FRAMELESS BATHSCREEN

Please read these instructions carefully and keep for future reference.
Incorrect fitting will invalidate the guarantee.

⚠ SAFETY

- Handle glass with great care. Although the glass is very tough, sharp impacts can damage the bathscreen.
- Make sure there are no hidden pipes or cables hidden in the wall where you intend to drill.
- Wear safety goggles, shoes and appropriate clothing.
- If you have long hair, tie it back out of the way.

⚠ BEFORE INSTALLATION

- Two people are needed to carry out parts of the procedure, lift with care.
- Check the bath is perfectly level and does not sag or bow when you stand or sit in it.
- The bathscreen must only be be fitted on water proof walls i.e. tiled walls which are sealed with waterproof grout.
- Check that the bath has a flat top edge with no protruding handles, which could interfere with the movement of the bathscreen.
- Always check very carefully that components are vertical.
- Please correctly dispose of packaging properly after installation.

Equipment needed:
Drill, 6.5mm Masonry Bit, 4.5mm Metal Bit (general), Crosshead Screwdriver, Spirit Level, Pencil, Silicone Sealant, Tape Measure, Masking Tape.

Note: The screws and wall plugs supplied are for masonry walls. For lightweight walls i.e. stud partition, plasterboard etc, use the correct type of fixings.

IMPORTANT

Bathscreens should not be fitted to drop-fronted baths or baths with lipped fronts (see diagrams below).

⚠ CARE AND MAINTENANCE

IMPORTANT: You must not use the bath or shower for 24 hours after installation of the bathscreen.

DO NOT use bleach, scouring powders, solvents or other aggressive cleaning agents. To clean, use warm soapy water and a clean cloth and rinse off.

DO NOT apply weight or pressure to the bathscreen. **DO NOT** swing the bathscreen violently.

When folding the bathscreen after use, fold it into the bath to prevent drips.

Periodically check all fixings and fittings and tighten if necessary.

a

b

c

ø 6.5 mm

a: Position the bathscreen so that it rests along the inner edge of the bath rim.

b: Position the wall channel, ensure it is perfectly vertical and mark off the drill hole positions against the wall. Place masking tape against the wall before you mark hole positions. **c:** Drill 6.5mm holes to a depth of 30mm. Insert wall plugs.

3

32mm

Apply silicone sealant to back of wall channel as shown.

Fix wall channel to wall using the 32mm screws.

Insert the bathscreen into the wall channel, fully tightening the top and bottom screws.

4

PN4745

*

Adjust the bathscreen by tightening or loosening the screws (top and bottom) so that the bottom seal gently brushes the bath rim evenly along its length. **IF THE SEAL IS TOO TIGHT ON THE BATH THE BATHSCREEN MAY LEAK.**

The bathscreen **MUST NOT** come out of the wall channel beyond the marked line (*).

Push fit both screw caps in their **TOP** and **BOTTOM** positions.

5

50mm

Apply silicone sealant to the outside of the bathscreen where shown.

DO NOT apply silicone sealant to the inside face of the bathscreen.
