

## Beavertails

We manufacture beavertail bodies for 3.5t chassis up to 32t heavy duty applications. Full alloy lightweight construction up to the heavy duty steel beavertail bodies built to suit your individual requirements. A wide range of ramp options are available including full alloy detachable ramps, spring assisted, flip toe, single full width, cheese wedge or stand up ramps. Manual, fully hydraulic or spring assisted. All types of ramp finishes are available from hardwood, expanding mesh, angle, special punched sheet or a combination.

Bodies can be outrigged from the subframe to allow a lower floor height than standard builds.

All usual options from electric or hydraulic winches to side safety systems fitted and manufactured to meet each customers needs.
