Innovation - consistently thinking ahead

Butterfly Valve Type 578

GF Piping System introduces the latest generation of butterfly valves with a completely newly developed all-plastic housing for the lug-style butterfly valve type 578. The product line type 578 combines a long service lifetime with low torques and offers an ideal combination of quality and durability.

+ Applications

- Industrial water processing
- Water treatment
- Chemical processing industry
- Seawater desalination
- Swimming pools
- Aquariums
- Surface engineering
