

Practice Profile

Pace Consult is a practically-minded multidisciplinary consultancy, offering a full suite of 'concept to completion' services across three dedicated divisions: Acoustics & Vibration, Fire Protection and Air Tightness. From consultancy practices nationwide, Pace Consult delivers innovative and competitive solutions, ensuring projects achieve the necessary compliance on time and within budget.

With sector specialists in each division, Pace Consult provides expert guidance through every construction phase for education, healthcare, custodial, commercial, residential, industrial and leisure developments. Moreover, having delivered a long line of design and build as well as traditional contracts, Pace Consult has extensive experience of working with all stakeholders in the construction supply chain.

Acoustics & Vibration

Pace Consult has a proven track record in turning complex acoustic challenges into cost effective and practical solutions. With particularly strong consultancy teams in the education, healthcare and commercial sectors, Pace Consult has delivered a long line of high profile projects, working with partners such as Willmott Dixon, Galliford Try and Aedas.

Approved under the ANC registration scheme for Building Regulations (Part E) completion testing works, Pace Consult offers a rapid and nationwide testing service. The full suite of acoustic and vibration services includes:

- Environmental impact assessment & Planning advice
- Noise & Vibration assessments
- Architectural acoustic design
- Education acoustics
- Testing and certification
- Mechanical services acoustic assessment and design

Fire Protection

Combining technical expertise with a working knowledge of the built environment, Pace Consult will strike the right balance between practicality and risk, delivering developments to Part B standards and ensuring these continue to comply with the Regulatory Reform (Fire Safety) Order (2006). Adopting a holistic approach to fire protection, Pace Consult offers an integrated and competitive range of services, including:

- Fire compartment design
- Site inspections and certification
- Emergency management
- Fire risk assessments

Air Tightness

Expert in paving a smooth path to building regulation compliance, Pace Consult delivers a range of air tightness consultancy services to ensure projects meet Part L standards first time. Pace Consult's team of Part L specialists will manage the development from end to end, delivering a seamless transition between phases and ultimately securing efficient project progression. Air tightness services include:

- Architectural design reviews
- Testing and certification
- Remediation after failure
- Advice and reporting
- Site audits

From design through to testing and certification, Pace Consult will adopt a flexible approach, combining services to provide a fully integrated solution, or delivering standalone packages in response to specific project demands.
