

SpinetiX Fusion Software

Smart simplicity
and huge flexibility

Overview

SpinetiX Fusion runs inside HMP devices and allows publishing digital signage in minutes without any further software installation.

The combination of reliable HMP hardware, and Fusion embedded software makes SpinetiX the only complete all-in-one digital signage solution designed for SMEs like yours.

Simple to use

The SpinetiX Fusion Software is an incredibly easy to use application. Designed for small to medium facilities with a fast and efficient interface which allows anyone to create, manage and publish digital signage in minutes, no matter what their skill level.

No installation

SpinetiX Fusion runs inside the Hyper Media Players (HMP) and doesn't require a paid account or additional software; you don't even have to install it on your computer.

Just open your web browser, connect to the HMP device and update content quickly and easily from anywhere on any computer!

Unique user experience

Fusion uses familiar and intuitive drag & drop actions to create, and manage your content. Once you're happy, hit save and publish. In minutes, you've become a digital signage expert, without needing training. You no longer need to pay others to manage your content.

Do more in less time

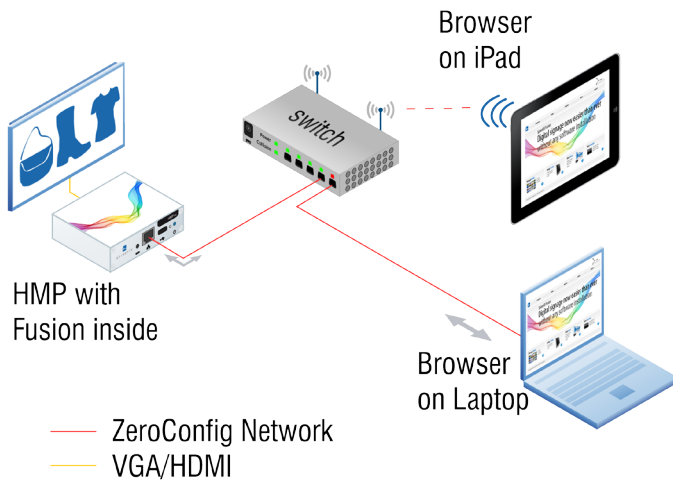

Get content onto your screens faster than ever before. Spend less time installing and maintaining your system, have more time to focus on your business. Feel confident that you can manage your content easily yourself.

Standard Benefits

- Simple: anyone can use it
- Flexible: add videos, playlists, skins, etc.
- No installation: Fusion runs inside HMP
- Cross platform compatible (PC, Mac, iPad)
- Runs in your browser
- No subscription license fees to pay
- Multi-lingual & user access
- Complete all-in-one solution

Specifications
