

300dpi Direct Thermal Printer

■ Ideal for processing thermal stencils

The BRT4-0 direct thermal printer offers extremely reliable output with high quality and speed. Class leading 300dpi ensures crisp, accurate results every time.

The BRT4-0 comes as standard with a built in media cutter making handling of stencil material very straightforward.

The included software can be used to create various 2D codes, serial numbering and import of many different graphic formats together with the ability to connect to and print from various files such as Microsoft Excel, Access and SQL Server databases.
