

## Curtainsider

Priden curtainside bodies are manufactured to a high standard and built to each customer's specific requirements. We offer lightweight all alloy solutions or standard steel bodies with painted or galvanised finish.

Our bodies are designed and manufactured using over 50 years experience within the transport industry.

A wide range of options are available from one off special builds including beavertail curtains, glass carrying bodies, sliding tilt covers or standard distribution bodies. Various types of racking systems, split deck and loading solutions are available. Several curtain options include stainless steel over centre buckles, smoothside curtains and load restraint systems. Various types of rear closures are available including barn doors, shutters, curtains, and cantilever tail lifts. All makes of air management equipment fitted.

We also offer tandem and tri axle drawbar trailers, tail lifts and rear mount fork trucks. All makes of tail lifts fitted, tested and repaired.

Priden Engineering Ltd pride ourselves on quality and offer a two year manufacturer's warranty on our commercial vehicle bodies. Supplier's warranty applies to such items as tail lifts. Supplier's warranty applies to such items as tail lifts.
