(ft-lbs)	(Nm)	(ft-lbs)	(Nm)				A	B	C	D	
300	407	1000	1356	1	PTW1000C	12.6	10.70	3.27	2.83	5.12	18
500	678	2000	2712	1	PTW2000C	8.0	11.26	3.27	3.11	5.24	19.5
900	1220	3000	4067	1	PTW3000C	3.1	13.50	3.27	3.74	5.24	23
1300	1763	6000	8135	1 1/2	PTW6000C	2.5	14.40	4.49	5.00	7.00	39

* To order without FRL and hose, remove "C" Suffix (e.g. PTW3000).

** Weight does not include reaction arm. Reaction arm weight for PTW1000, PTW2000, PTW3000 is 2.9 lbs. and PTW6000 is 7.75 lbs.

PTW Series

Maximum Output Torque:
6000 Ft.lbs

Square Drive Range:
1 - 1 1/2 inch

Pneumatic Torque Wrench Accessories

Enerpac offers a full line of accessories including a range of reaction arms and drives.

Page: **36**

Filter-Regulator-Lubricator

Recommended for use with all PTW pneumatic torque wrenches. Provides clean, lubricated air and allows for air pressure adjustment.

Order model number

FRL120C

BSH-Series Sockets

Heavy-Duty Impact Sockets for power driven torquing equipment.

Page: **10**

Hydraulic Torque Wrenches

Enerpac offers a complete range of square drive and hexagon cassette torque wrenches.

Page: **6 & 12**

PTW-Series Torque Wrenches

Enerpac offers the following accessories to support a wide variety of applications in industries such as mining, power generation and oil and gas. For additional custom accessories not pictured here, please contact Enerpac.

PTW-Series

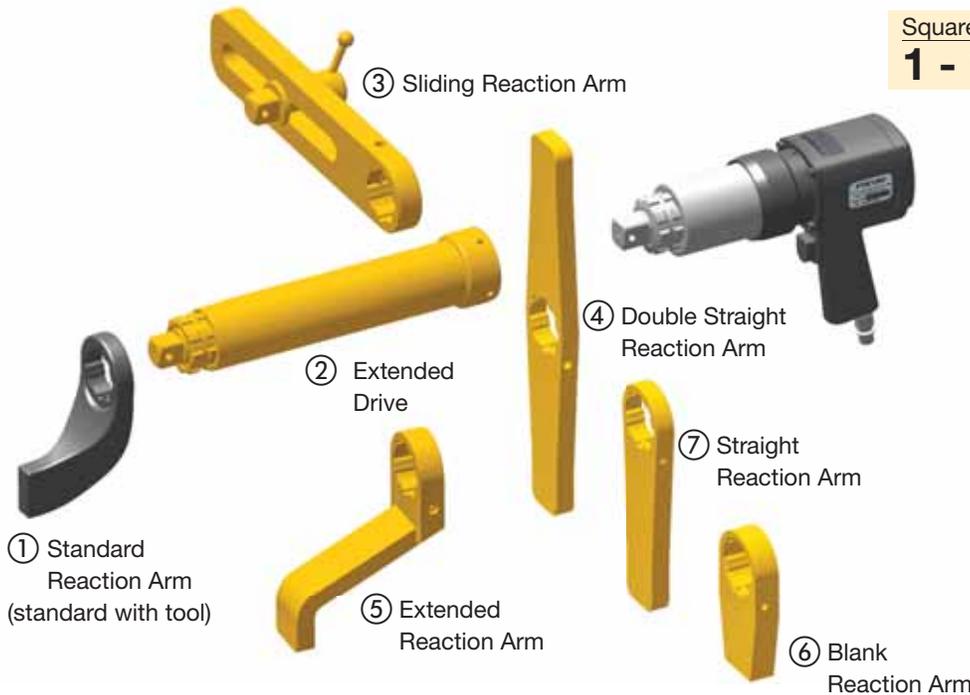

Maximum Output Torque:

6000 Ft.lbs

Square Drive Range:

1 - 1½ inch

▼ PTW-SERIES OPTIONAL ACCESSORIES

▼ For use with PTW1000, PTW2000, PTW3000 models			
No.	Description	Model No.	Application
1	Standard Reaction Arm	RATWS	Standard arm included with PTW model
2	Extended Drive, 6 inch	ED6TWS	Nose extension, primarily for truck wheel bolts
2	Extended Drive, 12 inch	ED12TWS	Nose extension, primarily for truck wheel bolts
2	Extended Drive, 18 inch	ED18TWS	Nose extension, primarily for truck wheel bolts
3	Sliding Reaction Arm	SLRATWS	For widely spaced and uneven bolt centers
4	Double Straight Reaction Arm	DSATWS	Reduces time to reposition arm *
5	Extended Reaction Arm	ERATWS	Long plate for use with deep well sockets
6	Blank Reaction Arm	BLTWS	Weldable blank for custom applications **
7	Straight Reaction Arm	SRATWS	Long plate for wide spaced reaction points
▼ For use with PTW6000 models			
1	Standard Reaction Arm	RATWL	Standard arm included with PTW model
2	Extended Drive 6 inch	ED6TWL	152 mm nose extension, primarily for truck wheel bolts
2	Extended Drive 12 inch	ED12TWL	305 mm nose extension, primarily for truck wheel bolts
3	Sliding Reaction Arm	SLRATWL	For widely spaced and uneven bolt centers
4	Double Straight Arm	DSATWL	Reduces time to reposition arm *
5	Extended Reaction Arm	ERATWL	Long plate for use with deep well sockets
6	Blank Reaction Arm	BLTWL	Weldable blank for custom applications **
7	Straight Reaction Arm	SRATWL	Long plate for wide spaced reaction points

* Time to reposition arm when repeatedly moving from tightening to loosening.

** Blank reaction arms must be heat treated to HRc 38-42 prior to use.

Typical PTW-Series Torque Wrench Applications

Mining

- Track maintenance
- Undercarriage maintenance
- Wheel maintenance
- Shovel maintenance

Power Generation

- Turbine bolts
- Tower segments
- Turbine casings

Oil & Gas

- Pipe flanges
- Valves
- Manway covers
- Pressure vessels

Optimum Torque Wrench and Pump Combinations

For optimum speed and performance Enerpac recommends the following system set-up with wrench-pump-hose combinations.

		ELECTRIC PUMPS				AIR DRIVEN PUMPS

ZU4-Series Electric Torque Wrench Pump

Utilizing a universal motor, the ZU4-Series has excellent low voltage characteristics. It works well with long extension cords or generator driven electrical power supplies. A field proven, efficient design ensures this pump is dependable and will draw less current—lowering your operating cost. The pumps are available in Pro and Classic formats. ZU4 Pro pumps have an LCD feature to display torque or pressure, selectable torque wrench, and self-diagnostics – premium features not available on any other pump. ZU4 Classic pumps feature an analogue gauge and a basic electrical package to deliver durable, safe and efficient hydraulic power.

ZE-Series Electric Torque Wrench Pump

The ZE-Series features premium options, such as the LCD to display torque or pressure values, and self-diagnostics. These pumps utilize an induction motor, making the ZE-Series the coolest and quietest pumps in their class.

ZA-Series Air Torque Wrench Pump

Utilizing the highly efficient design of the Z-Class pumping element, this air driven pump is best suited to power medium to large size torque wrenches

TQ-700 Series

Designed for both portability and production, the **TQ-700** features optimized flow technology to deliver superior bolting speed.

Page: 46

Call Enerpac!

For other combinations, consult your Enerpac bolting expert or your authorized Enerpac distributor.

Portable Electric Torque Wrench Pumps

▼ Shown: PMU-10427

PMU/PME Series

Reservoir Capacity:

0.5-1 gal.

Flow at 10,000 psi:

20 in³/min.

Motor Size:

0.5 hp

Maximum Operating Pressure:

10,000 and 11,600 psi

Pump Ratings

-Q suffix pumps are for 10,000 psi torque wrenches, and include spin-on couplers.

-E suffix pumps are for use with 11,600 psi rated torque wrenches, and include polarized lock-ring safety couplers.

- Powerful two-speed pump is lightweight and easy to carry
- Standard heat exchanger package keeps pump cool under extreme use
- Glycerin filled gauge with scales reading in psi and bar
- Transparent overlays in Ft.lbs and Nm for all Enerpac torque wrenches provide a quick torque reference
- Universal motor for a high power-to-weight ratio; generates full pressure on as little as 50% of the rated line voltage
- Adjustable pressure relief valve for accurate torque adjustments and precise repeatability

Twin Torque Wrench Hoses

Use Enerpac THQ-700 series twin hoses with 10,000 psi pumps, or use THC-700 series twin hoses with 11,600 psi pumps.

10,000 psi	
19.5 feet long, 2 hoses	THQ-706T
39 feet long, 2 hoses	THQ-712T
11,600 psi	
19.5 feet long, 2 hoses	THC-7062
39 feet long, 2 hoses	THC-7122

▼ SELECTION CHART

Z Tough.
Dependable.
Innovative.
CLASSIC

Classic Electrical

Basic electrical package includes mechanical contactor, ON/OFF toggle switch, pendant with electro-mechanical pushbuttons, 24V transformer timer and operator accessible circuit breaker.

Back-lit LCD Display for Pro Series

- Digital pressure or torque read-out
- Programmable "Auto-Cycle" setting
- "Auto-Cycle" setting easily programmable
- Torque wrench model is selectable
- Display torque in Nm or Ft.lbs
- Pump usage information, hour and cycle counts
- Low-voltage warning and recording
- Self-test and diagnostic capabilities
- Information can be displayed in English, French, German, Italian, Spanish and Portuguese
- Pressure transducer is more accurate and durable than analog gauges

- Features Z-Class high-efficiency pump design; higher oil flow and bypass pressure, cooler running and requires 18% less current draw than comparable pumps
- Powerful 1.7 hp universal electric motor provides high power-to-weight ratio and excellent low-voltage operating characteristics
- High-strength, molded composite shroud protects motor and electrical components, while providing an ergonomic, non-conductive handle for easy transport
- Low-voltage pendant provides additional safety for the operator
- Valve technology reduces oil operating temperatures and withstands contaminants to increase pump reliability

Pro-Series

- LCD readout provides pressure and torque display and a number of diagnostic and readout capabilities never before offered on a portable electric pump
- Auto cycle feature provides continuous cycle operation of the torque wrench as long as the advance button is pressed. (Pump can be used with or without auto cycle feature)

Any brand of hydraulic torque wrench can be powered by the portable ZU4-Series torque wrench pump. ►

Z-Class – A Pump For Every Application

Patented Z-Class pump technology provides

high by-pass pressures for increased productivity—important in applications using long hose runs and high pressure-drop circuits, like heavy lifting or certain double-acting tools.

Enerpac ZU4 Hydraulic Pumps are built to power small to large torque wrenches. Choosing the right ZU4 torque wrench pump for your application is easy.

Classic Electric Torque Wrench Pump

- The Classic has an analog gauge and traditional electro-mechanical components (transformers, relays and switches) in place of solid-state electronics. The Classic

delivers durable, safe and efficient hydraulic power.

Pro Series Electric Torque Wrench Pump

- Digital (LCD) display features a built-in hour meter, pressure and torque display, and shows self-diagnostic, cycle-count and low voltage warning information. These premium features are not available on any other pump—anywhere!

AutoCycle feature provides continuous cycle operation of the torque wrench as long as the advance button is pressed. (Pump can be used with or without AutoCycle feature).

ZU4T Series

Reservoir Capacity:

1 and 1.75 gal.

Flow at 10,000 psi:

60 in³/min.

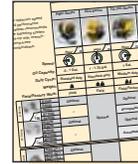

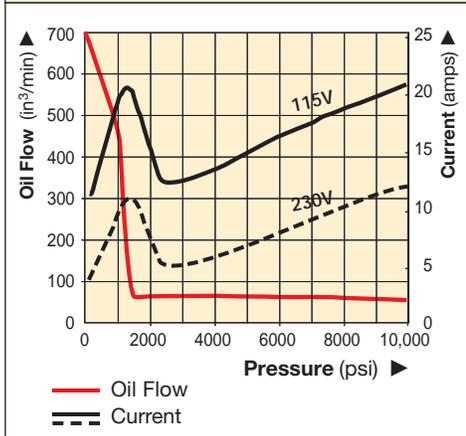

Motor Size:

Ordering Example 1

Model No. ZU4208TB-QMHK

10,000 psi pump for use with Enerpac S- and W-Series and other 10,000 psi torque wrenches, 115V motor, 1.75 gallon reservoir, 4-wrench manifold, heat exchanger and skidbar.

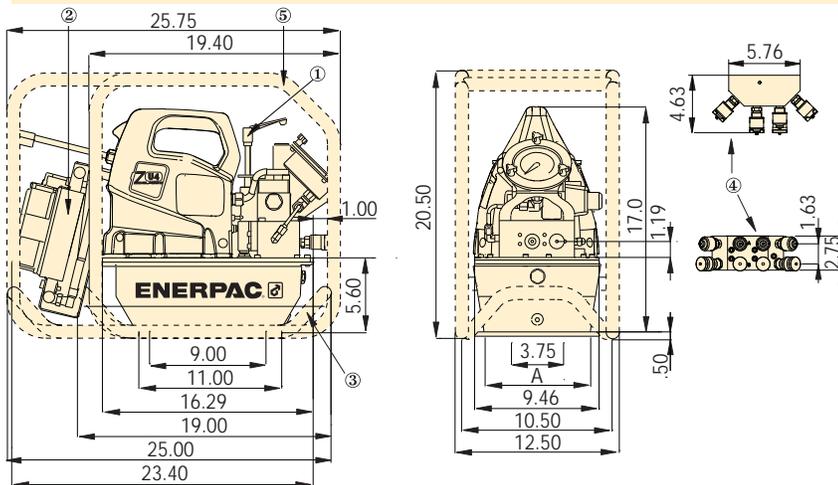

Refer to the torque wrench pump selection matrix for optimum wrench, pump and hose combinations.

Twin Torque Wrench Hoses

Use Enerpac **THQ-700** series twin hoses with 10,000 psi pumps, or use **THC-700** series twin hoses with 11,600 psi pumps.

10,000 psi	
19.5 feet long, 2 hoses	THQ-706T
39 feet long, 2 hoses	THQ-712T
11,600 psi	
19.5 feet long, 2 hoses	THC-7062
39 feet long, 2 hoses	THC-7122

ZU4-Series Torque Wrench Pumps

Reservoir Size (useable gallons)	A (in)
1	6.0
1.75	8.1

Dimensions shown in inches

- ① User adjustable relief valve
- ② Heat exchanger (optional)
- ③ Skidbar (optional)
- ④ 4-wrench manifold (optional)
- ⑤ Roll cage (optional)

ZU4 Performance							
Motor Size (hp)	Output Flow Rate (in ³ /min)				*Motor Electrical Specification	Sound Level (dBA)	Relief Valve Adjustment Range (psi)
	100 psi	700 psi	5,000 psi	10,000 psi			
1.7	700	535	76	60	115 VAC, 1-ph 208-240 VAC, 1-ph	85-90	1,800-10,000**

* 50/60 HZ

** Pump type (-Q) shown, (-E) range is 1,800 - 11,600 psi.

▼ Most hydraulic torque wrenches can be powered by the Enerpac ZU4-Series torque wrench pump.

ZU4T Torque Wrench Pump Options

ZU4T Series

Reservoir Capacity:
1 and 1.75 gal.

Flow at 10,000 psi:
60 in³/min.

Motor Size:
1.7 hp

Maximum Operating Pressure:
10,000 psi

Heat Exchanger

- Removes heat from the bypass oil to provide cooler operation
- Stabilizes oil viscosity, increasing oil life and reduces wear of pump and other hydraulic components

Skidbar

- Provides greater pump stability on soft or uneven surfaces
- Provides easy two-handed lift

Accessory Kit No. *	Can be used with:
ZHE-U115	115V pumps
ZHE-U230	230V pumps

* Add suffix **H** to pump model number for factory installation.
Heat Exchanger adds 9.1 lbs. to pump weight.

Ordering Example:
Model No. ZU4208TB-H

Accessory Kit No. *	Can be used on ZU4-Series torque wrench pumps
SBZ-4	1 and 1.75 gallon ¹⁾
SBZ-4L	1 and 1.75 gallon ²⁾

* Add suffix **K** to pump model number for factory installation.

¹⁾ Without heat exchanger 4.9 lbs.
²⁾ With heat exchanger 7.0 lbs.

Ordering Example:
Model No. ZU4208TB-QK

Roll Cage

- Protects pump
- Provides greater pump stability

4-Wrench Manifold

- For simultaneous operation of multiple torque wrenches
- Can be factory installed or ordered separately

Accessory Kit No. *	Can be used on ZU4-Series torque wrench pumps
ZRC-04	1 and 1.75 gallon reservoir ¹⁾
ZRC-04H	1 and 1.75 gallon reservoir ²⁾

* Add suffix **R** for factory installation.
¹⁾ For use with pumps without a heat exchanger fitted
²⁾ For use with pumps with a heat exchanger fitted

Ordering Example:
Model No. ZU4208BB-QR

Accessory Kit No. *	Can be used on ZU4-Series torque wrench pumps
ZTM-E	for 11,600 psi torque wrenches
ZTM-Q	for 10,000 psi torque wrenches

* Add suffix **M** to pump model number for factory installation.

Ordering Example:
Model No. ZU4208TB-QM

▼ Shown: ZE4204TB-QHR

Z Resistente.
Confiable.
Diseño Innovador.
CLASSIC

- Auto cycle feature provides continuous cycle operation of the torque wrench as long as the advance button is pressed (Pump can be used with or without auto)
- LCD readout provides pressure and torque display and a number of diagnostic and readout capabilities never before offered on a portable electric pump
- Totally enclosed, fan-cooled industrial electric motors supply extended life and stand up to harsh industrial environments
- High-strength, molded electrical enclosure protects electronics, power supplies and LCD readout from harsh environments

Back-lit LCD Display

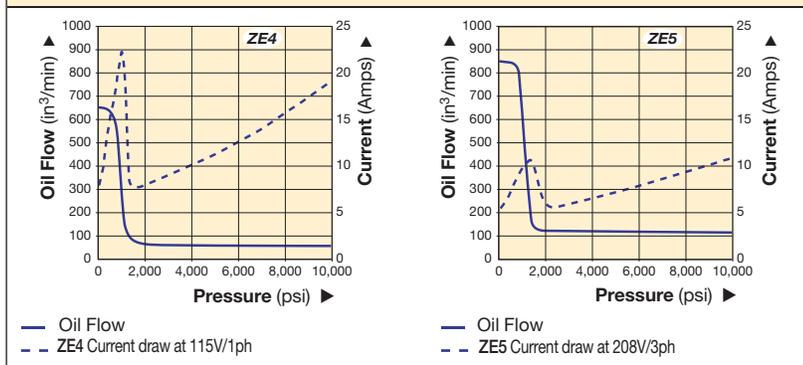

- Digital pressure or torque read-out
- Programmable "Auto-Cycle" setting
- "Auto-Cycle" setting easily programmable
- Torque wrench model is selectable
- Display torque in Nm or Ft.lbs
- Pump usage information, hour and cycle counts
- Low-voltage warning and recording
- Self-test and diagnostic capabilities
- Information can be displayed in English, French, German, Italian, Spanish and Portuguese
- Pressure transducer is more accurate and durable than analog gauges

◀ The ZE4 torque wrench pumps are perfectly matched for this W2000X wrench.

ZE Series Electric Torque Wrench Pumps

ZE4 and ZE5 Oil Flow and Current vs. Pressure

ZE4T
ZE5T
Series

Reservoir Capacity:

1.0 -10 gal.

Flow at 10,000 psi:

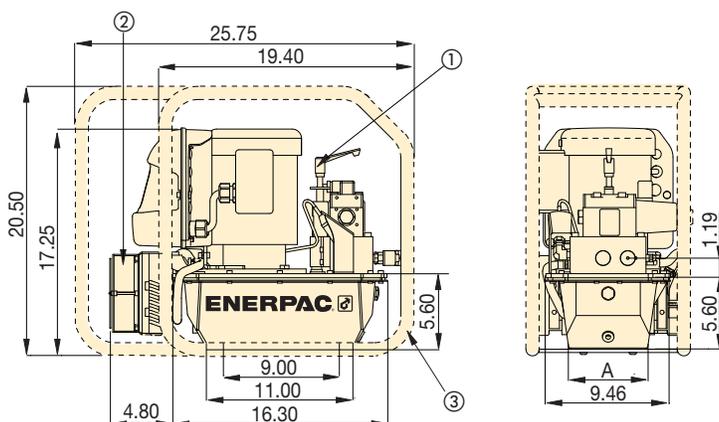

60-120 in³/min.

Motor Size:

1.5-3.0 hp

Maximum Operating Pressure:

10,000 and 11,600 psi

Reservoir Size (useable gallons)	A (in)
1	6.0
1.75	8.1

Dimensions shown in inches.

- ① User adjustable relief valve
- ② Heat Exchanger (optional)
- ③ Roll cage (optional)

Accessory Options

A full list of optional accessories can be found in the ZU4 section.

▼ PERFORMANCE CHART

Pump Series	Output Flow Rate (in ³ /min)				Motor Size		Relief Valve Adjustment Range (psi)	Sound Level (dBA)
	100 psi	700 psi	5,000 psi	10,000 psi	hp	RPM		
ZE4T	650	600	62	60	1.5	1750	1000 - 11,600	75
ZE5T	850	825	123	120	3.0	1750	1000 - 11,600	75

Flow rate will be approximately 5/6 of these values at 50 Hz.

Twin Torque Wrench Hoses

Use Enerpac **THQ-700** series twin hoses with 10,000 psi pumps, or use **THC-700** series twin hoses with 11,600 psi pumps.

10,000 psi	
19.5 feet long, 2 hoses	THQ-706T
39 feet long, 2 hoses	THQ-712T
11,600 psi	
19.5 feet long, 2 hoses	THC-7062
39 feet long, 2 hoses	THC-7122

▼ Shown: TQ-700E

- **Optimized flow technology three stage pump maximizes productivity of the pump and tool while minimizing heat build-up and downtime**
- **Heat exchanger is standard**
- **A quiet (<85 dBA), lightweight pump with a compact footprint – easy to move around**
- **Durable roll cage with an ergonomically sized handle and shielded gauge**
- **Maintenance made simple with a brushless motor designed for continuous usage**
- **Straightforward operation with a simple pressure set and convenient to use 20 ft. pendant cord**
- **IP55 Rating for superior dust and water protection**
- **Transparent gauge overlays in Ft.lbs and Nm for all Enerpac S and W-Series torque wrenches provide a quick torque reference**

Lightweight Torque Wrench Pump

Optimized for S-Series and W-Series Hydraulic Torque Wrenches

Enerpac offers a complete range of square drive and hexagon cassette torque wrenches.

Page: 6 & 12

Pendant Control

The TQ-700 comes equipped with a 20-foot pendant cord which allows the user to pressurize the pump from a distance increasing productivity and speed of setup.

Four Port Manifold

The TQ-700 Classic offers an optional four wrench manifold as an accessory (TQM) factory installed. (Add suffix

“M” at the end of the model number. For example: **TQ700EM**)

Twin Torque Wrench Hoses

Use Enerpac **THQ-700** series twin hoses with 10,000 psi pumps.

10,000 psi	
19.5 feet long, 2 hoses	THQ-706T
39 feet long, 2 hoses	THQ-712T

The TQ-700E and the W-Series wrenches are a productive combination in wind applications. ►

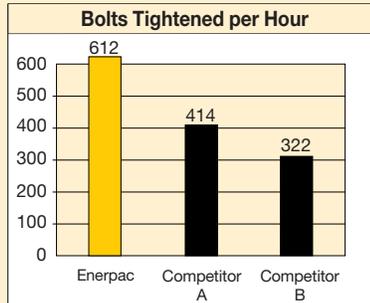

TQ-700 Series Pump Applications

The TQ-700 Series pump is ideal for powering hydraulic wrenches for the Power Generation and Wind Markets.

The TQ-700 has been engineered with **Optimized Flow Technology** to deliver up to 50% faster bolt tightening than competing pumps.

Bolting speed is more complex than how much flow per minute the pump produces. The key is optimizing the flow rate across the entire bolting cycle. With more oil flowing at the right time and at the right volume, you achieve the optimized flow for a hydraulic bolting system. The result of

this optimized flow is more bolts tightened faster and a more productive work team.

Internal laboratory testing based on standard torquing procedure on a pipe flange with 14, 1 1/8" bolts.

TQ Series

Reservoir Capacity:

1 gallon

Maximum Operating Pressure:

10,000 psi

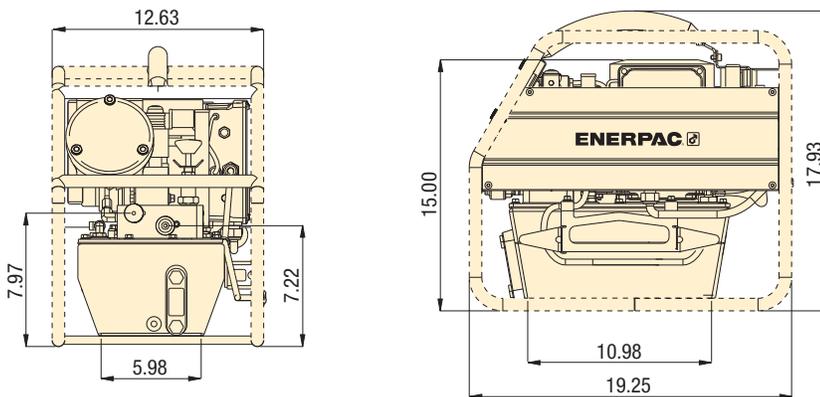

FS-Series Spreaders

FS-Series Flange Spreaders provide quick and easy joint separation using hydraulic or mechanical force.

Page: 68

Dimensions shown in inches.

Nut Splitters / Nut Cutters

Remove rusted or corroded nuts easily with Enerpac Nut Cutters. Hexagon nut capacities up to 5.38 inches AF.

Page: 65

IP55 Rating for Superior Dust and Water Protection

The IP Code (or Ingress Protection Rating) classifies and rates the degrees of protection provided against the intrusion of solid objects and water in mechanical casings and electrical enclosures.

An IP55 rating means the TQ-700 offers complete protection against contact with mechanical and electrical components, and that dust will not enter in a sufficient quantity to interfere with the operation of the equipment.

The IP55 rating also means water jets sprayed against the TQ-700 from any direction will not have any harmful effects.

Performance	For Use with Torque Wrenches		Pressure Rating (psi)	Model Number ¹⁾	Motor Electrical Specification	Usable Oil Capacity (gal)	Weight (no oil) (lbs)
Optimal	S1500X	W2000X	10,000	TQ-700B	115V-1 ph, 50 / 60 Hz	1	68
	S3000X	W4000X					66
Acceptable	S6000X	W8000X		TQ-700E ²⁾	230V-1 ph, 50 Hz		66
	S11000X	W15000X		TQ-700I ³⁾	230V-1 ph, 60 Hz		66
S25000X	W22000X						
		W35000X					

1) All models meet CE safety requirements and all TÜV requirements
 2) European plug and CE EMC directive compliant
 3) With NEMA 6-15 plug

▼ Shown: PTA-1404

- Compact and portable
- Handle located directly over pump's center of gravity for greater ease in carrying
- High bypass (1800 psi) for faster torque cycles
- High power-to-weight ratio suits all Enerpac torque wrenches
- Glycerine filled pressure gauge with scales reading in psi/bar
- Transparent overlays in Ft.lbs and Nm for all Enerpac torque wrenches provide a quick torque reference
- Internal safety relief valve, factory preset
- 15 ft. air pendant assembly enables easy maneuvering at the job site

◀ *The compact PTA-Series pumps may easily be transported to jobsites, and are ideal for powering Enerpac torque wrenches such as this W-Series low profile tool.*

Two-Stage Power in a Portable Design

Pump Ratings

-**Q** suffix pumps are for 10,000 psi torque wrenches, and include spin-on couplers.

-**E** suffix pumps are for use with Enerpac SQD and HXD 11,600 psi torque wrenches, and include polarized locking safety couplers.

Twin Torque Wrench Hoses

Use Enerpac **THQ-700** series twin hoses with 10,000 psi pumps, or use **THC-700** series twin hoses with 11,600 psi pumps.

10,000 psi	
19.5 feet long, 2 hoses	THQ-706T
39 feet long, 2 hoses	THQ-712T
11,600 psi	
19.5 feet long, 2 hoses	THC-7062
39 feet long, 2 hoses	THC-7122

Gauge Overlay Kit

Gauge overlay kits are also available separately.

GT-4015 includes overlays for all SQD and HXD torque wrenches.

GT-4015-Q includes overlays for all S- and W-Series torque wrenches.

Compact Pneumatic Torque Wrench Pump

PTA Series

Reservoir Capacity:

1 gal.

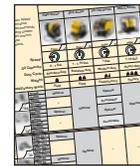

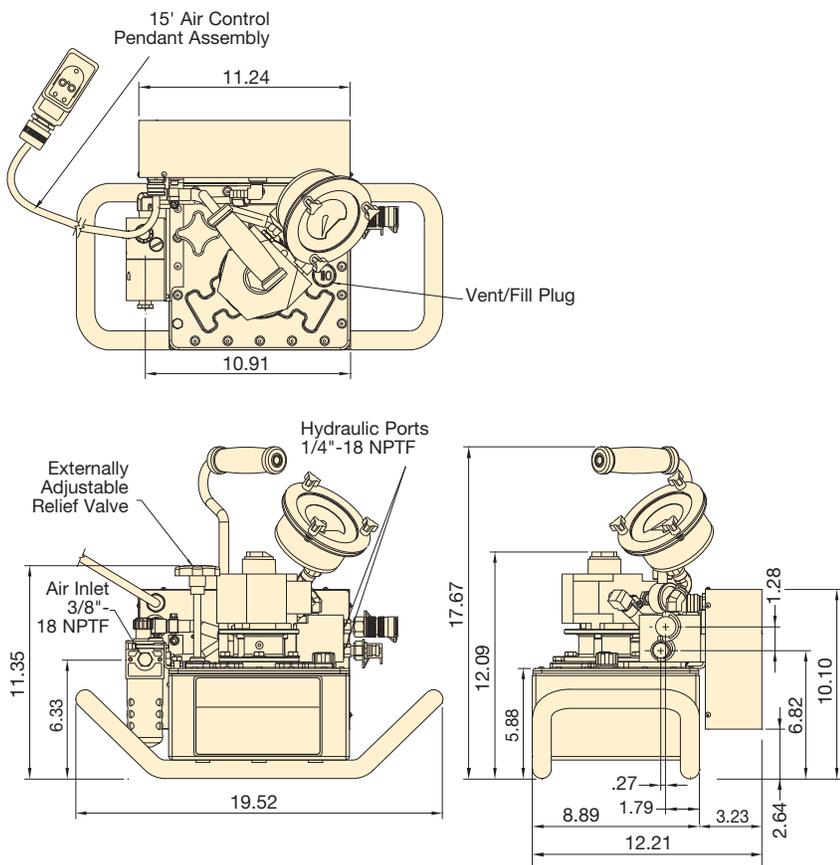

Flow at 10,000 psi:

20 in³/min.

Maximum Operating Pressure:

10,000 and 11,600 psi

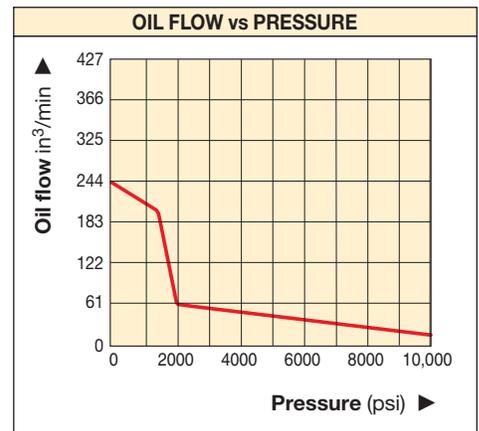

Dimensions shown in inches.

Gauge Overlay Kit

Gauge overlay kits are also available separately.

GT-4015 includes overlays for all SQD and HXD torque wrenches. **GT-4015-Q**

includes overlays for all S- and W-Series torque wrenches.

◀ Most hydraulic torque wrenches can be powered by the Enerpac ZA4-Series torque wrench pump.

ZA4-Series Pump Applications

The ZA4-Series pump is best suited to power medium to large size torque wrenches.

Patent-pending *Z-Class* technology provides high by-pass pressures for increased productivity. Its high power-to-weight ratio and compact design make it ideal for applications which require easy transport of the pump.

For further application assistance contact your local Enerpac office.

ATEX Certified

The ZA-series pumps are tested and certified according to the **Equipment Directive 94 / 9 / EC "ATEX Directive"**.

The explosion protection is for equipment group II, equipment category 2 (hazardous area zone 1), in gas and/or dust atmospheres. The ZA-series pumps are marked with: Ex II 2 GD ck T4.

ZA4T Series

Reservoir Capacity:

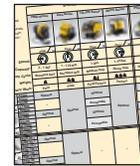

1 and 1.75 gal.

Flow at 10,000 psi:

60 in³/min.

Maximum Operating Pressure:

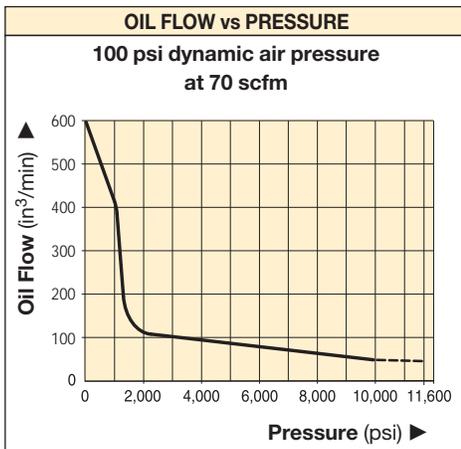

10,000 and 11,600 psi

Torque Wrench Pump Selection Matrix

For optimum speed and performance see the torque wrench, pump and hose selection matrix.

Accessory Options

Available by placing the following additional suffix at the end of the model number:

- K** = Skidbar
- M** = 4-wrench manifold
- R** = Roll cage

Page: **53**

Pump Ratings

-Q suffix pumps are for 10,000 psi torque wrenches, and include spin-on couplers.

-E suffix pumps are for use with Enerpac SQD and HXD 11,600 psi torque wrenches, and include polarized locking safety couplers.

COMMON PUMP MODELS

For Use With Torque Wrenches	Maximum Operating Pressure (psi)	Model Number ¹⁾	Usable Oil Capacity (gal)	Weight with Oil (lbs)
For all S- and W- Series (X-Edition)	10,000	ZA4204TX-Q	1.0	94
	10,000	ZA4208TX-Q	1.75	100
	10,000	ZA4204TX-QR	1.0	101
For all SQD- and HXD-Series	11,600	ZA4204TX-E	1.0	94
	11,600	ZA4208TX-E	1.75	100
	11,600	ZA4204TX-ER	1.0	101

¹⁾ All models meet CE safety requirements and all TÜV requirements.

▼ This is how a ZA4-Series pump model number is built up:

1 Product Type

Z = Pump Series

2 Motor Type

A = Air motor

3 Flow Group

4 = 60 in³/min @ 10,000 psi

4 Valve Type

2 = Torque Wrench Valve

5 Reservoir Size (useable capacity)

04 = 1.0 gallon

08 = 1.75 gallons

6 Valve Operation

T = Air operated valve with pendant

7 Voltage

X = Not applicable

8 Factory installed features and options

E = 11,600 psi coupler for use with HXD- and SQD-Series wrenches

Q = 10,000 psi coupler for use with S- and W-Series or other wrenches

K = Skidbar

M = 4-wrench manifold

R = Roll cage

How to order your ZA4-Series torque wrench pump

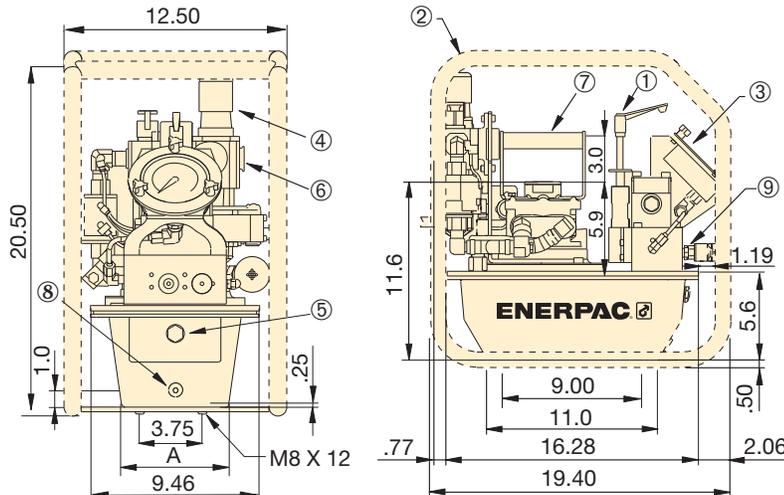

Ordering Example 1

Model No. ZA4208TX-QMR

10,000 psi pump for use with Enerpac S- and W-Series and other 10,000 psi torque wrenches, 1.75 gallon reservoir, 4-wrench manifold, and roll cage.

Refer to the torque wrench pump selection matrix for optimum wrench, pump and hose combinations.

Dimensions shown in inches.

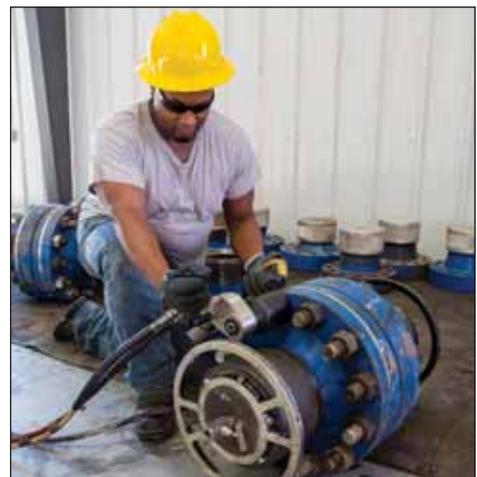

- ① User adjustable relief valve
- ② Roll bar cage (optional)
- ③ Gauge with overlays
- ④ Filter/lubricator/regulator
- ⑤ Oil level sight gauge
- ⑥ Air input 1/2" NPTF
- ⑦ Standard handle
- ⑧ Oil drain
- ⑨ 1/4"-18 NPTF Oil Outlet

GT Series

Bolt Range:
5/8" - 3 3/4" | M16-M95

Load:
0-319.8 tons

Maximum Operating Pressure
21,750 psi

How to Order

To provide maximum flexibility Load Cell and Bridges are ordered separately from

Adaptor Kits.

Example, to order a complete tensioner for a 1" threaded bolt order:

- 1 x Load Cell and Bridge: **GT1-LCB**
- 1 x Adaptor Kit: **GT1P-NRS1000U08**

Bolting Integrity Software

A comprehensive on-line software solution for Bolted Joint integrity.

Integral databases hold data for:

- BS1560, MSS SP44, API 6A and 17D flanged joints
- Common gasket materials and configurations
- Comprehensive range of bolt materials
- Comprehensive range of lubricants
- Enerpac's Controlled Bolting Equipment including: Torque Multipliers, Hydraulic Wrenches and Bolt Tensioning tools

Custom Joint information can also be entered.

The software offers Tool selection, Bolt Load calculations and Tool pressure settings, as well as, a combined Application data sheet and Joint completion report.

www.enerpac.com

▼ Shown: ZUTP-1500B

- High efficiency Universal Motor draws lower amps for superior performance in remote locations with low power quality
- Two-stage pump design provides high flow at low pressure for fast system fills and controlled flow at high pressure for safe and accurate operation
- Compact and lightweight design fits through tight openings and provides easy handling
- Panel mounted 6" pressure gauge, with polycarbonate cover, is set into the protective metal shroud for improved visibility and safety
- Panel mounted user adjustable valve for safe and precise pressure control
- Safety relief valve limits output pressure

◀ *The ZUTP-1500 pump is rugged, lightweight, compact for tight openings, and delivers hassle-free operation of bolt tensioning in remote locations with up to two times the speed of competitive pumps.*

Reliability, Power and Precision

Applications

The Enerpac ZUTP-Series electric pump is ideally suited for use with hydraulic bolt tensioning tools and hydraulic nuts.

54

Bolting Integrity Software

Visit www.enerpac.com to access our free on-line bolting software application and obtain information on tool selection, bolt load calculations and tool pressure settings. A combined application data sheet and joint completion report is also available.

Bolting Theory

See our "Yellow Pages" for information on torque tightening and tensioning.

Page: 74

ZUTP-Series, Electric Tensioning Pump

ZUTP Series Manual Valve

The ZUTP1500 series with manual valve provides higher flow rates than air-driven tensioner pumps for a fast and economic solution ideal for bolt tensioning applications not requiring single-person operation.

ZUTP Series

Reservoir Capacity:

1 gallon

Flow at Rated Pressure:

20.0 in³/min.

Maximum Operating Pressure:

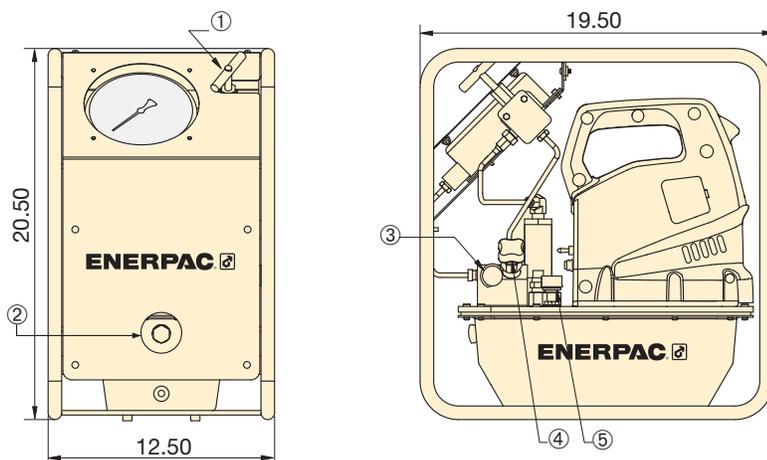

21,750 psi

Ultra-High Pressure

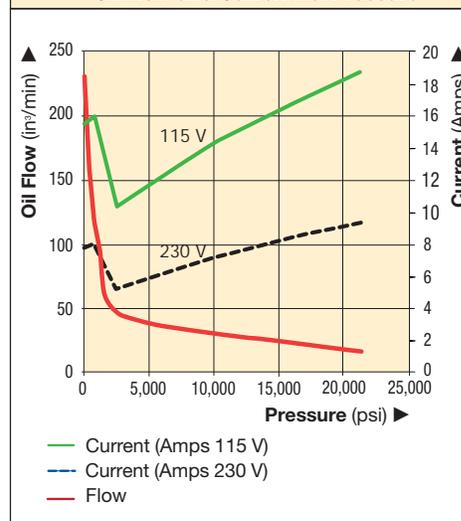

These products operate at ultra-high pressure, use only the specified fittings and hoses designed for these pressures.

			ZUTP-1500E ²⁾			230 VAC, 1-ph		
			ZUTP-1500I ³⁾			230 VAC, 1-ph		

¹⁾ All models meet CE safety requirements and all TÜV requirements.
²⁾ European plug and CE EMC directive compliant.

³⁾ With NEMA 6-15 plug.
⁴⁾ Add suffix "H" for factory installation of Heat Exchanger.

▼ Shown: ATP-1500

ATP Series

Reservoir Capacity:

1.0 gallon

Flow at Rated Pressure:

4 in³/min.

Maximum Operating Pressure:

21,750 psi

These products operate at ultra-high pressure, use only the specified fittings and hoses designed for these pressures.

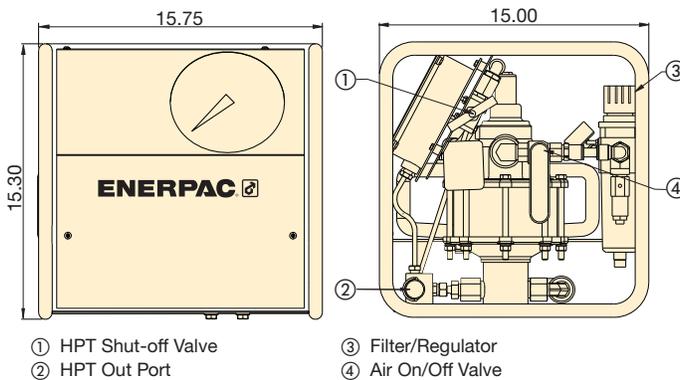

Page: 59

- General purpose, high pressure air driven pump unit for products requiring up to 21,750 psi hydraulic pressure
- Compact, lightweight, rugged steel frame for protection and easy handling
- Prelubricated pump element, does not require an airline lubricator
- Easily adjustable output pressure control
- Integrated and protected easy to read glycerin filled gauge
- Safety relief valve limits output pressure

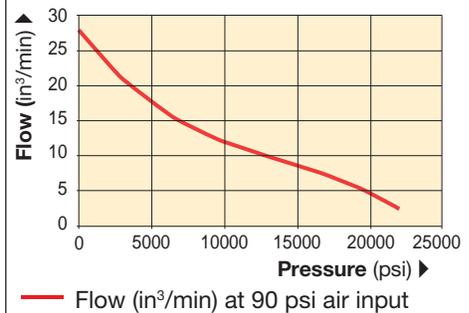

ATEX Certified

The ATP-series pump was tested and certified according to the Equipment Directive 94 / 9 / EC "ATEX Directive". The explosion protection is for equipment group II, equipment category 2 (hazardous area zone 1), in gas and/or dust atmospheres. The ATP-series pump is marked with: Ex II 2 GD ck T4.

Ex II 2 GD ck T4
IBExU 070/10

FLOW CHART

HPT Series

Reservoir Capacity:

155 in³

Flow at 10,000 psi:

.037-.99 in³/stroke

Maximum Operating Pressure:

21,750 psi (1500 bar)

Applications

The Enerpac HPT high-pressure Hand Pump is ideally suited for use with hydraulic bolt tensoning tools and hydraulic nuts.

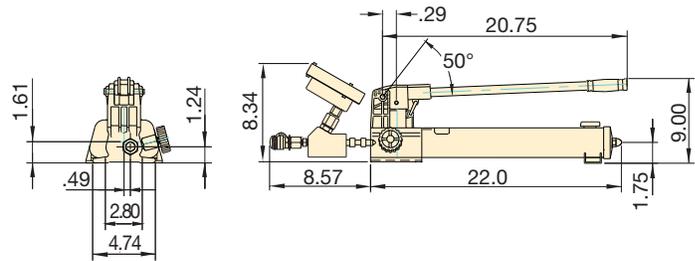

Page: **54**

Ultra-High Pressure

These products operate at ultra-high pressure, use only the specified fittings and hoses designed for these pressures.

- Lightweight and portable high-pressure hand pump
- Two-speed operation displaces a larger volume of oil per stroke, reducing cycle times for many testing applications
- Includes a gauge and coupler for direct connection to GT-Series bolting tools
- Integrated relief valve set at 21,750 psi

▼ From left to right: **ATM-4**, **ATM-9**, **ATM-2**

The faster, simpler and safer way to align flanges

- Enerpac ATM-Series tools rectify twist and rotational misalignment quickly, safely, and without the need for an external power source
- Appropriate for use on most ANSI, API, BS and DIN flanges
- No slings, hooks or lifting gear required
- Can be installed and used in any position (horizontally or vertically)
- Portable, lightweight design enables easy transport and use, even in remote locations
- Each ATM-model contains a tool and kit box

Adjustable Reach

The highly adjustable reach of the wing and drop leg on the **ATM-4** and **ATM-9** allows precise alignment.

Gauge and Adaptor

The ATM-9 includes P-142 hand pump and HC-7206C 6 ft. long hose. Enerpac recommends the use of the GA45GC pressure gauge, adaptor and coupler assembly for easy mounting and viewing angle.

▼ The compact ATM-2 mechanical alignment tool aligns small flanges in a matter of seconds.

▼ The ATM-9 is shown here with optional pressure gauge and gauge adaptor.

Flange Alignment Tools

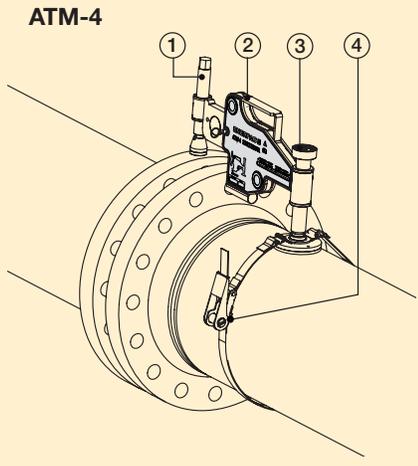

Applications

Enerpac's ATM-Series Tools help correct flange misalignment and allow bolts to be placed into joints. This alignment takes place during pipe work construction or maintenance.

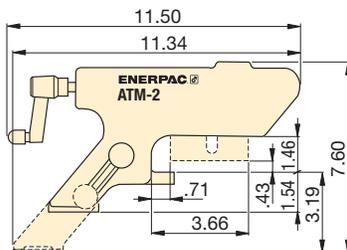

These tools provide pipe installers and maintenance personnel with some of the simplest, safest and most productive solutions available for flange alignment in the market today.

- ① Extendable wing provides usage on wide variety of flanges.
- ② Portable, light-weight design enables easy transport and use.
- ③ Hand-adjustable base for easy positioning by a single operator.
- ④ Safety strap helps provide secure operation from a horizontal or vertical position.

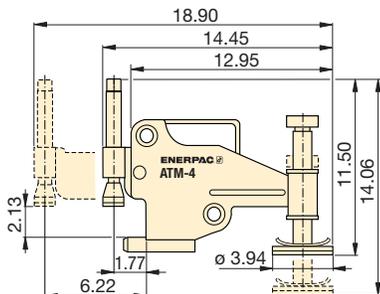

All dimensions shown in inches.

* ATM-9 includes an Enerpac hand pump and hydraulic hose (which operate at a maximum pressure of 10,000 psi) - gauge and adaptor sold separately.

** ATM-9 weight includes tool only.

ATM Series

Minimum Bolt Size:

.63 - 1.24 inches

Flange Wall Thickness:

.55 - 9.00 inches

Maximum Lifting Force:

1 - 10 ton (10 - 90 kN)

Cylinder-Pump Sets

Hydraulic cylinders, jacks and lifting wedges can also be used to assist in pipe line positioning and aligning.

Page: 62

Pipe Flange Face Tool

The portable, hand-powered tool FF-120 makes even the hardest to reach pipe flanges resurfaceable in a safe and convenient way.

Page: 71

▼ The ATM-Series - the faster, simpler and safer way to align flanges.

▼ Shown cylinder-pump set: **SCR-1010H**

The Quickest and Easiest Way to Start Working Right Away

LW-16 Lifting Wedge

Hydraulic cylinders, jacks and lifting wedges can also be used to assist in positioning and aligning.

The LW-16 only requires an access gap of .39 inch. See our "Specialty Tools" section on www.enerpac.com.

- Optimum match of individual components
- All sets are ready to use and include single-acting cylinder, two-speed pump, 6 foot safety hose, calibrated gauge with gauge adaptor
- RC-Series DUO, general purpose cylinders for maximum versatility
- RCS-Series, low height cylinders for maximum versatility
- RCH-Series hollow cylinders for pushing and pulling

▼ EVO-8 (shown with optional cylinders and wire stroke sensors)

- Modular lifting system to control 4, 8 or 12 lifting points
- Can be networked to link up to 4 systems together (requires separate master control box)
- Intuitive user interface provides easy set-up and control with multiple lifting options
- Accuracy of 0.040" between leading and lagging cylinders
- Data storage and recording capabilities
- For use with standard single- or double-acting cylinders
- Built in warning and stop alarms for optimum safety
- Variable frequency electric motor for optimal flow control
- Two flow groups available to operate a wide range of cylinders
- EVO-B is a modular design allowing for use of existing Enerpac pumps

EVO Series

Number of Lift Points:
4-12 points

Accuracy Over Full Stroke:
Up to 0.040"

Ease of Operation

- A single operator controls the entire operation
- User friendly interface: visual screens, icons, symbols and color coding

Enerpac's family of EVO synchronous lifting systems provides precision control and levels of force suitable for most lifting/lowering applications.

We can also provide custom systems tailored to unique project requirements.

The standard EVO system can support up to 12 lifting points, or be networked up to 48 points, and includes features such as center of gravity and tilting/weighing capabilities. It is a comprehensive self-contained design that features simple to use software that is extremely efficient at completing basic to complex applications.

The modular EVO-B system is a modular design that allows for utilization of existing Enerpac pumps. EVO-B offers an economical solution to basic applications requiring a maximum of 8 lifting points.

Used for aligning large flanged structures such as hydraulic excavators or dragline slew rings.

◀ Shown: Dragline joint separation using Enerpac Synchronous Lifting System.

Hydraulic Nut Cutters

▼ Shown from left to right: NC-3241, NC-1319, NC-1924

NC, STN Series

Capacity:
5-90 tons

Hexagon Nut Range:
0.5-2.88 inches

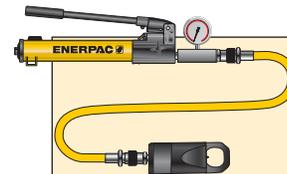

Maximum Operating Pressure:
10,000 psi

Enerpac Nut Cutters

Nut Cutters include a spare chisel, a spare set screw and the wrench used to secure the chisel. A CR-400 coupler is standard.

- Compact and ergonomic design, easy to use
- Unique angled head allows flush access
- Single-acting, spring return cylinder
- Heavy-duty chisels can be reground
- Applications include servicing trucks, piping industry, tank cleaning, petrochemical, steel construction and mining

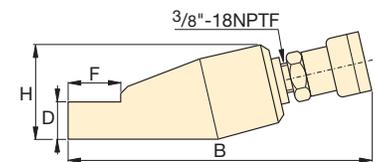

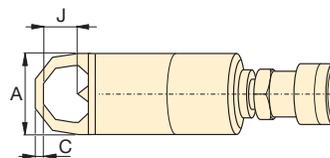

Nut Cutter Sets

Hydraulic Nut Cutters are available as sets (pump, tool, gauge, adaptor and hose).

Ordering Notes: Maximum allowable hardness to split is HRc-44. Not to be used on square nuts. Larger sizes available upon request.

* Available as Tool-Pump set, see note on this page.

▼ Shown: NS-7080, NS-70105

- Specially designed to suit standard ANSI B16.5 / BS1560 flanges
- Single-acting, spring return cylinder
- Tri-blade technology provides three cutting surfaces on a single blade
- Interchangeable heads provide maximum nut range flexibility
- Preset scale allows controlled blade extension, which avoids damage to bolt threads
- Grip tape and handle included for more secure maneuverability
- Nickel-plated cylinder body for excellent corrosion protection and improved durability in harsh environments
- Internal Pressure Relief Valve for overload protection

◀ Heavily corroded and weathered nuts are quickly split and removed using an NS-Series Nut Splitter.

Power and Precision

High Performance Nut Splitter

Blade Cutting Depth Scale

Adjustable cutting depth scale for controlled blade extension, which avoids damage to bolt threads.

The scale indicates the bolt range in metric and imperial values on each cutting head.

Hydraulic Nut Cutters

The NC-Series models are available featuring an angle-head design for 0.50"-2.88" hexagon nuts.

Page: 65

FS-Series Spreaders

FS-Series Flange Spreaders provide quick and easy joint separation using hydraulic or mechanical force.

Page: 68

ATM Flange Alignment Tools

The ATM series provides safe high-precision flange alignment tools that fit

most commonly used ANSI, API, BS, and DIN flanges.

Page: 60

Fine Thread Feed Screw

Accessory Kit **FF120FSF** is included as standard and provides a fine thread feed screw, 1/2"-20 UNF, and delivers a Ra of:
60-100 µin (1,52-2,54 µm)

▼ The Enerpac FF120 Quick Face has same precision and quality of finish as powered machines.

Enerpac “Yellow Pages” stand for Hydraulic Information!

If selecting hydraulic equipment is not your daily routine then you will appreciate these pages. The “Yellow Pages” are designed to help you work with hydraulics. They will help you to better understand the basics of hydraulics, of system set-ups and of the most commonly used hydraulic techniques. The better your choice of equipment, the better you will appreciate hydraulics. Take the time to go through these “Yellow Pages” and you will benefit even more from Enerpac High Pressure Hydraulics.

ENERPAC WARRANTY STATEMENT

www.enerpac.com

Visit our website for the complete Enerpac Global Warranty or call your Enerpac representative or Enerpac Authorized Service Center.

Enerpac is certified for several quality standards. These standards require compliance with standards for management, administration, product development and manufacturing.

Enerpac works hard to maintain the ISO 9001 quality rating, in its ongoing pursuit of excellence.

CE Marking & Conformity

Enerpac provides Declarations of Conformity, Declarations of Incorporation, and CE marking for products that conform to the European Community Directives.

Where specified, Enerpac electric power units meet the design, assembly and test requirements of The Standards Council of Canada (CAN C22.2 No. 68-92), and UL73 for the United States. Units were tested and certified for both USA and Canada by TUV and by CSA, nationally recognized testing laboratories.

EMC Directive & by CSA

Where specified, Enerpac electric power pumps meet the requirements for Electromagnetic Compatibility per EMC Directive 2004/108/EC.

DEKRA & IBEx ATP-1500, ZA and XA-Series air-motor driven pumps, and S- and W-Series Torque Wrenches are tested and certified according to the Directive 2014 / 34 / EU “ATEX Directive”. The explosion protection is for equipment group II, equipment category 2 (hazardous area zone 1), in gas and/or dust atmospheres. ATP-1500, ZA and XA-Series pumps are marked with: Ex II 2 GD ck T4.

ASME B30.1-2004

Our cylinders fully comply with the criteria set forth by the American Society of Mechanical Engineers (except RD, BRD, CLL, CLS and CLP-Series).

ISO1402, ISO4672, ISO6803

Enerpac thermoplastic hoses are related to the criteria set forth in these standards.

Product Design Criteria

All hydraulic components are designed and tested to be safe for use at maximum 10,000 psi unless otherwise specifically noted.

Function of Bolts and Nuts

Threaded fasteners are used across industry to assemble products ranging from pipelines to heavy-duty earth movers and from cranes to bridges and many more. Their principle function is to create a clamping force across the joint which is able to sustain the operating conditions without loosening.

Correctly tightened bolts make use of their elastic properties, to work well they must behave like springs. When load is applied, the bolt stretches and tries to return to its original length. This creates compressive force across the joint members.

Hooke's Law of Physics

Behavior of Bolts and Nuts

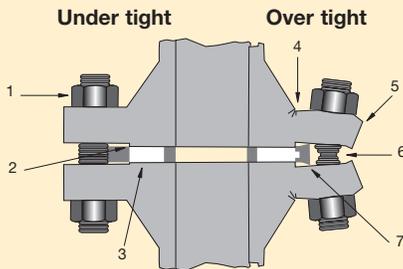

Elasticity is defined in Hooke's Law of physics: The stress in a bolt is directly proportional to its strain. The stress-strain of a bolt has an **elastic range** and a **plastic range**. In the elastic range Hooke's Law is true.

All of the elongation applied within the elastic range is relieved when the load is removed. The amount of elongation increases when more load is applied. When a bolt is stressed beyond its **proof load** (maximum load under which a bolt will behave in an elastic manner), the elastic elongation changes to plastic deformation and the strain will no longer be proportional to the stress.

In the plastic deformation a part of the elongation will remain after the load is removed. The point where this permanent elongation occurs is called the yield strength. The further application of load takes the bolt to a point where it begins to fail this is termed its **ultimate tensile strength (UTS)**. At this UTS-point, if additional force is applied to the bolt it will continue to elongate until it finally breaks. The point at which the bolt breaks is called the **tensile point**.

Careful attention must be paid to the grade of bolt being used as bolt grades differ in the elastic range.

Uniform preload (residual load)

1. Bolt loosens due to cycle loads of vibration.
2. Sealing face surface damage.
3. No compression.
4. Cracking.
5. Flange rotation.
6. Yielding of bolts.
7. Over compression of gasket.

Preload

The main purpose of a bolt and nut is to clamp parts together with the correct force to prevent loosening in operation. The term **preload** refers to the loading in a bolt immediately after it has been tightened.

The amount of preload (residual load) is critical as the joint can fail if the load in the bolt is too high, too low or not uniform in every bolt.

Uneven bolt loads can result in:

- Some bolts being loose while others are overloaded.
- Crushing of the gasket on one side, leakage on the other side.

Preload is normally dictated by the joint design, (see Enerpac Bolted Joint Integrity) for information on common joint types or contact your local representative.

Tightening Methods

Principally there are two modes of tightening: "Uncontrolled" and "Controlled".

Uncontrolled tightening

Uses equipment and/or procedures that cannot be measured. Preload is applied to a bolt and nut assembly using a hammer and spanner or other types of impact tools.

Controlled tightening

Employs calibrated and measurable equipment, follows prescribed procedures and is carried out by trained personnel. There are two main techniques: Torque tightening and Bolt tensioning.

- 1) **Torque tightening** - Achieves preload in a bolt and nut assembly via the nut in a controlled manner using a tool.
- 2) **Bolt tensioning** - Achieves preload in a bolt and nut assembly by stretching the bolt axially using a tool.

Advantages of Controlled Tightening

Known, controllable and accurate bolt loads

Employs tooling with controllable outputs and adopts calculation to determine the required tool settings.

Uniformity of bolt loading

Especially important on gasketed joints as an even and consistent compression is required for the gasket to be effective.

Safe operation following prescribed procedures

Eliminates the dangerous activities of manual uncontrolled tightening and requires that the operators be skilled and follow procedures.

Reduces operational time resulting in increased productivity

Reduces tightening time and operator fatigue by replacing manual effort with the use of controlled tooling.

Reliable and repeatable results

Using calibrated, tested equipment, following procedures and employing skilled operators achieves known results consistently.

The right results first time

Many of the uncertainties surrounding in-service joint failures are removed by ensuring the correct assembly and tightening of the joint are carried out the first time.

Bolting Integrity Software

A comprehensive on-line software solution for Bolted Joint Integrity.

Integral databases hold data for:

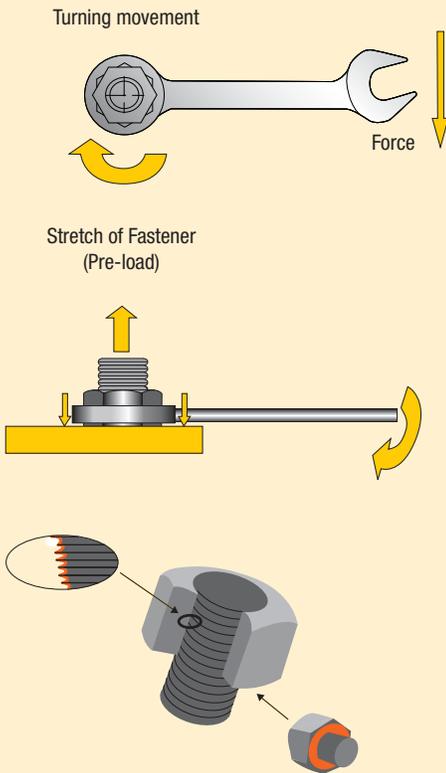

- BS1560, MSS SP44, API 6A and 17D flanged joints
 - Common gasket materials and configurations
 - Comprehensive range of bolt materials
 - Comprehensive range of lubricants
 - Enerpac's Controlled Bolting Equipment including: Torque Multipliers, Hydraulic Wrenches and Bolt Tensioning tools
- Custom Joint information can also be entered.

The software offers Tool selection, Bolt Load calculations and Tool pressure settings, as well as, a combined Application data sheet and Joint completion report.

Visit www.enerpac.com to access our free on-line bolting software application and obtain information on tool selection, bolt load calculations and tool pressure settings. A combined application data sheet and joint completion report is also available.

Torque Tightening

Friction points should always be lubricated when using the torque tightening method.

What is Torque?

It is a measure of how much force acting on an object which causes that object to rotate.

What is Torque Tightening?

The application of preload to a fastener by the turning of the fastener's nut.

Torque Tightening and Preload

The amount of preload created when torquing is largely dependant on the effects of friction.

Principally there are three different "torque components":

- torque to stretch the bolt
- torque to overcome the friction in bolt and nut threads
- torque to overcome friction at the nut spot face (bearing contact surface).

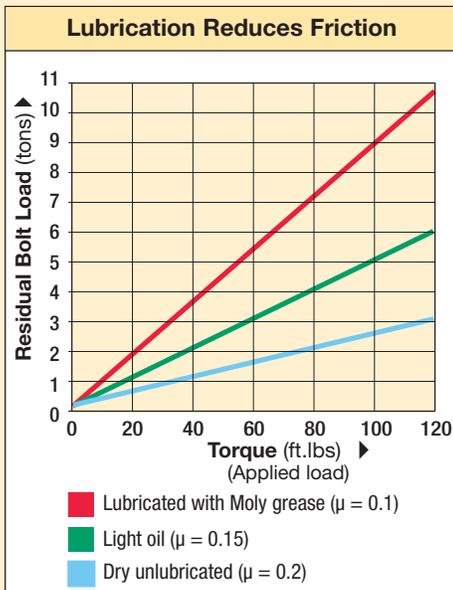

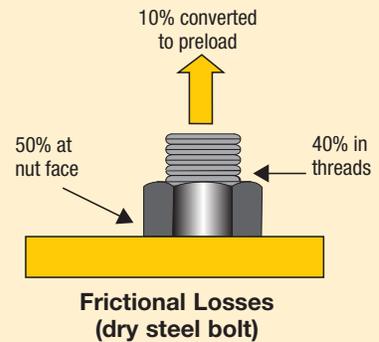

$$\text{Preload (residual load)} = \text{Applied Torque} \textit{ minus} \text{ Frictional Losses}$$

Lubrication Reduces Friction

Lubrication reduces the friction during tightening, decreases bolt failure during installation and increases bolt service life. Variation in friction coefficients affect the amount of preload achieved at a specified torque. Higher friction results in less conversion of torque to preload. The value for the friction coefficient provided by the lubricant manufacturer must be known to accurately establish the required torque value.

Lubricant or anti-seizure compounds should be applied to both the nut bearing surface and the male threads.

Frictional Losses

Example of how a lubricant can reduce the effect of friction and convert more torque to bolt preload.

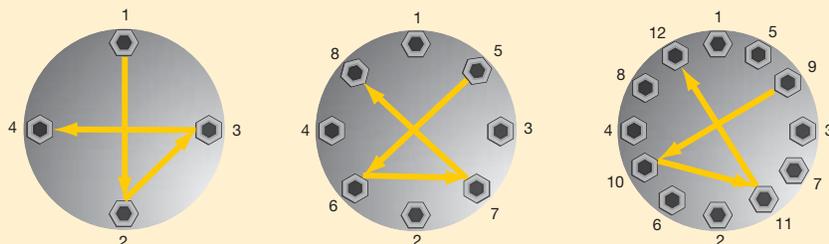

**Manufacturer's rating of pressure and torque are maximum safe limits.
Good practice encourages using only 80% of these ratings!**

Torque Procedure

When torquing it is common to tighten only one bolt at a time, this can result in Point Loading and Load Scatter. To avoid this, torque is applied in stages following a prescribed pattern:

Torque Sequence

- Step 1:** Spanner tight ensuring that 2-3 threads extend above nut
- Step 2:** Tighten each bolt to **one-third** of the final required torque following the pattern as shown above.
- Step 3:** Increase the torque to **two-thirds** following the pattern shown above.

- Step 4:** Increase the torque to **full torque** following the pattern shown above.
- Step 5:** Perform one final pass on each bolt working clockwise from bolt 1, at the full final torque.

Select the Correct Wrench

Choose your Enerpac torque wrench using the untightening rule of thumb:

- When loosening a nut or bolt more torque is usually required than when tightening.
- For general conditions it can take up to 2½ times the input torque to breakout.
- Do not apply more than 75% of the maximum torque output of the tool when loosening nuts or bolts.

Conditions of Bolted Joints

- Humidity corrosion (rust) requires up to twice the torque required for tightening.
- Sea water and chemical corrosion requires up to 2½ times the torque required for tightening.
- Heat corrosion requires up to 3 times the torque required for tightening.

Minimum Output Torque

- The recommended minimum torque value of a hydraulic wrench is 10% of the maximum rated value.

Breakout Torque

When loosening bolts a torque value higher than the tightening torque is normally required. This is mainly due to corrosion and deformations in the bolt and nut threads.

Breakout torque cannot be accurately calculated, however, depending on conditions it can take up to 2½ times the input torque to breakout.

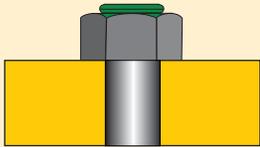

The use of penetrating oils or anti-seize products is always recommended when performing breakout operations.

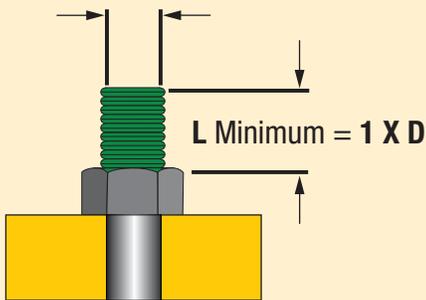

Tensioning requires longer bolts

INCORRECT

CORRECT

What is Bolt Tensioning

Tensioning is the direct axial stretching of the bolt to achieve **preload**. Inaccuracies created through friction are eliminated. Massive mechanical effort to create torque is replaced with simple hydraulic pressure. A uniform load can be applied by tensioning multiple studs simultaneously.

Tensioning requires longer bolts, and a seating area on the assembly around the nut. Tensioning can be done using detachable Bolt Tensioners or Hydraulic Nuts.

Preload (residual load) = Applied Load minus Load Losses

What is Load Loss

Load loss is a loss of bolt elongation depending on factors such as thread deflections, radial expansion of the nut, and embedding of the nut into the contact area of the joint. Load loss is accounted for in calculation and is added to the preload value to determine the initial **Applied Load**.

The preload depends on Applied Load and Load Loss (load loss factor).

GLOSSARY OF TERMS

Applied Load: The load applied to a bolt during tensioning which includes an allowance for Load Loss.

Bolt Tensioning: A method of controlled tightening which applies preload to a bolt by stretching it axially.

Breakout Torque: The amount of torque required to loosen a tightened bolt. (Usually more torque is required to loosen a bolt than was used to tighten it.)

Elastic Range: The range on a bolt's stress / strain curve where stress is directionally proportional to strain.

Load Loss: The losses in a bolt which occur on transfer of load from a tensioning device to the bolt assembly (these may arise from phenomena such as thread deflection and embedding of

the nut to the contact area of the joint, and is calculated as a factor of the length to diameter ratio of the bolt).

Load Scatter: The spread of differing loads in a sequence of bolts after they have been loaded. It is mostly due to the elastic interaction of the bolts and the joint member; as subsequently tightened bolts further compress the joint, previously tightened bolts are subject to some relaxation.

Plastic Range: The range on a stress/strain curve where the tensile load applied to a bolt results in permanent deformation.

Preload: The load in a bolt immediately after it has been tightened.

Proof Load: Proof load is often used interchangeably with Yield Strength but is usually measured at 0.2% plastic strain.

Tensile Point: The point at which the tensile loading on a bolt causes the bolt to rupture.

Torque Tightening: The application of Preload to a bolt by turning of the bolt's nut.

Ultimate Strength: The maximum tension which can be created by tensile load on a bolt.

Yield Strength: The point at which a bolt begins to plastically deform under tensile loading.

NOTE: Bolt is used as a generic term for a threaded fastener.

Manufacturer's rating of pressure and load are maximum safe limits. Good practice encourages using only 80% of these ratings!

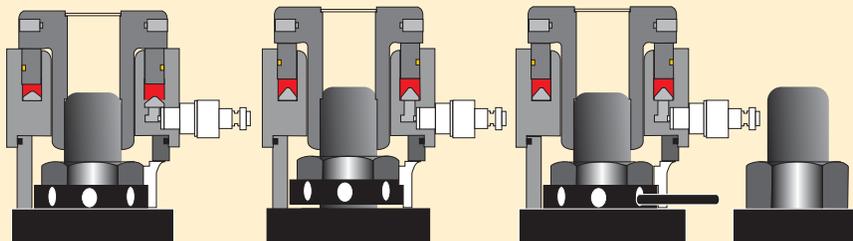

Tensioning Operation

Tensioning permits the simultaneous tightening of multiple bolts; the tools are connected in sequence via a high-pressure hose assembly to a single pump unit. This ensures each tool develops the exact same load and provides a uniform clamping force across the joint. This is especially important for pressure containing vessels requiring even gasket compression to affect a seal.

General Procedure

- Step 1:** The bolt Tensioner is fitted over the stud
- Step 2:** Hydraulic pressure is applied to the tensioner which then stretches the stud.
- Step 3:** The Stud's nut is wound down against the joint face
- Step 4:** Pressure is released and the tool removed.

The bolt behaves like a spring, when the pressure is released the bolt is under tension and attempts to contract, creating the required clamping force across the joint.

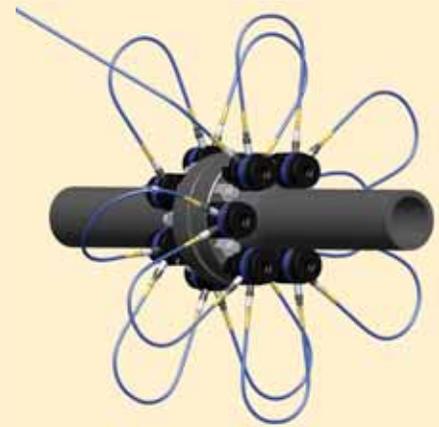

Step 1

Step 2

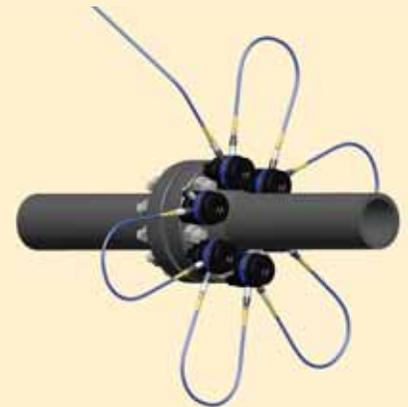

Step 3

Step 4

Set-up using a 100% tensioning procedure

All bolts are tensioned simultaneously.

Set-up using a 50% tensioning procedure

Half the bolts are tensioned simultaneously, the tools are relocated on the remaining bolts and they are subsequently tensioned.

Less than 100% Tensioning

Not all applications allow for the simultaneous fit of a tensioning device on each bolt, in these cases at least two tensioning pressures are applied. This is to account for a load loss in those bolts already tensioned as the next sets are tightened. The load losses are accounted for in calculation and a higher load is applied to allow the first sets to relax back to the target preload.

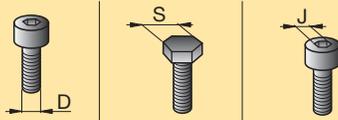

Read Instruction Manuals

Please refer to the product Instruction Sheets for safe use guidelines and detail on the correct set up and operation of the equipment.

The function of a hydraulic Torque Wrench, is to convert hydraulic pressure into torque. This chart is a “quick-reference” to help in determining what this conversion factor is. If you do not find your torque and pressure values in the chart, then the following conversion formulas can be used to find your theoretical torque value. The actual value may vary due to wrench condition and age.

T = P x T_F

P = T / T_F

Where: T = target torque

P = pressure

T_F = theoretical applied torque

Bolting Integrity Software

A comprehensive on-line software solution for Bolted Joint Integrity.

Integral databases hold data for:

- BS1560, MSS SP44, API 6A and 17D flanged joints
 - Common gasket materials and configurations
 - Comprehensive range of bolt materials
 - Comprehensive range of lubricants
 - Enerpac's Controlled Bolting Equipment including: Torque Multipliers, Hydraulic Wrenches and Bolt Tensioning tools
- Custom Joint information can also be entered.

The software offers Tool selection, Bolt Load calculations and Tool pressure settings, as well as, a combined Application data sheet and Joint completion report.

Enerpac Bolting Van

The Enerpac Bolting Service offers full bolting tool service and maintenance wherever you need it.

- Demonstrate Enerpac Bolting Tools on your premises
- Repair and calibrate all Bolting Tool brands
- Training for the safe and efficient use of Bolting Tools

Enerpac Academy

Enerpac Academy is our in-house training center, set up exclusively for Enerpac business partners, Enerpac users and Enerpac employees: training programs ranging from tool expertise, repairs and maintenance, to safe operation of high-pressure hydraulic tools.

ENERPAC manufactures high-force hydraulics (cylinders, pumps, valves, presses, pullers, tools, accessories and system components) for industry and construction and provides hydraulic workholding and OEM solutions to industries worldwide.

With an 80-year history of quality and innovation, the broadest line in the business, and more than 4,000 distributors and factory-trained service centers around the world, Enerpac leads the industry by setting new standards in design, strength, durability and local support. Strict quality programs, zero tolerance for defects, and ISO-9001 certification are your assurance of safe, trouble-free operation.

Enerpac is ready to tackle your toughest challenge and provide the hydraulic advantage you need to increase productivity, labor efficiency and speed of operation.

E327

E327, The Full Enerpac Industrial Tool Line

Ask for your free copy of the Enerpac Industrial Tools catalog for information about Enerpac High Force Tools. The catalog contains our full line of cylinders, pumps, tools, valves, bolting solutions, and accessories.

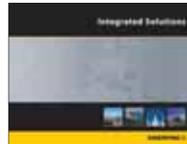

E215

E215 Workholding Catalog

Offers innovative products and solutions to provide powerful clamping and positioning force to every type of manufacturing process. Enerpac Workholding solutions increase product quality and production output.

#655

Integrated Solutions Capability Brochure

Enerpac's "Integrated Solutions" (IS) provides solutions to meet customer requirements for safe, precise control of movement and positioning of heavy loads. Enerpac IS combines hydraulics, steel fabrication and electronic control with engineering and application knowledge, to design and manufacture solutions that ensure customer projects are completed safely and efficiently. (#655)

E501

E501 UNI-LIFT® Catalog

Engineered solutions offering precision control in a mechanical package. UNI-LIFT® configurations provide up to 250 tons of force, travel lengths to 20 feet and speeds to 175 in / min. in the most demanding and rigorous environments across all industries and applications.
